Introduction

The Instructor's Guide describes part of MEASURE (McMaster Engineering Accreditation System for UndeRgraduatE).

MEASURE's purpose is to:

- Facilitate the continual improvement of the curriculum of the programs offered by the Faculty of Engineering
- Assist with generating accreditation reports for the Canadian Engineering Accreditation Board (CEAB)

MEASURE is built using corporate performance management software, (Vena) that combines Excel spreadsheets, a central database, and workflow management.

This document outlines the MEASURE tasks that take place at the instructor level.

Specifically, each instructor will update the Rubric Input Template for each section of every course taught.

Additional information on MEASURE can be found in the Administrator's Guide and in the Department Contributor's Guide. The latest version of all these documents, along with other resources, are available at <http://measure.mcmaster.ca>

Issue Reporting: <https://www.eng.mcmaster.ca/forms/measure-issue-tracking>

Technical Support: measure@mcmaster.ca

About the Vena Contributor Connector

The Contributor Connector is a special version of the Vena Add-In that is designed for Office for Mac and Office Online.

Similar to the Windows Add-In, the Contributor Connector enables users to perform various Vena functions in Excel, such as saving data inputs to the Vena database, choosing among data sets, drilling on intersection data, and working with Line Item Details.

Installing Vena for Mac Users

1. Open **Microsoft Excel for Mac**
2. Select the **Insert** tab

3. Select **Get Add-ins**

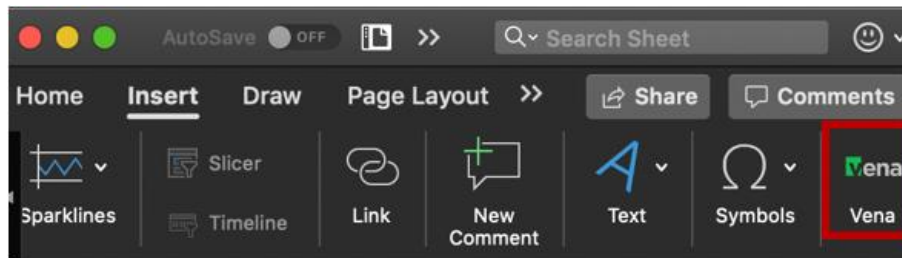

4. Search for “Vena Connector”

5. Press **Add**

- After successfully adding the Vena Connector, the Vena add-in icon will be displayed under the Insert tab.

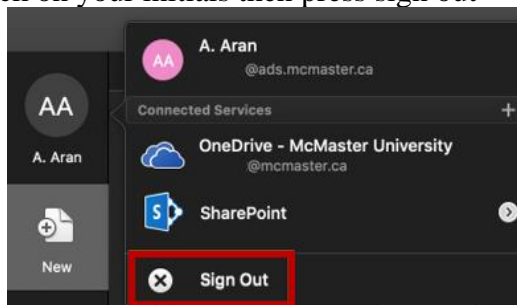

If Microsoft Office is preventing the installation of the add-in (i.e. Office has been configured to not allow individual add-ins), it is because the user is signed in as a domain user (ads.mcmaster.ca).

Signing in as a domain user will prevent users from adding certain Excel Add-ins because UTS controls what add-ins are allowed. Users will need to sign out to install the Vena add-in.

Steps to signing out:

- Open **Excel for Mac**
- Click on your initials then press sign out

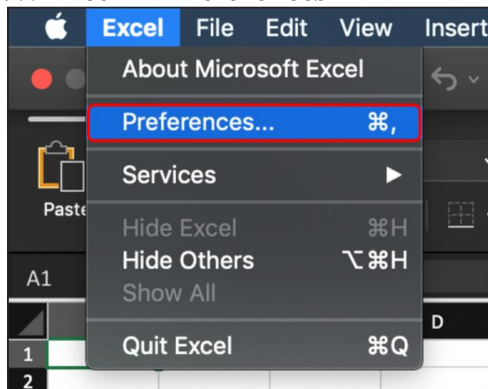

- Confirm **sign out**

Enabling Trust Access to the VBA Project Object Model

After successfully installing the Contributor Connector, access to the VBA project object model will need to be trusted for Vena to run properly.

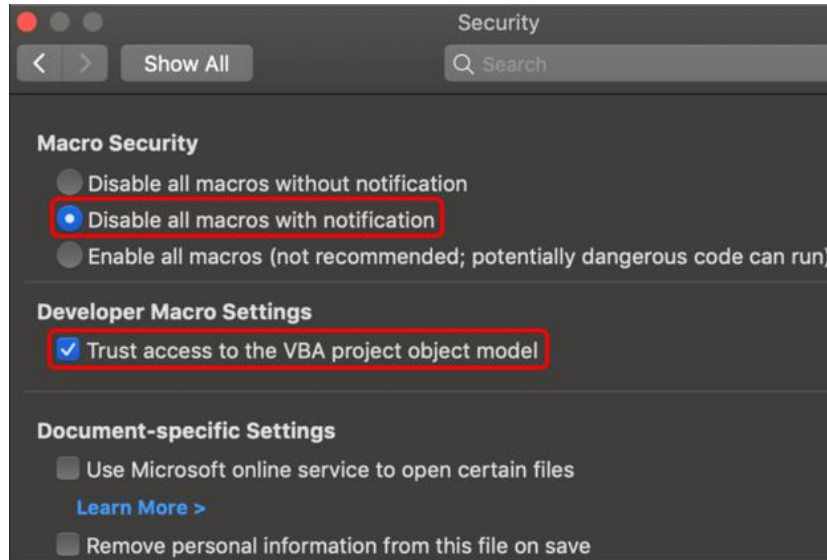

1. Open **Excel**
2. Select a **Blank Workbook**
3. Select **Excel → Preferences**

4. Under Sharing and Privacy, select **Security**

5. Ensure that **Disable all macros with notification** is selected
6. Check the box next to **Trust access to the VBA project object model**

7. Close all instances of Excel for the settings to take effect.

Other Operating Systems

Vena is currently compatible for Windows and macOS users with Microsoft Office. Users who do not have a compatible operating system and/or Microsoft Office will need to access Vena using a virtual machine.

Instructions to Access a Virtual Machine:

<https://www.eng.mcmaster.ca/sites/default/files/vminstruct.pdf>

Questions/Comments/Technical Support:

measure@mcmaster.ca

Annual Timeline

The table below summarizes the typical tasks performed during the course of an academic year. Instructor responsibilities are highlighted in **green**.

Date	Task Description	Section	Template	Task Owner
January	<ul style="list-style-type: none"> Instructor enters rubric and continuous improvement plan for Term 1 	Windows macOS	Rubric Input Template	Instructor
January	<ul style="list-style-type: none"> Instructor reviews the continuous improvement plan from the previous year for Term 1 	Click here	Rubric Input Template and Curriculum Committee Recommendations Report (Prev. Year)	Instructor
January	<ul style="list-style-type: none"> Review current rubric entry status Contact users who have yet to complete their Vena rubric entry 	Department Guide	See Department Guide	Department

Accessing Vena

1. Open a web browser
2. Visit <https://vena.io>
3. In the email textbox, enter your McMaster email address (i.e. macid@mcmaster.ca)
4. Your password has been previously communicated. If you do not remember, or do not have an account, please contact Measure Support (measure@mcmaster.ca)

The login form features the Vena logo at the top. Below it are two input fields: 'Enter email' and 'Enter password'. At the bottom is an orange 'Log In' button.

Changing Vena Password

Your password can be changed by clicking the user's name in the upper right corner of the screen and then selecting "Change Password".

You will be prompted to enter the current and new password.

The screenshot shows the Vena application interface. The top navigation bar includes 'Vena', 'Manager', 'Tasks', 'Modeler', 'Reports', 'Admin', and links for 'Do More With Vena', 'Help', and user profile. The left sidebar lists 'Profile / Password', 'Personal Details', 'Password', 'Two-Factor Authentication', 'Get Vena Desktop', 'ETL Tool', 'Microsoft Account', and 'Grant Login Access'. The main content area is titled 'Change your password below.' and contains three input fields: 'Current Password', 'New Password' (with a 'Generate Password' link), and 'Confirm New Password'. A 'Show Password' checkbox and a 'Change Password' button are at the bottom left. On the right, 'Password Rules' are listed:

- Between 8 and 16 characters
- Must contain 3 of the following:
 - At least 1 uppercase character
 - At least 1 lowercase character
 - At least 1 number
 - At least 1 special character (e.g. !@#\$%^&*)
- No more than 3 of any repeated character in a row (e.g. eeee)
- No more than 3 sequential numbers (e.g. 12345)
- No more than 4 characters of a QWERTY sequence (e.g. asdf)

 A yellow box at the bottom right states: 'Cannot use any of your previous 5 passwords. Cannot be similar to your first name, last name, login.'

Instructor Input

For each course being measured, the continuous improvement plan and rubric data will need to be entered and saved. They will need to be entered in a single spreadsheet called the Rubric Input Template.

When the data entry for the Rubric Input Template is complete, you are done. Although the Vena interface shows a Submit button, the button is disabled.

*****You do not need to worry about using the Submit button*****

Vena Checklist

Prior to entering/reviewing rubric data with Vena, please ensure the following tasks are complete:

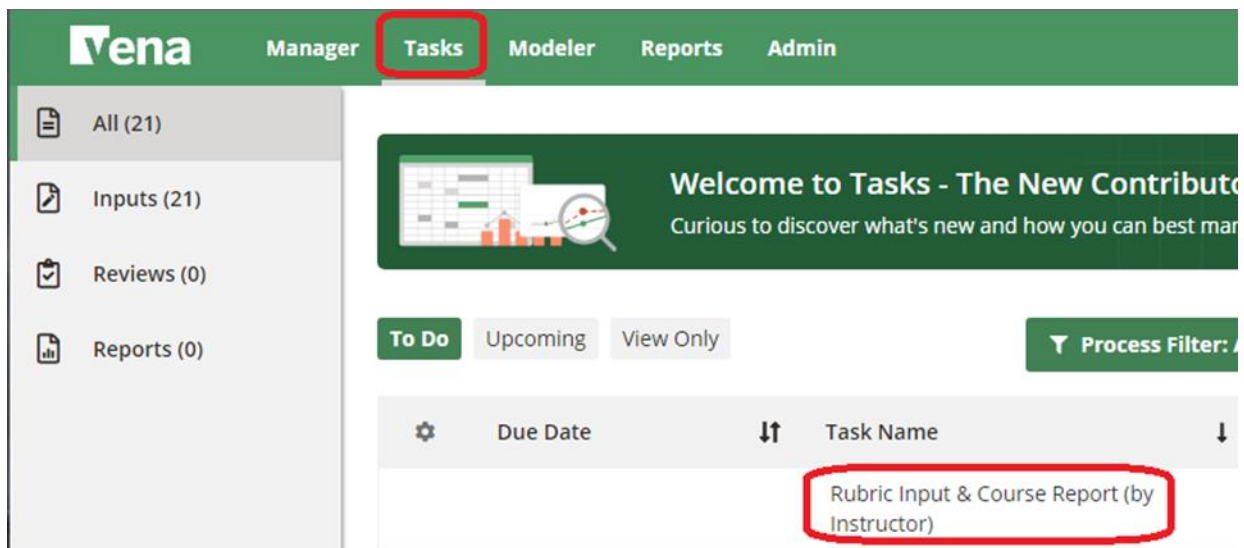

Task	Windows	macOS
The device meets the system requirements	Click here	
Microsoft Excel 2010 or later is installed	Click here	
Vena Add-In is installed	Click here	Click here
Enabling Trust Access to Vena	Click here	Click here

macOS Guide

This section of the guide is intended for macOS users.

Accessing Rubric Input Template

- Under Contributor view, select on Task **Rubric Input & Course Report (by Instructor)** - New

2. Select **Check Out** beside the **Rubric Input Template – macOS.xlsm**

3. Press **Download Form**.

4. A new section will display to select the Course, Year, and Section
 - a. **Program:** Select the course for data entry. Pressing the dropdown will let users see the list of available courses. However, typing the course name in the textbox will help find it quicker.
 - b. **Year:** Press the dropdown button to select the corresponding year and term.
 - c. **Section:** The default section is Section 1 (unless otherwise stated).

5. A pop-up will appear to open the template. Click **Open**.

6. **Open** the Excel File
 - d. If prompted, press **Enable Macros**

7. Click **Allow and Continue** on the right-hand side to allow the Vena Connector Add-in to access contents.

Updating Rubric Input Template

If an instructor has rubric information from the previous year, the same rubric information will be prepopulated as a starting point for the current year.

If this is the first time a course is being measured, the user may need to insert new learning outcomes (rows) to enter the rubric data.

Tip: Users can enter/update data where cells are highlighted in yellow.

1. **Instructor Name**
 - a. Enter the instructor's name for the course

2. Rubric Entry Status

- a. Select a status from the dropdown menu
 - i. Not Started – User has not entered rubric data
 - ii. WIP – User has entered rubric data, but not complete
 - iii. Fully Complete – User has completed entering rubric data

Course:	TEST 101 (Test Course for Training 1)
Term:	2018-2019 Term 1
Section:	Section 1
Instructor Name:	John Smith
Rubric Entry Status:	Fully Complete
Last User	Admin User

3. Updated By:

- a. Enter your name

4. Summary of Actions to be Taken for Continuous Improvement for Next Academic Year

- a. Instructors can enter their continuous improvement plan(s) under the section “Summary of Actions to be Taken for Continuous Improvement for Next Academic Year”

Summary of Actions to be Taken for Continuous Improvement for Next Academic Year					
Measurement Analysis at the indicator / topic level:	Changes in Course content (if applicable):	Changes in Course delivery (if applicable):	Changes in Pre-requisite (if applicable):	Changes in assessment method or rubrics (if applicable):	Suggestions to improve the assesment process:

- b. To attach a file:
 - i. Select a cell
 - ii. Under Vena Comments, click **Add New**
 - iii. Below the comments, click **Attach**
 - iv. Select your file and click **Open**
 - v. The new file will be displayed as an attachment in the comments section
 - vi. Press the back arrow button 
 - vii. Click **Save** to save the changes
 - viii. When re-opening the template, the cell containing the attachment will now be highlighted in blue for visibility

5. Indicators/Learning Outcomes

Indicators - descriptors of what students must achieve to be considered competent in the corresponding attribute

Learning Outcomes – descriptors of what the instructor expects the student to learn to be considered competent in the corresponding indicator

*** Every indicator must have at least (1) learning outcome (row) inserted ***

a. Adding Topics (rows)

- i. Select an **Indicator** (grey cell)
- ii. Click the **+** button under the Line Item Details section
 1. A new row will be inserted below the selected indicator
- iii. **Enter** the Learning Outcome in the newly inserted row

b. Deleting Topics (rows)

- i. Select the **Learning Outcome** you wish to remove
- ii. Click  button under the Line Item Details section
 1. The selected Learning Outcome row will be removed

c. Missing Indicators

- i. If an indicator is missing or is not required, please contact your department representative or [MEASURE Support](#) to update the Measure Indicators Template

6. Measurement Date

- a. Enter the current date in YYYY-MM-DD format (e.g. 2019-12-31, etc.)

7. Expectations

Description: Describes a given expectation that applies to a learning outcome

Number: The numbers in this column should be the number of students that apply to the given category, not the percentage of the class in that category

- a. **Enter** a description and number for each expectation

8. Used (1/0)

The “Used (1/0)” column is updated to determine if the row will be part of the calculation for the Summary and Detailed View charts.

If users wish to record the rubric data and include it as part of the calculation for the Summary and Detailed View charts, set the value to 1.

If users wish to record the rubric data, but not include it as part of the calculation for the Summary and Detailed View charts, set the value to 0.

If unsure, always set the value to 1.

9. Measurement Category

The Measurement Category has a dropdown menu with a list of possible values pertaining to the learning outcome (i.e. Assignment, Lab, Exam, etc.)

- a. **Select** a category from the dropdown box for each row.

10. Attaching Sample Files

Reminder: For privacy and security reasons, remove any information that may identify a student

To attach a file:

- i. Select a cell
- ii. Under Vena Comments, click **Add New**
- iii. Below the comments, click **Attach**
- iv. Select your file and click **Open**
- v. The new file will be displayed as an attachment in the comments section
- vi. Press the back arrow button 
- vii. Click **Save** to save the changes
- viii. When re-opening the template, the cell containing the attachment will now be highlighted in blue for visibility

11. Reviewing the Number Values

After entering the student count for each expectation, ensure the sum of the line item's equal the Indicator's total

Indicator / Learning Outcome	Measurement Date format: Today= 2021-08-17	Description	Below Expectations
1.1 (Competence in Mathematics)			
5.1 (Evaluates and selects appropriate modern tools)			50
T1 S1 L1 - Use of Azure	2021-05-06	BE T1 S1 L1 - Use of Azure	20
T1 S1 L2 - Use of Cisco Packet Tracer	2021-05-06	BE T1 S1 L2 - Use of Cisco Packet Tracer	30
5.2 (Demonstrates an ability to use modern/state of the art tools)			13
T1 S1 L1 - Troubleshoot Hardware	2021-05-06	BE T1 S1 L1 - Troubleshoot Hardware	12
T1 S1 L2 - Troubleshoot Software	2021-05-06	BE T1 S1 L2 - Troubleshoot Software	1

12. Saving Data

- a. Click the  button
- b. If successful,  will temporarily appear over the save button

13. Closing and Checking in the Template

After saving the changes and closing the Excel template, you will need to go back to the web browser and check the file back in.

- Open** your web browser
- Visit **Vena** (<https://vena.io>)
- Under Contributor view, click on **Task Rubric Input & Course Report (by Instructor) - New**
- Press the **Check-In** button next to the template currently checked out

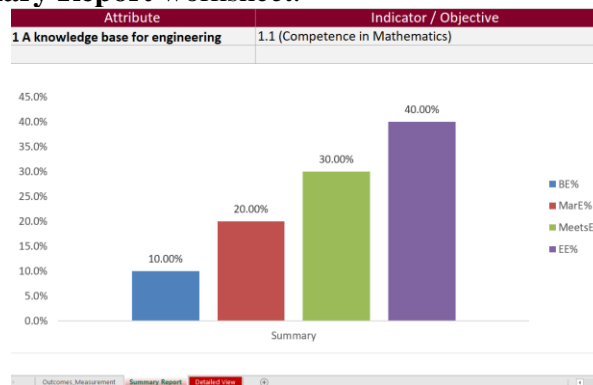

Viewing Summary Chart

The Summary Chart is a graphical summary of every Indicator containing rubric data. The chart may contain up to four bars where each bar represents an Expectation.

After entering/updating rubric data:

- Click the  **Save** button
- On the template,  **RefreshCharts** button
- Select the **Summary Report** worksheet.

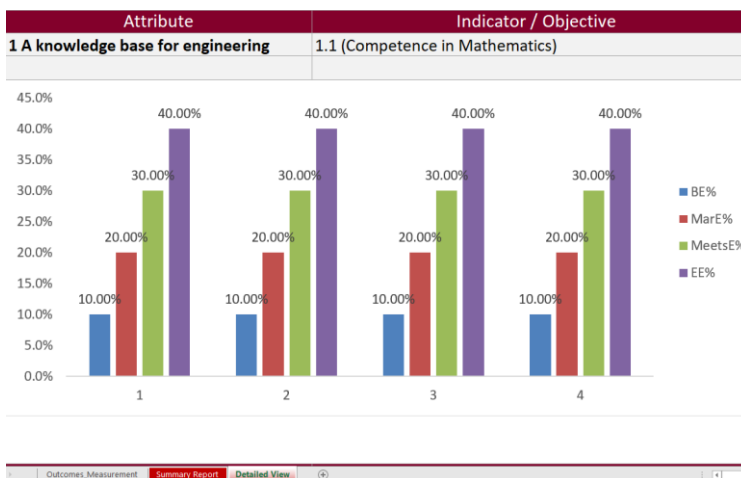

Tip: If the charts do not reflect the data, click Vena's Save button, close and check-in the template, then check-out and download the template.

Viewing Detailed Chart

The Detailed Chart is a graphical summary of every Learning Outcome containing rubric course data. Every learning outcome may contain up to four bars where each bar represents an Expectation.

- Click the  **Save** button
- On the template, press the  **RefreshCharts** button
- Select the **Detailed View** worksheet.

Tip: If the charts do not reflect the data, click Vena's Save button, close and check-in the template, then check-out and download the template.

Reports

Throughout the year, instructors can look at the reports generated by MEASURE. These reports can help fill out the CEAB questionnaire during the accreditation years.

Most of the report types are described in the Departmental Guide. However, the reports that are of particular interest to instructors are described here.

The Vena Reports are best viewed using a Windows-based operating system.

In particular, instructors will want to view:

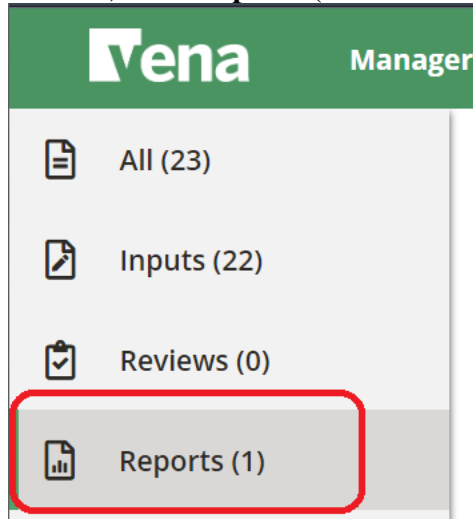

- CEAB Attribute Report
- Faculty and Curriculum Committee Recommendation's Report
- Historical Course Measurement Report
- Historical Program Measurement Report
- Measurement Map Report

Accessing the Reports

1. Ensure the Contributor tab is selected

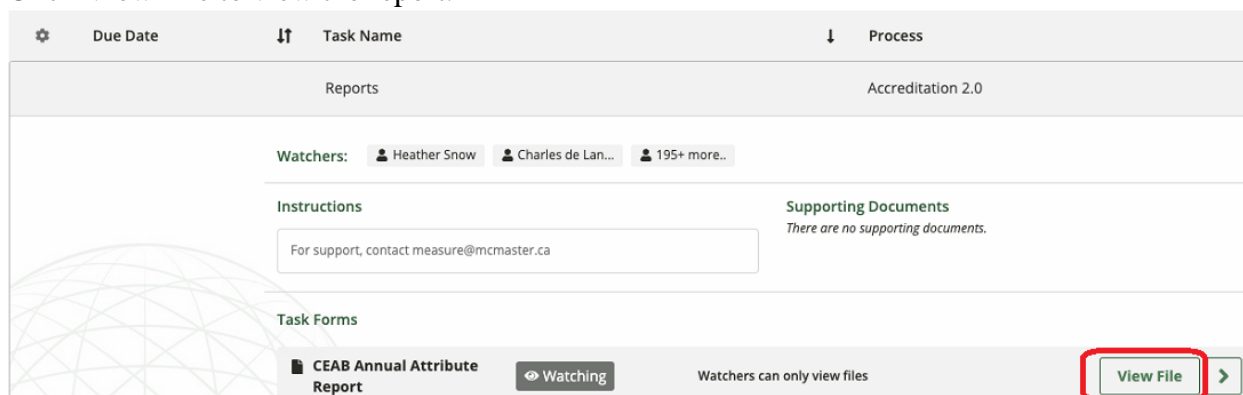

2. On the left side, click **Reports** (the centre section will reload to only display Reports)

3. Click **Reports**

4. Click View File to view the report.

- Click either **Download Form** or **PDF**, select the appropriate program and year, and then click **Confirm**.

CEAB Annual Attribute Report

This multi-page report provides a detailed snapshot of how the program is progressing for the current year. It includes an overall program summary and a separate report for each Graduate Attribute at the course level.

The report is built off a calculated average with a set order of operations, rather than directly based on the average of total students per outcome. At each level, the total is aggregated. For example, at the Section level, all sections are aggregated together, and from there, all terms are aggregated together to get a Yearly Average for all Sections per Course.

The order of operations for the calculation is:

1. LID's (Learning Outcome)
2. Indicator
3. Attribute
4. Section
5. Year
6. Program

Viewing the Annual Attribute Report

1. Select **View File** next to **CEAB Annual Attribute Report.xlsxm**
2. **Save** and **open** the Excel file
 - a. If prompted, **Enable Content** and **Enable Macros**
3. Select the **Program** and press **OK**

CEAB 6.WORK Attribute Report

Course	Expectations				AVG Score
	Below Expectations	Marginal Expectations	Meets Expectations	Exceeds Expectations	
SFWR ENG 4G06 A/B (Software Design IV - Capstone Design Project)	0.58%	3.21%	10.98%	85.23%	3.81
SFWR ENG 2DA4 (Digital Systems and Interfacing)	7.14%	3.57%	17.86%	71.43%	3.54
SFWR ENG 3XA3 (Software Engineering Practice and Experience: Software Project Management)	4.20%	1.40%	11.20%	83.21%	3.73
SFWR ENG 3A04 (Software Design III - Large System Design)	0.00%	3.76%	81.95%	14.29%	3.11
SFWR ENG 2XB3 (Software Engineering Practice and Experience: Binding Theory to Practice)	2.17%	8.66%	33.07%	56.10%	3.43

Program Summary | 1. KNOWLEDGE | 2. ANALYSIS | 3. INVESTIGATION | 4. DESIGN | 5. TOOLS | **6. WORK** | 7. COMMUNICATIONS | 8. PROFESSIONISM | 9. IMPACT | 10. ETHICS | 11. ECONOMICS | 12. LEARNING

CEAB YoY (Year over Year) Attribute Report

This report provides a look into the Average Score per Attribute, at a Program level, comparing it year over year. The Choose option that pops up allows you to choose the ending year that you'd like to view.

Prior to 2020-2021, the previous average scores were calculated based on the archived data of the # of students in each attribute/outcome. Starting in 2020-2021, the calculation is calculated on the new average process, as detailed in the CEAB Attribute Report section above.

The data for the current year, or most recent year is not automatically calculated. This YoY report uses archived data as it's source. As a result, the archiving process must be executed to see the current year data. Note that this means the entire process must be completed, and the data from step 7a of the Vena Template Automation Average ETL must be executed. This is imperative to the process.

Please refer to the One Time Fix – ETL section of the CEAB Attribute Report.

Viewing the YoY Attribute Report

1. Select **View File** next to **CEAB YoY Attribute Report.xlsm**
2. **Save** and **open** the Excel file
 - a. If prompted, **Enable Content** and **Enable Macros**
3. Select the **Program**, latest **Year**, and press **OK**

Faculty and Curriculum Committee Recommendation Report

Displays the recommendations from the curriculum committee at both course and program level. This report can be viewed for any year where data is available. The data comes from the feedback provided in the Curriculum Committee Recommendations Input Template and as described in the Departmental Guide.

1. Press **View File** next to Faculty and Curriculum Committee Recommendations Report
2. Select a Course/Program and Year
3. **Download** and remember the saved location of the report

To view an attached file:

- a. Select a cell containing an attachment

Cascade

*** Vena Feature currently available to Windows Users only ***

The cascade feature enables users to generate the same Vena report for multiple courses or programs. This feature eliminates the need to manually generate the same report for multiple courses.

Generating a Mass Course Report

The steps below will show how to create

1. Select Contributor → Reports → Course Reports → **View**
2. Download and open the Course Report
 - a. Click **Enable Editing** and **Edit Content** if the pop-up appears
3. Select a Course (belonging to the program), Year, Term, Section
4. Select the Vena Tab then click **Cascade**

5. For dimension, select **Program**

Vena - Cascade

Select a dimension to cascade:

6. Select the courses belonging to the program (hold shift + click)

Test Engineering	
TEST 101	Test Course for Training 1
TEST 102	Test Course for Training 2
TEST 103	Test Course for Training 3
TEST 104	Test Course for Training 4
TEST 105	Test Course for Training 5
TEST 106	Test Course for Training 6
TEST 107	Test Course for Training 7
TEST 108	Test Course for Training 8
TEST 109	Test Course for Training 9
TEST 110	Test Course for Training 10

- Change option from Cascade to Sheet to **Cascade to File**

- Choose a location to save the files
- Click **OK**
- The Cascade feature will take approximately 5-10 minutes to complete

Appendix I: Report Overview

Report Overview	
Report	Description
Attribute Map Report	Displays all the courses for a program and the highest measure level for each Graduate Attribute
Attribute Map Summary Report	Similar to the Attribute Map Report, instead of displaying the level (A, D, I), the summary report displays an “X” to indicate that the course is measured for a specific attribute
CEAB Annual Attribute Report	This report includes an overall program summary and a separate report for each Graduate Attribute at the course level
CEAB YoY (Year over Year) Attribute Report	This report provides a look into the Average Score per Attribute, at a Program level, comparing it year over year
Course Report	Displays the rubric data entered from the Rubric Input Template in a bar chart. Also contains (if any) continuous improvement plans
Curriculum Committee Recommendations Report	Displays the committee recommendations for the program and its courses
Historical Course Measurement Report	Displays the course's year to year trend of the measured expectations
Historical Program Measurement Report	Displays the program's year to year trend of the measured expectations
Indicator Map Report	Displays all the Graduate Attribute Indicators and the lowest measure level for each course
Measurement Map Report	Assigns an “M” for each course measured for the year
Rubric Entry Report	Displays the rubric entry status, indicates if a course is measured, the instructor's name, the last user to save rubric data, and when it was last saved

Appendix II: Previous Modification Log

Version	Modification date	Author	Comments
1.0	July 5, 2016	Evan Situ	
1.1	August 28, 2016	Evan Situ	Split the instructor document added section 3.1 and 1.4
1.2	November 21, 2016	Evan Situ	Removed Other Resource
1.3	December 20, 2016	Michelle Zheng	Updated sections 2-6
1.4	January 2, 2017	Spencer Smith	Updated timeline, instructor input, reports, submit button
1.5	January 9, 2017	Spencer Smith	Addition of password change instructions
1.6	January 19, 2017	Spencer Smith	Removal of request to use the Submit button
1.7	January 31, 2017	Spencer Smith	Explicit statement that each indicator has to have at least one learning outcome
1.8	April 19, 2017	Spencer Smith	Explanation of columns in the Rubric Input template
