Computer Engineering is the field that studies the science and technology of design, implementation and validation of both hardware and software components of computing systems. The programming component of computer engineering is focused on digital devices and their interfaces with other devices and users. Computer engineering including the design and development of embedded systems play central roles today and into the future. These systems are encountered in everyday systems that we use: cell phones, digital audio players, X-ray systems, cars, and many others.

**Potential Employers**
- AMD
- BMO Financial Group
- Ericsson Inc.
- Evertz
- GeoTab Inc.
- IBM Canada
- Magna Inc.
- Red Hat
- Synopsys
- The Six Semiconductor

**Potential Careers**
- 5G Software Developer Co-op
- ASIC Design & Verification Co-op
- Digital Design Intern
- GPU Graphics Driver Test Engineer
- Hardware Security Test Engineer
- Open Source Software Engineer
- Program Management Intern
- Silicone Design Engineer
- Software Quality Engineering Intern

**Average Salary**
All work term opportunities must be compensated by your employer. Compensation for work terms varies widely depending on your employer, industry of employment, program of study, year of study, and prior work experience.

In 2022/2023, the average hourly wage for undergraduate co-op students was **$23.00 per hour**. The wage range for students was between $16.00 to $60.00 per hour.

**How Do Employers Get Involved On Campus?**
- Engineering Networking Nights
- Hosting Career Development Workshops
- Involving in organizing capstone projects, hackathons, or research projects
- McMaster Career Fair
- Posting positions on Oscarplus (Job Board)

ENGINEERING CO-OP & CAREER SERVICES

Engineering Co-op & Career Services (ECCS) connects students with employers, offers career development tools and resources, and provides opportunities for students to gain employment experience.

We understand that every student is different; your career journey is shaped by the many experiences you have. Engineering Co-op & Career Services is here to prepare you for your future. Our approach allows you to have the flexibility to make your own decisions and choices, with the support of our team and subject-matter experts. We are here to guide, support, coach and offer expertise, resources and options.

Our program is optional, flexible and accessible for all.

- Co-op is available in all degree options.
- A minimum of 12 months of relevant work experience is required to receive the co-op designation on your degree.
- For maximum flexibility, options include:
  - 4-month summer work-terms.
  - 8-month to 16-month continuous a-terms

Career Support & Skill Development

From career support to skill development, ECCS offers a wide range of services available to all students registered in the Faculty of Engineering. We believe in integrating our services and taking an educative approach to ensure our students get the best out of our services:

- Employment Preparation and Career Readiness
- Career Educators for each program
- 1:1 appointments and job search support
- Professional & career development workshops
- On-the-job check-ins and work term reflections
- Emphasis on the lifelong process, skill development, and professional growth

Companies

Faculty of Engineering co-op students undertake work terms with leading companies across the globe, including:

- Aecon Group Inc.
- ArcelorMittal Dofasco
- BlackBerry
- Celestica
- Chrysler
- CIBC
- Corporation Maple Leaf Foods
- Ontario Power
- Ford Canada
- GE Canada
- General Motors
- Generation
- John Deere
- Rockwell Automation
- Stackpole International
- Stem Cell Technologies

Statistics

- McMaster Engineering is the second largest co-op program in Ontario, Canada.
- In 2022/2023, over 2500 undergraduate and graduate students completed over 4000 co-op work terms across the globe.
