COMP ENG 4TL4
Digital Signal Processing

COURSE OUTLINE

Please refer to course website for updated information.

COURSE DESCRIPTION

Classical filter theory, DFT and FFT, FIR and IIR digital filters, effects of finite precision, implementation of DSP systems, adaptive filtering, spectral analysis, signal compression.

Three lectures, one tutorial, one lab every other week

PRE-REQUISITES AND ANTI-REQUISITES

Pre-requisite(s): ELECENG 3TP4 or 3TP3.

SCHEDULE and MODE OF DELIVERY

Lectures:
Monday & Wednesday 8:30 am - 9:20 am, Friday 10:30 am - 11:20 am

Tutorials:
Monday 9:30 am - 10:20 am

Labs:
Lab starts on Sep. 22, every other week at 2:30 pm - 5:20 pm – L01 Monday, L02 Tuesday, L03 Wednesday, L04 Thursday

INSTRUCTOR

Dr. R. Tharmarasa
Email: thamas@mcmaster.ca
Office: ITB-A211
Phone: 905-525-9140 ext. 24171
Office Hours: Mondays 11:00 am - 12:00 pm; and by appointment

TEACHING ASSISTANTS

Names, contact information and office hours are provided on the course website.

COURSE WEBSITE/S

http://avenue.mcmaster.ca

COURSE OBJECTIVES

By the end of this course, students should be able to:

- Learn the fundamentals of processing discrete-time systems
- Perform various processing operations on the signals and systems
- Gain knowledge in implementation of linear shift-invariant discrete-time systems, frequency domain representations, digital filtering and adaptive systems
- Gain an appreciation of the operation of DSP processors.

CEAB GRADUATE ATTRIBUTES (GAS)

Note: The CEAB Graduate Attributes (GAs) defined in this section are measured throughout the course and form part of the Department's continuous improvement process. They are a key component of the accreditation process for the program and will not be taken into consideration in determining a student's actual grade in the course. For more information on accreditation, please ask your instructor or visit: http://www.engineerscanada.ca

Attributes	Indicators		Measurement Method(s)
	Number	Description	
Knowledge Base for Engineering	1.1	Competence in Mathematics	Exam questions
Knowledge Base for Engineering	1.4	Competence in Specialized Engineering Knowledge	Exam questions and Labs
Design	4.3	Develops models/prototypes; tests, evaluates, and iterates as appropriate	Labs
Use of Engineering Tools	5.2	Successfully uses engineering tools	Labs
Professionalism	8.2	Integrates appropriate standards, codes, legal and regulatory factors into decision making	Lab safety quiz and labs

ASSUMED KNOWLEDGE

Linear algebra and calculus, complex variables (EE2CI5, EE2CJ4), frequency domain decompositions (EE3TP4), circuit theory (EE2CI5 and 2CJ4), knowledge of MATLAB, knowledge of C (CoE2SH4).

COURSE MATERIALS

Required Texts:
Alan V. Oppenheim and Ronald W. Schafer, Discrete-Time Signal Processing, 2nd or 3rd ed., Pearson Prentice Hall (ISBN 0131988425)

Calculator:
Only a McMaster standard calculator (Casio FX-991 MS or MS Plus) is permitted.

Other:
Lecture notes and the following reference books:
[1] John G. Proakis and Dimitris G. Manolakis, Digital Signal Processing, Pearson Prentice Hall, 4th ed., 2007 (ISBN 0131873741).
[2] James H. McClellan, Ronald Schafer and Mark Yoder, DSP First, 2nd ed., 2016 (ISBN 0136019250)

COURSE OVERVIEW

Note: all timings are approximate.

Week	Topic	Readings
1 – 2	Introduction, discrete-time signals and systems	Text Chapters 1 and 4
3	Linear time-invariant systems and properties	Text Chapter 2 and lecture notes
4	Frequency domain analysis of discrete-time systems and the DTFT	Text Chapter 2 & 4 and lecture notes
5	The z-transform	Text Chapter 3 and lecture notes
6	The discrete Fourier transform	Text Chapter 8 & 9 and lecture notes
7	Computation of the discrete Fourier transform	Text Chapter 9 and lecture notes
8	Classical filter theory and discrete-time filtering implementations	Text Chapter 5 & 7 and lecture notes
9	FIR filter designs	Text Chapter 6 & 7 and lecture notes
10	IIR filter designs	Text Chapter 6 & 7 and lecture notes
11-12	Random Signal Analysis	Text Chapter 10 and Lecture notes

A more detailed timeline is available on the course website.
At certain points in the course, it may make good sense to modify the schedule. The instructor may modify elements of the course and will notify students accordingly (in class, on the course website).

LABORATORY OVERVIEW

Labs are NOT held during the first week of term.

Lab	Topic
1	Introduction to Digital Signals using MATLAB
2	Resampling, Reconstruction and Convolution
3	Discrete Time Fourier Analysis and Filtering
4	Discrete Fourier Transform (DFT) and an Application
5	FIR and IIR Filter Design and Analysis

LABORATORY OPERATION

- Each student in the course is required to pass the lab safety quiz prior to attempting any of the laboratories. The quiz will be available on Avenue to Learn.
- Access to all labs is restricted in the interest of security and safety. Information on accessing and using the lab can be found on the webpage: https://www.eng.mcmaster.ca/ece/labs-and-health-safety/#tab-content-labs-access-and-use
- Lab Experiments: The labs for this course will be using MATLAB and TMS 320 DSP processor. The first lab will be performed individually, and the other four labs will be performed in groups of two students.
- Lab Requirements: Students need to submit their MATLAB source code and the lab reports on Avenue to Learn on the due date described in the lab manual.

ASSESSMENT

Component	Weight
Labs (5)	25%
Max(Quizzes, Final Exam)	10%
Max(Mid-term Test (1), Final Exam)	30%
Final Exam (1)	35%
Total	100%

Grading and Evaluation Policies

- There will be one midterm test (mid-October to early November). No make-up midterm tests will be granted. The weight of the midterm test will be transferred to the final exam. The weight of any missed labs will **not** be transferred to the final exam.
- The final exam must be written else a final grade of F will be awarded regardless of the student's course aggregate achieved without the final exam. **Furthermore, to pass the course a student must obtain at least 30% marks on the final examination.**

ACADEMIC INTEGRITY

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. It is your responsibility to understand what constitutes academic dishonesty. Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the Academic Integrity Policy, located at https://secretariat.mcmaster.ca/university-policies-proceduresguidelines/
The following illustrates only three forms of academic dishonesty:
• plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
• improper collaboration in group work.
• copying or using unauthorized aids in tests and examinations.

AUTHENTICITY / PLAGIARISM DETECTION

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.
Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

COURSES WITH AN ON-LINE ELEMENT

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

COPYRIGHT AND RECORDING

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, including lectures by University instructors.
The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the Code of Student Rights & Responsibilities (the “Code”). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, whether in person or online. It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students’ access to these platforms.

ACADEMIC ACCOMMODATIONS

Students with disabilities who require academic accommodation must contact Student Accessibility Services (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's Academic Accommodation of Students with Disabilities policy.

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the RISO policy. Students should submit their request to their Faculty Office normally within 10 working days of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations.

Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

REQUESTS FOR RELIEF FOR MISSED ACADEMIC WORK

McMaster Student Absence Form (MSAF): In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar "Requests for Relief for Missed Academic Term Work".

EXTREME CIRCUMSTANCES

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.

Electrical and Computer Engineering Lab Safety

Information for Laboratory Safety and Important Contacts

This document provides important information for the healthy and safe operation of ECE instructional laboratories. This document is required reading for all laboratory supervisors, instructors, researchers, staff, and students working in or managing instructional laboratories in

ECE. It is expected that revisions and updates to this document will be done continually. A McMaster University lab manual is also available to read in every laboratory and online https://hr.mcmaster.ca/app/uploads/2019/07/2019-McMaster-Lab-Manual.pdf

General Health and Safety Principles

Good laboratory practice requires that every laboratory worker and supervisor observe the following whether conducting lab work at school or at home:

1. Food and beverages are not permitted in the instructional laboratories.
2. A Laboratory Information Sheet on each lab door identifying potential hazards and emergency contact names should be known.
3. Laboratory equipment should only be used for its designed purpose.
4. Proper and safe use of lab equipment should be known before using it.
5. The course TA leading the lab should be informed of any unsafe condition.
6. The location and correct use of all available safety equipment should be known.
7. Potential hazards and appropriate safety precautions should be determined, and sufficiency of existing safety equipment should be confirmed before beginning new operations.
8. Proper waste disposal procedures should be followed.
9. Personal ergonomics should be practiced when conducting lab work. https://bit.ly/3fOE71E
10. Current University health and safety issues, and protocol should be known. https://hr.mcmaster.ca/resources/covid19/workplace-health-and-safety-guidance-during-covid-19/

Location of Safety Equipment

Fire Extinguisher
On walls in halls outside of labs

First Aid Kit
Main Lobby of ITB or
dial “88” after 4:30 p.m.

Telephone
On the wall of every lab near the door

Fire Alarm Pulls
Near all building exit doors on all floors

Who to Contact

Emergency Medical / Security: On McMaster University campus, call Security at extension **88** or **905-522-4135** from a cell phone.
Non-Emergency Accident or Incident: Immediately inform the TA on duty or Course Instructor.
University Security (Enquiries / Non-Emergency): Dial 24281 on a McMaster phone or dial 905-525-9140 ext. 24281 from a cell phone.
See TA or Instructor: For problems with heat, ventilation, fire extinguishers, or immediate repairs
Environmental & Occupational Health Support Services (EOHSS): For health and safety questions dial 24352 on a McMaster phone or dial 905-525-9140 ext. 24352 from a cell phone.
ECE Specific Instructional Laboratory Concerns: For non-emergency questions specific to the ECE laboratories, please contact 24103.

In Case of a Fire (On Campus Dial 88)

When calling to report a fire, give name, exact location, and building.

1. Immediately vacate the building via the nearest Exit Route. Do not use elevators!
2. Everyone is responsible for knowing the location of the nearest fire extinguisher, the fire alarm, and the nearest fire escape.
3. The safety of all people in the vicinity of a fire is of foremost importance. But do not endanger yourself!
4. In the event of a fire in your work area shout "*Fire!*" and pull the nearest fire alarm.
5. Do not attempt to extinguish a fire unless you are confident it can be done in a prompt and safe manner utilizing a hand-held fire extinguisher. Use the appropriate fire extinguisher for the specific type of fire. Most labs are equipped with Class A, B, and C extinguishers. Do not attempt to extinguish Class D fires which involve combustible metals such as magnesium, titanium, sodium, potassium, zirconium, lithium, and any other finely divided metals which are oxidizable. Use a fire sand bucket for Class D fires.
6. Do not attempt to fight a major fire on your own.
7. If possible, make sure the room is evacuated; close but do not lock the door and safely exit the building.

Clothing on Fire

Do not use a fire extinguisher on people

1. Douse with water from safety shower immediately or
2. Roll on floor and scream for help or
3. Wrap with fire blanket to smother flame (a coat or other nonflammable fiber may be used if blanket is unavailable). Do not wrap a standing person; rather, lay the victim down to extinguish the fire. The blanket should be removed once the fire is out to disperse the heat.

Equipment Failure or Hazard

Failure of equipment may be indicative of a safety hazard - You must report all incidents.
Should you observe excessive heat, excessive noise, damage, and/or abnormal behaviour of the lab equipment:

1. Immediately discontinue use of the equipment.
2. In power labs, press wall-mounted emergency shut-off button.
3. Inform your TA of the problem.
4. Wait for further instructions from your TA.
5. TA must file an incident report.

Protocol For Safe Laboratory Practice

In general, leave equipment in a safe state when you finish with it. When in doubt, consult the course TA.

Defined Roles

TA	The first point of contact for lab supervision	
ECE Lab Supervisor	Steve Spencer- ITB 147	steve@mail.ece.mcmaster.ca
ECE Chair	Shahram Shirani- ITB A111	shirani@mcmaster.ca
ECE Administrator	Shelby Gaudrault- ITB A111/B	gaudraus@mcmaster.ca
ECE Course Instructor	Please contact your specific course instructor directly
