Conduct Expectations

As a McMaster graduate student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the Code of Student Rights & Responsibilities (the “Code”). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, whether in person or online.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students’ access to these platforms.
**Academic Accommodations Of Students With Disabilities**

Students with disabilities who require academic accommodation must contact Student Accessibility Services (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's Academic Accommodation of Students with Disabilities policy.

**Note:** Approved accommodations of previous undergraduate students at McMaster do not automatically apply during graduate studies. Students needing accommodations should return to SAS soon after commencement of their graduate program to implement or update your student status and to activate accommodations.

**Academic Accommodation For Religious, Indigenous Or Spiritual Observances (RISO)**

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the RISO policy. Students should submit their request to their Faculty Office normally within 10 working days of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

**Copyright And Recording**

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, including lectures by university instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

**Extreme Circumstances**

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.

**Plagiarism-Checking Software (iThenticate)**

Effective October 1, 2023 the university requires all Master’s and Doctoral theses to be reviewed by iThenticate, a plagiarism-checking software, before being seen by an external reviewer (Doctoral) or the finished copy submitted (Master’s). This requirement can be found in the University’s Research Plagiarism
Checking Policy (found on the Secretariat website). This requirement is not meant to catch plagiarism; but rather, prevent it. By helping students detect sections of text requiring revision before the document is released to the public, the use of this tool can avoid otherwise serious allegations.

*Instructions on how to access and use the software will be available via The School of Graduate Studies’ website in Fall 2023.*

Student and supervisor will work together to revise any sections of the thesis that may be overlapping with previously published content that the student does not have permission to copy; sandwich theses are expected to have a substantial amount of already published content, but in this case the student should have sought, and been granted, permission to use it in their document. The student’s supervisor is responsible for confirming the thesis is ready to submit.

Scholarships, Fellowships, Bursaries and Other Awards

Most graduate students admitted to the M.A.Sc. and Ph.D. programs in Mechanical Engineering will receive financial support in the form of a teaching assistantship and a departmental scholarship. The minimum level of support varies from year to year. Graduate students are encouraged to apply for both internal and external funding opportunities that may be available to them. (Keep an eye on your email; most of these opportunities will be advertised through that medium.) Awards—such as CGS, PGS and Vanier—are announced in the Fall term, as well as most donor-funded awards. OGS awards are announced in the Winter term. Department-specific awards are often announced between the Winter and Spring terms.

If a graduate student holds a major award (NSERC, CGS-M, CGS-D, PGS-D, OGS, QEII GSST, Vanier), the total stipend provided by the program cannot be reduced by more than $2500 per term for each term in which the students holds the award.

Teaching Assistantship

First Time Teaching Assistants (TA)

All first time TA’s at McMaster are required to complete five hours of paid mandatory TA training which will include instruction on topics in pedagogy and anti-oppression. This mandatory training is a one-time requirement separate from, and in addition to, other training that you may be expected to complete as part of your employment (which may include general orientations, institution-wide mandatory health and safety training, and assignment-specific health and safety training required by your Employment Supervisor).
Self-registration for training courses is available through the Regulatory Training Tile on the Mosaic homepage. Once registered, carefully follow the directions under on the welcome page on Avenue to Learn. More detailed instructions will be emailed to students before the beginning of each semester.

Important notes:

1. Training should be completed within two weeks of your assignment.
2. A short quiz follows each module on Avenue to Learn, and a score of 100% is required on each quiz. These quizzes can be taken repeatedly until the required score is reached. These quizzes trigger the payment process - if the quizzes are not successfully completed (i.e. 100%), you risk not being paid for these five hours.
3. This training is a one-time requirement for the first time that you TA at McMaster. You will not be paid for more than 5 hours of training, even if you TA for multiple faculties.

For more information, please refer to the links below:

1. https://mi.mcmaster.ca/new-ta-programming/

Returning Teaching Assistants

If for any reason, a returning TA has not taken the pedagogy and anti-oppression training (away on a leave of absence or coop placement), the TA will be required to take the two-hour anti-oppression training module through MacPherson and will receive two hours of pay accordingly. While additional training is encouraged, it will not be compensated.

Teaching Assistants for 2023/2024 Academic Year

A useful guide is provided here: https://ecampusontario.pressbooks.pub/taguide/

You must complete all TA training. Before commencing your Teaching Assistantship duties, you need to complete the following forms in consultation with the course instructor and submit the completed forms to the Graduate Administrator.

Toward the end of your TA assignment, you will be expected to have an exit meeting with your TA supervisor in which you and your supervisor will discuss the extent to which performance expectations were met. At the end of the meeting, you and your supervisor must complete the TA Exit Meeting Form and submit the completed form to the Graduate Administrator.

https://www.eng.mcmaster.ca/mech/wp-content/uploads/sites/7/2022/08/ta_exit_meeting_form_0.pdf
Outstanding Teaching Assistant Awards

Every semester, the department will recognize TAs who have excelled in their assignments with an Outstanding Teaching Assistant Award. These awards are based on recommendations from the TA supervisor and student reviews.

Grad Pay

In order to receive research scholarships and TA income, you will need to submit all the payment forms listed under “Additional Payment Information” (scroll about halfway down the page) to hr.mcmaster@mcmaster.ca. Research scholarships are paid as one lump sum two or three weeks into the start of a new term; TA income is paid biweekly during the term(s) in which you are a TA.

In order to receive graduate/department bursaries, you will need to go to your Mosaic Homepage (log in with your MacID and password), and click on the tile that says “Enrol in Direct Deposit (Student)”; follow the steps indicated. Bursaries are paid as one lump sum two or three weeks into the start of a new term.

If you do not see this tile, please log into University Technology Services’ (UTS) Client Services Portal (again, using your MacID and password) and select:

1. “General Requests”; then
2. “Report a Problem”.
3. Detail your issue in the blank field, then click “Create”. Please monitor the portal for confirmation that the tile has been added to your Mosaic Homepage. Detail your issue in the blank field, then click “Create”. Please monitor the portal for confirmation that the tile has been added to your Mosaic Homepage.

*IMPORTANT: If you complete any of the previous steps improperly and/or are not fully enrolled in the Fall 2023, Winter 2024 and Spring/Summer 2024 terms by August 1, 2023, your payments will be delayed until a correction is made.

University Health Insurance Plan (UHIP)

UHIP is a mandatory, comprehensive health insurance plan that provides health coverage for international and incoming exchange students. UHIP covers medically necessary doctors and hospital visits within Ontario for international students, incoming exchange students and dependants (spouse and children). For more information, please visit:

https://studentsuccess.mcmaster.ca/international-students/health-insurance/

Other topics, such as cost of living and tuition fees, can be found on The School of Graduate Studies’ website under “Cost of Living” or on The Registrar’s website under “Graduate Fees”: Tuition and Supplementary Fees.
Thesis Writing and English Language Skills Development

If you are having difficulty with the English language and thesis writing, there are several on campus resources available to help you. The following are particularly useful:

McMaster Office for the Development of English Language Learners (MODEL). This is a FREE service designed to help students with the English Language. They offer training, workshops and support to meet student needs of all academic backgrounds and English language proficiency. You can get more information at MODEL | MELD Office.

The School of Graduate Studies also offers help with Thesis writing. Often, the Thesis writing can be the stumbling block for students to graduate on-time. Using their resources at the start of one’s graduate study can significantly help with the writing process. Please check out their resources at Graduate Writing – School of Graduate Studies.
GRADUATE PROGRAM REGULATIONS – ENROLMENT

Matters With Regard to Enrolment (Section 2.5 Of The Graduate Calendar)

1. **Full-Time Student**
   A full-time student is one who is studying on a full-time basis; treating studies like a full-time job; attending to coursework and research in a professional manner; being in consultation with and available to their supervisor at regular intervals (daily and/or weekly by mutual agreement) to monitor progress.

2. **Part-Time Student**
   A part-time student is one who usually has a full-time job outside the university, but wants to work towards his or her graduate degree on a part-time basis. A part-time student is limited to 3 graduate courses per academic session (Sept 1 – Aug 31) and will usually take more time to complete the degree (M.A.Sc. program: up to five years – 60 months - from original date of registration if student began as “part-time”; Ph.D. program: up to eight years – 96 months – from original date of registration if student began as “part-time”). Part-time students are not eligible for financial support from the department; nor teaching assistantships; nor scholarship equivalent.

3. **Status Changes (FT to PT; PT to FT; Withdrawal; Re-admission to Defend; Program Transfers, Leaves of Absence; Full-time Off-Campus)**
   Students who wish to change their status (full-time to part-time; part-time to full-time; transferring from Master’s to Ph.D.; withdrawal from the program; going on leave of absence, studying full-time off-campus), and former students who wish to be readmitted to the program, are expected to complete paperwork within a timeframe that permits their change to be effective on the first day of the next term (September 1st, January 1st or May 1st). Please see the graduate program administrator at least one month in advance of an expected transition to ensure that all paperwork is completed in a timely manner.

4. **Engineering Co-op Program**
   The Engineering Co-Op Program for graduate students is an optional program for full-time domestic and international Masters and PhD students in good academic standing, that allows students to gain engineering work experience prior to graduation. Students have the option to complete 4 to 12 months of co-op experience. It is administered by the Career Development & Relationship Manager - Graduate Studies. For more information, please visit: [https://www.eng.mcmaster.ca/co-op-career/co-op-program/#tab-content-graduate-students](https://www.eng.mcmaster.ca/co-op-career/co-op-program/#tab-content-graduate-students)

5. **Industrial Ph.D. Program**
   The Industrial Ph.D. program allows full-time doctoral students the unique opportunity to work in the field and complete study toward their doctoral degree simultaneously. For more information on the Industrial stream, please visit the Faculty of Engineering’s page on the “Industrial Ph.D.” program.
MASTER OF APPLIED SCIENCE (M.A.Sc.)

Program Requirements
The minimum course requirement is four half-courses (50% of which must have the MECHENG course code); three of the four courses must be at the 700 level. A half-course is classified as 3 units. Courses delivered by departments in the School of Engineering and Applied Sciences (listed here) do not require a petition to count toward degree requirements; however, they cannot replace a MECHENG course.

Incoming graduate students to the Faculty of Engineering are required to complete a career planning report within their first year of study. Students must first book a career planning session with the faculty’s career development specialist before submitting a career planning report. The report should not exceed 2 pages and must be submitted to the department’s graduate program administrator to be evaluated by the associate chair (graduate).

Students are required to present a thesis that embodies the results of original work that the candidate has completed and demonstrates competence in Mechanical Engineering. Only the standard format thesis, as described in the document “Completing your Thesis – Master’s” (available from the School of Graduate Studies website), will be accepted for examination. An oral defence of the thesis is required.

Degree Requirement Checklist
Incoming graduate students will be given a Degree Requirement Checklist at the beginning of their academic career. The completion of this checklist is mandatory and should be completed throughout the duration of your studies.

Student Responsibility
1. Keep the checklist up-to-date as you complete your studies.
2. Bring the checklist with you to your Supervisory Committee Meeting to discuss your progress.

Supervisor Responsibility
1. Discuss the checklist with the student at the Supervisory Committee Meeting to ensure the student is on track.
2. Once all academic requirements are fulfilled, sign the checklist. The completed signed checklist must be submitted to the graduate administrator before initiating the defence.

Additional Requirements
- ME 758 “Graduate Seminars in Mechanical Engineering”: Mandatory annual registration in Mosaic for Term 1 and Term 2 of every academic session. Please visit Avenue to Learn for more details. MASc students are required to make one 10-minute presentation with a 5-minute Q&A period.
• **SGS 101 and SGS 201 (online courses):** Mandatory registration in Mosaic at the start of a student’s program only. Must pass and abide by these online SGS courses. Connect to Avenue to Learn to complete these online courses at: [http://avenue.mcmaster.ca/](http://avenue.mcmaster.ca/)

- **Job Hazard Analysis (JHA) form (see JHA under “Quick Links”):** Must complete a job hazard analysis (JHA) form with your supervisor and read and follow the appropriate Standard Operating Procedures (SOPs). Note: In the context of safety, all graduate students are considered “workers”.

- **Core Health and Safety courses:** Must successfully complete and abide by the following core health and safety courses (available online here: [http://www.workingatmcmaster.ca/eohss/training/](http://www.workingatmcmaster.ca/eohss/training/)):
  - Health and Safety Orientation
  - Asbestos Awareness
  - Ergonomics
  - Fire Safety
  - Slips, Trips and Falls
  - WHMIS 2015
  - Violence and Harassment
  - COVID-19 Awareness Training

**Supervision**

Supervision of M.A.Sc. students is governed by the School of Graduate Studies regulations as outlined in [Section 3.1 of the Graduate Calendar](http://www.workingatmcmaster.ca/eohss/training/).

**Supervisory Committee Meeting**

The supervisor shall meet with the student between 9 months to 12 months of commencement of the program for a formal review of progress. The student will complete the M.A.Sc. supervisory committee report form and submit to the supervisor at least one week in advance of the meeting. The supervisor will complete the form and submit it to the Department graduate program administrator at the end of the progress review meeting.

**Student Responsibility**

1. Set up the meeting with supervisor within 12 months of starting.
2. Complete the student sections of the M.A.Sc. supervisory committee report form. (Details of progress towards meeting degree requirements since beginning of program).
3. Submit the form with a critical literature review of your research area to your supervisor at least one week before the meeting.

**Supervisor Responsibility**

1. Complete Part A: Progress made towards meeting degree requirements.
2. Complete Part B: Specific goals for next number of months.
3. Complete Part C: Areas for improvement.
4. Provide an overall assessment.
5. Review the form with student, sign and submit to the graduate program administrator.
M.A.Sc. Examination Committee

Each M.A.Sc. student must successfully defend their thesis in an oral examination before a committee proposed by the supervisor and approved by the Department Chair or their delegate. A member of the committee, other than the supervisor, will be appointed to chair the committee.

The committee shall be composed of 3 (three) members, including the supervisor. In the case of co-supervision, the committee will consist of 4 (four) members including the supervisors.

Students currently enrolled in the M.A.Sc. program may be transferred to the Ph.D. program before they complete their M.A.Sc. degree requirements. Regulations governing this scenario are stated in the current School of Graduate Studies Calendar, 2.1.3 Admission Requirements for Ph.D. Degree. If a student is granted permission to enter the Ph.D. program while concurrently completing the M.A.Sc. program, the School of Graduate Studies requires the student to complete all requirements for the M.A.Sc. program (including defence and submission of thesis for binding) within four (4) months of the date of entry into the Ph.D. program. Students who do not complete the requirements for the Master’s degree within the four months will lose their status as a Ph.D. student and be returned to Master’s status.

M.A.Sc. Thesis Defence

The thesis defence starts with the candidate’s presentation of the main elements of the thesis, including the relevance of their work, approach, samples of the most important findings, and contributions. The presentation should not exceed 20 minutes. This is followed by one round of questions and another round of follow-up questions, as appropriate. The duration of the Master’s defence (including the candidate’s presentation) is expected to vary from 1¼ to 1¼ hours, but it normally should not exceed 2 hrs. If the examining committee is not satisfied with the candidate’s performance in the thesis defence, the candidate must retake the defence after completing any thesis revisions which may be recommended by the examining committee. The student must be informed in writing of the conditions they must meet to be able to succeed in the second and final defence.

M.A.Sc. Defence Procedures

Supervisor:

- Go through the Degree Requirement Checklist with the student to ensure they have completed all academic requirements. The completed signed checklist must be submitted to the graduate administrator before initiating the defence.
- Set up the examination committee by selecting two additional faculty members (internal or external) who are adequately familiar with the thesis research area.
• Inform Graduate Program Administrator using the attached form for approval of examination committee. The examining committee approval form should be completed and approved at least 2 weeks before the proposed defence date.

• After approval of the examination committee, finalize the date and time of defence, check room availability and email committee confirming defence, including date, time and room location.

• Sign off on the originality report of the students thesis after they scan their theses for originality using iThenticate (plagiarism-checking software)

**Graduate Administrator:**

• Have examination committee approved by the Department Chair or delegate.

• Post defence notification on Mech Eng notice board.

• Email announcement to Faculty, Graduate Students, and Postdoctoral Fellows.

• Complete the following and provide them to the Chair of examination committee one day prior to defence.
  i.  Master’s Thesis – Final Submission Sheet
  ii.  Licence to McMaster University
  iii.  Report of Examining Committee on Master’s Thesis
  iv.  Report of Examining Committee for Master’s Thesis Examination-ORAL Defence

• Complete the following forms and provide them to the Supervisor one day prior to defence.
  i.  NSERC Appendix D (Form 100)
  ii.  Department Exit Checklist

**Chair of Examining Committee:**

• Return the following completed forms to the Graduate Administrator:
  i.  Licence to McMaster University
  ii.  Report of Examining Committee on Master’s Thesis
  iii.  Report of Examining Committee for Master’s Thesis Examination-ORAL Defence

**Student:**

• After approval of the defence committee, thesis candidates are required to use plagiarism-checking software, iThenticate, before submitting. *Instructions on how to access and use the software will be available via The School of Graduate Studies’ website in Fall 2023.*

• Following the iThenticate check, the student will distribute the thesis to the examining committee about 14 days (but no later than 10 days) before the defence date. Submissions later than 10 days before the defence date shall require consent of all members of the defence committee.

• Return the following completed forms to the Mechanical Engineering Department
  i.  NSERC Appendix D (Form 100)
  ii.  Department Exit Checklist

• Please review the SGS Final Submission – Final Thesis Checklist ([Master’s Degree – Thesis>Submit](#)).
**Convocation**

Detailed information regarding convocation, including deadlines and the timing of ceremonies, is available on the Office of the Registrar’s website: [http://registrar.mcmaster.ca/category/grad/](http://registrar.mcmaster.ca/category/grad/). Please review the checklist items.

**Transferring from M.A.Sc. to Ph.D. Without Completing M.A.Sc. Degree**

Exceptional students enrolled in the M.A.Sc. program may be recommended for a transfer to doctoral studies without needing to complete their Master’s degree. The procedure regulating M.A.Sc. to Ph.D. transfers is provided below.

M.A.Sc. students transferring to Ph.D. will need to have:
1. completed a minimum of TWO terms of study in the M.A.Sc. program;
2. completed a minimum of TWO half courses at the 700 level with a minimum average of A- (McMaster 10/12);
3. completed their M.A.Sc. supervisory meeting and received a rating of EXCELLENT on their report; and
4. garnered a strong letter of support from their supervisor.

The letter of support and a completed Request for Program Change Form need to be submitted to the graduate program administrator to be processed by the Department before The School of Graduate Studies (SGS) can authorize the transfer. Please note that the effective date of the status change should be the first day of the following term.

**Accelerated M.A.Sc. Option**

An Accelerated Option is also available to students currently enrolled at McMaster as undergraduate students in the Mechanical Engineering Department whereby the M.A.Sc. degree may be completed in 16-20 months of full-time study. In exceptional circumstances, students from other Engineering departments in McMaster may apply for entry into the accelerated option by contacting the Mechanical Engineering Department's Associate Chair (Graduate). Application for entry into the Accelerated Option through the Associate Chair (Graduate) occurs in the penultimate year of undergraduate studies. Applicants must have maintained a minimum CGPA of 9.5 for their undergraduate course work with a sessional average of 9.5 at the time they are applying for the option. The Accelerated Option requires students to complete at least one term of their research project with a supervisor from the department prior to completion of their undergraduate degree. A one-term 600-level course is required under the Accelerated Option in the final undergraduate year for graduate credit provided it is listed within the department. For students enrolled in the Accelerated Option, research conducted in MECHENG 4X04 may count towards the Accelerated Option and therefore towards partial fulfillment of the graduate M.A.Sc. thesis work. Entry into the M.A.Sc. program under the Accelerated Option must occur less than one year after completing one’s undergraduate degree and must meet the same requirements for admission as other candidates.

DOCTOR OF PHILOSOPHY (Ph.D.)

Program Requirements

Program start date between September 1, 2015 and September 1, 2019: The minimum course requirements for this degree are two half-courses at the 700 level beyond the Master’s degree, OR six half-courses, at least five of which should be at the 700 level, beyond the Bachelor’s degree. A half-course is classified as 3 units. Half of your courses are required to have "MECHENG" in the course code. Only courses delivered by departments in the School of Engineering and Applied Sciences (listed here) do not require a petition to count toward course requirements; however, they cannot replace a MECHENG course.

Program Start Date of September 1, 2019 or later: The minimum course requirements for this degree are two half-courses at the 700 level beyond the Master’s degree, OR four half-courses, at the 700 level, beyond the Bachelor’s degree. A half-course is classified as 3 units. Half of your courses are required to have "MECHENG" in the course code. Only courses delivered by departments in the School of Engineering and Applied Sciences (listed here) do not require a petition to count toward course requirements; however, they cannot replace a MECHENG course.

Incoming graduate students to the Faculty of Engineering are required to complete a career planning report within their first year of study. Students must first book a career planning session with the faculty’s career development specialist before submitting a career planning report. The report should not exceed 2 pages and must be submitted to the department’s graduate program administrator to be evaluated by the associate chair (graduate).

Ph.D. students are required to pass a comprehensive examination designed to test their breadth of knowledge and ability to integrate ideas.

Students are required to present a thesis that embodies the results of original work that the candidate has completed and demonstrates competence in Mechanical Engineering. Only the standard format thesis, as described in the document “Completing Your Thesis - Ph.D.” (available from the School of Graduate Studies website), will be accepted for examination. An oral defence of the thesis is required.

Degree Requirement Checklist

Incoming graduate students will be given a Degree Requirement Checklist at the beginning of their academic career. The completion of this checklist is mandatory and should be completed throughout the duration of your studies.

Student Responsibility

1. Keep the checklist up-to-date as you complete your studies.
2. Bring the checklist with you to your Supervisory Committee Meetings to discuss your progress.
Supervisor Responsibility

1. Discuss the checklist with the student at the Supervisory Committee Meetings to ensure the student is on track.
2. Once all academic requirements are fulfilled, sign the checklist. The completed signed checklist must be submitted to the graduate administrator before initiating the defence.

Additional Requirements

- **ME 758 “Graduate Seminars in Mechanical Engineering”:** Mandatory annual registration in Mosaic for Term 1 and Term 2 of every academic session. Please visit Avenue to Learn for more details. PhD students are required to make one 20-minute presentation with a 5-minute Q&A period in their 3rd or 4th year.
- **SGS 101 and SGS 201 (online courses):** Mandatory registration in Mosaic at the start of a student’s program only. Must pass and abide by these online SGS courses. Connect to Avenue to Learn to complete these online courses at: http://avenue.mcmaster.ca/
- **Job Hazard Analysis (JHA) form (see JHA under “Quick Links”):** Must complete a job hazard analysis (JHA) form with your supervisor and read and follow the appropriate Standard Operating Procedures (SOPs). Note: In the context of safety, all graduate students are considered “workers”.
- **Core Health and Safety courses:** Must successfully complete and abide by the following core health and safety courses (available online here: http://www.workingatmcmaster.ca/eohss/training/):
  - Health and Safety Orientation
  - Asbestos Awareness
  - Ergonomics
  - Fire Safety
  - Slips, Trips and Falls
  - WHMIS 2015
  - Violence and Harassment
  - COVID-19 Awareness Training

Supervision

Supervision of Ph.D. students is governed by the School of Graduate Studies regulations as outlined in Section 3.1 of the Graduate Calendar.

As soon as possible, and no later than nine (9) months after commencing doctoral studies, a supervisory committee for the student shall be approved by the Department Chair or their delegate, on the recommendation of the supervisor and in consultation with the student.

The supervisory committee will normally consist of at least three (3) members (4 members in the case of co-supervision). One member, whose scholarly interests include the area of the student’s main interest, will normally be from outside the department if a suitable individual is available. Another member may be from outside the university with departmental approval and permission of the Dean of School of Graduate Studies.

Supervisory Committee Meeting

The Ph.D. student’s supervisory committee shall meet with the student at least once a year before November 30th. At each meeting, the student shall prepare a 5-page to 10-page progress report to be...
given to the committee members at least one week in advance of the meeting. At each meeting, the student shall give a short 20 – 25 minutes presentation of their research progress, entertaining questions from committee members. Subsequent meetings shall be held to monitor progress towards the comprehensive exam as well as the completion of the thesis.

**Supervisory Committee Report Deadlines**

The deadline for completion of the supervisory committee report for students who have been in the program for one semester or more is November 30, 2023 or within ONE year of starting the PhD program, whichever comes **FIRST**.

- Student start date of January or May 2023: Deadline is November 30, 2023
- Student start date of September 2023: Deadline is November 30, 2024
- Student start date of January or May 2024: Deadline is November 30, 2024

Return completed form to the Graduate Program Administrator
Ph.D. SUPERVISORY COMMITTEE MEETING PROCEDURES

Supervisor:

- Set up date and time of Ph.D. supervisory committee meeting in consultation with student and other members of the committee.
- Check room availability and send email confirming supervisory committee meeting to student and other members of the committee, including date, time and room location.
- Inform graduate administrator by email or using the optional form.

Student:

- Once date is set, talk to graduate administrator to initiate report. Students will receive this message:

Dear Student Name,

All PhD students must meet at least once a year with their supervisor and committee. Our records indicate that you should have a meeting this year.
Please work with your supervisor, and/or graduate office to arrange a meeting date and time. Once a date has been fixed, please click on the link below to initiate the report to be submitted by you to your committee and supervisor, prior to the meeting. [Link to student’s report]

Student Records
School of Graduate Studies

Follow the instructions at the link in the email to complete your Annual Supervisory Committee Report. (Images from the online report appear on the next page.)
Supervisory Committee Meeting Report

Student ID#  ______________  First Name  ___________________________  Family Name  ___________________________

Program  MECHANICAL ENGINEERING

Date of this meeting (YYYY-MM-DD):

Every Ph.D. student must have a Ph.D. Supervisory Committee meeting at least once every academic year. This report
must be received by the School of Graduate Studies by November 30th.***

COMPREHENSIVE REQUIREMENT

The School of Graduate Studies Calendar states that the Comprehensive Examination for full-time students will normally have taken place
between 12 and 20 months from commencement of PhD studies with an upper limit of 24 months.

Date of completion  ___________________________  Expected date of completion  ___________________________

RESEARCH ETHICS APPROVALS

Does research involve human participants, their records or tissues?
If yes, has approval been obtained from the research ethics board?

Does research involve animals or their tissues?
If yes, has approval been obtained from the research ethics board?

FIELD TRIPS

Does research involve international travel, which poses an identifiable additional risk under the
university’s risk management policy?
If yes, has student completed risk management forms and obtained approval?
If a Request to be Full Time Off Campus form is needed are there plans for submitting it?
**Supervisor's report**

**Part A: Progress**

Progress made in accomplishing goals set out in last report (or toward meeting degree requirements since beginning the program if this is the first report):

(i.e., courses completed, comprehensive examination preparation/writing/oral defense, thesis proposal, research, chapters written/revised, conference presentations, publications).
Part B: Goals
Specific goals for the next interval of _____ months (attach an additional page if necessary):

Anticipated date for the completion of degree requirements: Date(YYYY-MM-DD):

Part C: Areas for improvement and additional direction

Committee’s Report
Evaluation of overall progress since last report:

*Return completed form to the Graduate Program Administrator*
Ph.D. Comprehensive Examination

Purpose
The purpose of the comprehensive examination is to test the breadth of knowledge and maturity of approach over a range of topics that are both within and peripheral to the student’s discipline. The student’s level of achievement in this examination will determine possible academic background deficiencies that the candidate may have. Successful completion of the comprehensive examination is a necessary requirement for the candidate to continue in the program.

Program Start Date Prior to September 01, 2022
The student is expected to complete all requirements of the comprehensive examination within 20 months of first registration in the Ph.D. program, with an upper limit of 24 months. Special exceptions require the approval of the Department Chair or designate and the Graduate School. Part-time students must take the comprehensive examination by the end of the 36th month. Normally, course requirements will be completed before the Comprehensive Exam, but this is not a requirement. Likewise, preliminary research results are not required, but the student is expected to present and defend a viable research proposal including anticipated new contributions to the existing scientific literature. It is the responsibility of the supervisor to recommend and notify the graduate administrator that a candidate will take the examination at least two months in advance. In consultation with the supervisory committee, the supervisor nominates a comprehensive examination committee and submits the nomination for approval by the Department chair or their designate. Once the committee is approved, it is the responsibility of the examination committee chair to initiate and oversee all administrative arrangements of the examination, including the exact dates of the written and oral parts of the exam.

Structure of Examination Committee
The comprehensive examination committee shall consist of:
1. Committee chair;
2. Student’s supervisor;
3. At least one (1) member of the supervisory committee (apart from the student’s supervisor);
4. An additional member who has scholarly interest in the student’s area of specialization; and
5. An external committee member (cannot be supervisor or committee chair).

Format of the Examination
The comprehensive examination will consist of two parts, which are outlined below.

Part A: Breadth and Depth of Knowledge
The objective of this part of the exam is to test the student’s comprehension as well as breadth and depth of knowledge of their discipline area, normally at the senior undergraduate/junior graduate level. Although the written exam focuses primarily on the student’s understanding of fundamental concepts in two technical areas related to their research topic, the scope of the oral part extends to examining the depth of knowledge in the student’s discipline area and possible deficiencies in their academic background.
**Part B: Research Proposal**

The candidate shall submit a report on the research program: **up to a maximum of 40 pages in length, INCLUDING all figures, graphs, illustrations, tables and appendices (but not including the list of references).** The report should be typed double-spaced; 12 point Times New Roman; one inch margins on all sides. **IF THE REPORT DOES NOT CONFORM WITH THESE GUIDELINES, IT MAY BE RETURNED TO THE CANDIDATE FOR REVISION AND CAN RESULT IN DELAYING THE EXAMINATION SCHEDULE.** The report must include: (i) a critical survey of the directly related literature in the field; (ii) an outline of the proposed research program including its justification, the approach to be taken, specific analytical or experimental methods, perceived or anticipated problems, preliminary results (if available); (iii) an account of expected contributions the proposed research will bring to the existing scientific literature; and (iv) a proposed timetable to accomplish the task. A copy of the report must be made available to each member of the Examination Committee at least two weeks prior to the date of the oral examination.

| At least two weeks before oral part of the exam | Copies of research proposal to be submitted to the Graduate Program Administrator (electronic or hard copy) by student for distribution to the examination committee. |
| Day of oral exam (one week after the written exam) | Part B of the oral exam will be approximately 1.5 hours. The candidate will be required to present their proposal in a summary fashion (20 minutes) to the committee followed by questions directly related to the proposal and the candidate’s specific area of research. |

**Examination Result**

- The candidate’s achievement in each of the parts shall be judged as: Pass or Fail.
- **The candidate must pass both parts to successfully complete the comprehensive exam.**
- The committee chair shall communicate the result of the examination to the department chair, who shall communicate the result of the examination, in writing, to the student.
- **Should the candidate fail either or both parts, they may request a re-examination. The re-examination will follow the same format as outlined above, and must be completed within six months of the first examination.** The candidate will be allowed only one re-examination.
**Ph.D. Comprehensive Examination – Procedures and Timeline**

<table>
<thead>
<tr>
<th>Event Timeframe</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>At least 8 weeks before written part of the exam</td>
<td>Meeting of examination committee takes place to discuss comprehensive exam. The committee will decide two subject areas in which candidate will be examined on, and decide which two committee members will write the two questions that will be given to the student.</td>
</tr>
<tr>
<td>6 weeks before the written part of the exam</td>
<td>Written notice of the two subject areas and dates of the written and oral parts of the exam must be provided to the student, as well as a notification to examination committee members indicating/confirming same. The examination notice to the student must also include the names of the examination committee members.</td>
</tr>
<tr>
<td>At least two weeks before the written part of the exam</td>
<td>The two committee members preparing the written questions will circulate the questions to the exam committee. The chair of the committee will seek feedback from the exam committee and reach consensus on the two questions.</td>
</tr>
<tr>
<td>At least one week before the written part of exam</td>
<td>The Chair of the comprehensive exam committee submits questions to the graduate administrator for preparing in standard format. Student submits research proposal to graduate administrator.</td>
</tr>
<tr>
<td>Day of written part exam</td>
<td>Student to pick up questions from Graduate Program Administrator and return answers within 7 hours. Copies of answers to the 2 questions will be distributed to comprehensive examination committee.</td>
</tr>
<tr>
<td>Day of oral part of exam (one week after the written exam)</td>
<td>In the oral part of the exam, the candidate is free to choose whether to start with Part A (the two questions) or Part B (the research proposal). To initiate the questions for Part A of the examination, the candidate should provide a brief synopsis (maximum of 5 minutes) of his/her answers to the two written questions.</td>
</tr>
</tbody>
</table>

**Ph.D. Comprehensive Examination – Roles and Responsibilities**

**Supervisor:**

- Set up the examination committee & give notification of committee to Graduate Administrator for approval by department chair/graduate chair on attached form **(8 weeks before written exam)**.
- Setup the organizational meeting of the examining committee.
Chair of Examining Committee:

- During the organizational meeting, finalize date and time of written and oral examinations (8 weeks before written exam).
- Check room availability and email all members of the examination committee confirming examination, including date, time and location.
- Provide information to Graduate Program Administrator, including committee members, 2 examiners that will set the written questions, dates of written and oral exams, areas of study of examination questions in the form attached (7 weeks before the written exam).
- Send email reminder to committee at least two weeks before written exam requesting written questions.
- Circulate questions to committee members once received from the examiners.
- Send finalized questions to Graduate Program Administrator (at least one week before the written exam).
- Oral Exam – to be scheduled one week after the written exam.

Examiners Setting the Written Questions:

- Send questions to Chair (at least two weeks before the written exam).
- Be available (by phone if not in person) during the written part of the exam in case the student needs some clarification on the question.

Graduate Program Administrator:

- Get approval of examination committee from department chair/graduate chair.
- Give the timeline/information letter with the subject areas to the student (6 weeks before the written exam).
- One week before the written exam, collect from the student and handout the research proposal to the examination committee.
- Prepare the exam questions once received from the chair in the Department examination format.
- Handout exam questions to the student on the morning (9:00 AM) of the written exam; collect the answers to the written exam questions from student on the afternoon (4:00 PM) of the written exam. Circulate the student’s report and answers to exam questions to the examination committee.
- Prepare the (oral) examination result form and give to the Chair (1 day before the oral exam). Once complete, the result form is submitted to the School of Graduate Studies so that the student’s academic record will show the completion of this milestone.
- Provide the student with a written letter of the result of the Ph.D. Comprehensive Examination. (If the student does not pass, please refer to the process on page 28 of this document titled, “Examination Result”.)

*Return completed form to the Graduate Program Administrator*
Program Start Date of September 01, 2022 or Later
The student is expected to complete all requirements of the comprehensive examination within 20 months of first registration in the Ph.D. program, with an upper limit of 24 months. Special exceptions require the approval of the Department Chair or designate and the Graduate School. Part-time students must complete the comprehensive examination by the end of the 36th month. Normally, course requirements will be completed before the Comprehensive Exam, but this is not a requirement. Likewise, preliminary research results are not required, but the student is expected to present and defend a viable research proposal including anticipated new contributions to the existing scientific literature.

Format of the Examination
The comprehensive examination will consist of two parts, which are outlined below.

Part A: Breadth and Depth of Knowledge
The objective of this part of the exam is to test the student’s comprehension as well as breadth and depth of knowledge of their discipline area, normally at the senior undergraduate/junior graduate level. Although the written exam focuses primarily on the student’s understanding of fundamental concepts in two technical areas related to their research topic, the scope of the oral part of the examination extends to examining the depth of knowledge in the student’s discipline area and possible deficiencies in their academic background. The student is expected to complete Part A within 8 to 14 months of first registration in the PhD program. The examination committee for Part A will comprise of the Student’s PhD Supervisory Committee, with the Supervisor acting as the Chair. The student’s supervisor will be responsible for the administration of this part of the exam. The two committee members will set the two written questions in subject areas related to the student’s research in consultation with the supervisor. The student should be informed of the two subject areas by the supervisor at least six weeks before the written exam. The student will have a total of seven hours to complete the written exam in an open book format. An oral exam will follow one week after the written exam and will normally be held during the student’s first PhD Supervisory Committee meeting. The duration of the oral exam will be 1.5 hours. To initiate the questions for the examination, the candidate should provide a brief synopsis (10 minutes for each question) of his/ her answers to the two written questions. Once the date of Part A is established, the supervisor should complete the PhD Comprehensive Examination (Part A) – Examination Form and send it to the Graduate Administrator.

Part B: Research Proposal
Part B will comprise the submission and defence of the student’s research proposal. The student is expected to complete this part within 20 months of first registration in the Ph.D. program, with an upper limit of 24 months. The candidate shall submit a report on the research program: up to a maximum of 40 pages in length, INCLUDING all figures, graphs, illustrations, tables and appendices (but not including the list of references). The report should be typed double-spaced; 12-point Times New Roman; one inch margins on all sides. IF THE REPORT DOES NOT CONFORM WITH THESE GUIDELINES, IT MAY BE RETURNED TO THE CANDIDATE FOR REVISION AND CAN RESULT IN DELAYING THE EXAMINATION SCHEDULE. The report must include: (i) a critical survey of the directly related literature in the field; (ii) an outline of the proposed research program including its justification, the approach to be taken, specific analytical or experimental methods, perceived or anticipated problems, preliminary results (if available); (iii) an
account of expected contributions the proposed research will bring to the existing scientific literature; and (iv) a proposed timetable to accomplish the task. A copy of the report must be made available to each member of the Examination Committee at least two weeks prior to the date of the oral examination. The duration of the oral examination will be 1.5 hours.

The examination committee for Part B will consist of the PhD Supervisory Committee and an additional member who has a scholarly interest in the candidate’s research specialization. The additional member will serve as the Chair of the examination committee. Once the date of Part A is established, the supervisor should complete the **PhD Comprehensive Examination (Part B) – Approval Form** and send it to the Graduate Administrator.

**Examination Result**

- The candidate’s achievement in each of the parts shall be judged as: Pass or Fail.
- **The candidate must pass both parts to successfully complete the comprehensive exam.**
- The committee chair for each part shall communicate the result of the examination to the graduate administrator using the forms attached.
- **Should the candidate fail either part, they may request a re-examination. The re-examination will follow the same format as outlined above, and must be completed within four months of the first examination.** The candidate will be allowed only one re-examination of each part.
- Once the candidate completes both parts of the examination, the graduate administrator will submit the official result to SGS so that the student’s academic record will be updated, and the Associate Chair (Graduate) will inform the candidate of the result in writing.

Ph.D. DEFENCE AND THESIS SUBMISSION

- The supervisor must go through the Degree Requirement Checklist with the student to ensure they have completed all academic requirements. The completed signed checklist must be submitted to the graduate administrator before initiating the defence.
  - Thesis candidates are required to use plagiarism-checking software, iThenticate, before submitting. Instructions on how to access and use the software will be available via The School of Graduate Studies’ website in Fall 2023.
  - The supervisor must sign off on the originality report of the students thesis after they scan their theses for originality using iThenticate.
- Review defence Ph.D. Defence Flowchart
- Please review the SGS Final Submission – Final Thesis Checklist (Doctoral Degree>Submit)

Convocation

Detailed information regarding convocation, including deadlines and the timing of ceremonies is available on the Office of the Registrar's website: http://registrar.mcmaster.ca/category/grad/. Please review the checklist items.
