### Corequisite(s)
None

### Antirequisite(s)
None

### Course Specific Policies
- **Missed Work:** Make up of missed work will only be allowed if the work is covered by MSAF.
- **Lab Attendance:** Laboratory attendance is compulsory. A mark of zero will be allocated for missed laboratory experiments. Students shall only attend labs during the time assigned to their lab sections.

### Departmental Policies
- Students must maintain a GPA of 3.5/12 to continue in the program.
- In order to achieve the required learning objectives, on average, B.Tech. students can expect to do at least 3 hours of “out-of-class” work for every scheduled hour in class. “Out-of-class” work includes reading, research, assignments and preparation for tests and examinations.
- Where group work is indicated in the course outline, such collaborative work is mandatory.
- The use of cell phones, iPods, laptops and other personal electronic devices are prohibited from the classroom during the class time, unless the instructor makes an explicit exception.
- Announcements made in class or placed on Avenue are considered to have been communicated to all students including those individuals that are not in class.
- Instructor has the right to submit work to software to identify plagiarism.

### 3. SUB TOPIC(S)

<table>
<thead>
<tr>
<th>Week</th>
<th>Subtopic</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Introduction</td>
<td>Classical industrial automation systems, Industry 4.0 concepts: Internet of Things and Industrial Internet of Things, Cyber Physical Systems.</td>
</tr>
<tr>
<td>2</td>
<td>Industrial Systems Integration Technologies</td>
<td>Introduction to industrial systems technologies Web technologies DDE, COM CORBA Web Services</td>
</tr>
<tr>
<td>3</td>
<td>Industrial Systems Integration Technologies</td>
<td>Ethernet and TCP/IP Role of Ethernet in Industry 4.0 industrial integration</td>
</tr>
<tr>
<td>4</td>
<td>Industrial Systems Integration Technologies</td>
<td>Introduction to OPC, OPC Data Access, OPC Alarms and Events, PC Unified Architecture.</td>
</tr>
<tr>
<td>5</td>
<td>Industrial Systems Integration Technologies</td>
<td>OPC as an integration tool, Clients and Servers configuration, Using OPC to Support IIoT (Data Hub) and SCADA systems, HMI</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Assignment 2: Web technologies; Due end of Week 6</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Mid-term Recess: Monday, October 9 to Sunday, October 15, 2023</td>
</tr>
<tr>
<td>6</td>
<td>Industrial Internet of Things</td>
<td>Smart sensors and actuators, Internet of Things, Sensor networks</td>
</tr>
<tr>
<td>7</td>
<td>Industrial Internet of Things</td>
<td>MQTT, Industrial applications of sensor networks, Integration of IoT and IIoT.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Assignment 3: Smart sensors and actuators; Due End Week 9</td>
</tr>
</tbody>
</table>
| Week 8 | **Industrial Data Integration using Artificial Intelligence**  
Components of AI systems, Diagnostic AI systems, Knowledge Based Systems, Expert System, introduction to Fuzzy logic |
|---|---|
| Week 9 | **Industrial Data Integration using Artificial Intelligence**  
Biological Neural Networks, Artificial Neural Networks-ANN - Feed forward net, Training, Using ANN in control systems |
| Week 10 | **Industrial Data Integration using Artificial Intelligence**  
Machine and plant wide optimization using intelligent systems control, Use of AI in IIoT. |
| | Assignment 4 AI: Due End Week 11 |
| Week 11 | **Safety Standards & System Integration**  
Industrial Safety standards: IEC61508, IEC 61511, SIL |
| Week 12 | **Safety Standards & System Integration**  
Implementation of Integrated safety systems, OPC & SIS |
| Week 13 | **Course Review and Project Presentation**  
Review of course material in preparation for final examinations. Project presentation for the PROCTECH6AS3 course projects |

Classes end: December 6, 2023  
Final Examination Period: Friday, December 8 to Thursday, December 21  
All examinations MUST be written during the scheduled examination period.

**List of experiments**

**Lab 1**  
**Discovery, Design and Documentation**  
- Familiarize with the production system provided. Identify the following:  
  1. What is the process flow?  
  2. What do the individual inputs and outputs do?  
- Introduction to Omron PLCs.  
- **Output:**  
  1. Process flowchart or create pseud code.  
  2. Simple Omron code showing the use of the following instructions: Examine when open, examine when closed, binary output, set binary output, reset binary output, timer, and counter.  

Duration: 2 week

**Lab 2**  
**Machine Integration: Programming**  
- Develop PLC program that runs the given process.  
- **Output:**  
  Well commented logic. Explain the purpose of every rung and every instruction and submit as a pdf on avenue.  

Duration: 1 week

**Lab 3**  
**Machine Integration: Control and Operation (HMI)**  
- Develop an HMI to control and track progress of the system and visualize all relevant details.  
- **Output:**  

1. Well commented modified logic and screenshots of configurations and HMI. Explain the purpose of every rung and every instruction and submit pdf as well as the Omron program file on Avenue.

2. Video of the demonstration and submit on Avenue.

Duration: 2 weeks

**Lab 4**

**Horizontal Integration: Work Cells Integration using Ethernet IP**

- Three groups work together to integrate three units using Ethernet IP such that units coordinate from start of mixing product to storing filled bottles in the warehouse.

- **Output:**
  1. Well commented modified logic and screenshots of configurations and HMI. Explain the purpose of every rung and every instruction and submit pdf as well as the Omron program file on Avenue.
  2. Video of the demonstration and submit on Avenue.

Duration: 2 weeks

**Lab 5**

**Vertical and Horizontal Integration: OPC DA**

- Recreate the previous HMI using LabVIEW and OPC DA.
- Remove Ethernet IP integration and integrate the units using LabView or Cogent Datahub.

- **Output:**
  1. Well commented modified logic and screenshots of configurations and HMI, including LabView logic.
  2. Video of the demonstration and submit on Avenue.

Duration: 2 weeks

**Lab 6**

**Vertical Integration: OPC AE and OPC HDA**

- Use OPC AE and HDA to present relevant historical data and alarms.

- **Output:**
  1. Well commented screenshots of KepServer and Cogent Datahub configurations.
  2. Video of the demonstration and submit on Avenue.

Duration: 2 weeks

**Lab 7**

**System Integration: IIoT**

- Integrate workstation control systems with Manufacturing Execution System (MES)

- **Output:**
  1. Well commented screenshots of configurations
  2. Produce a video the system in operation and make a presentation to class.

Duration: 2 weeks

### 4. ASSESSMENT OF LEARNING *including dates*

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments</td>
<td>20%</td>
</tr>
<tr>
<td>Mid-term test</td>
<td>15%</td>
</tr>
<tr>
<td>Labs</td>
<td>30%</td>
</tr>
<tr>
<td>Final examination (tests cumulative knowledge)</td>
<td>35%</td>
</tr>
</tbody>
</table>
Percentage grades will be converted to letter grades and grade points per the University calendar.

5. LEARNING OUTCOMES

1. Understand the concepts of systems integration as applied to Industrial Internet of Things (IIoT)
2. Identify hardware and software requirements for automation system integration and be able to offer solutions.
3. Use industry standard software solutions such as DDE, OPC (including COM & DCOM), web services, HMI, and APIs to integrate automation systems.
4. Specify network systems for computer integrated manufacturing as related to plant wide automated system integration, including the integration of process, manufacturing, building and electrical substation automation systems, and Industrial Internet of Things.
5. Implementation machine and plant wide intelligent optimization systems based on Fuzzy Logic and Neural Networks
6. Apply process and machine safety standards in the design, integration, and maintenance of industrial automation systems.

6. COURSE OUTLINE – APPROVED ADVISORY STATEMENTS

ANTI-DISCRIMINATION
The Faculty of Engineering is concerned with ensuring an environment that is free of all discrimination. If there is a problem, individuals are reminded that they should contact the Department Chair, the Sexual Harassment Officer or the Human Rights Consultant, as soon as possible.

ACADEMIC INTEGRITY
You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. It is your responsibility to understand what constitutes academic dishonesty.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: “Grade of F assigned for academic dishonesty”), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the Academic Integrity Policy, located at https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/

The following illustrates only three forms of academic dishonesty: The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one’s own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.

AUTHENTICITY / PLAGIARISM DETECTION
Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the
plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster’s use of Turnitin.com, please go to www.mcmaster.ca/academicintegrity.

COURSES WITH AN ON-LINE ELEMENT

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

ONLINE PROCTORING

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

COMMUNICATIONS

It is the student’s responsibility to:

• Maintain current contact information with the University, including address, phone numbers, and emergency contact information.
• Use the University provided e-mail address or maintain a valid forwarding e-mail address.
• Regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student’s designated primary e-mail account via their @mcmaster.ca alias.
• Accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student’s @mcmaster.ca alias.
• Check the McMaster/Avenue email and course websites on a regular basis during the term.

CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the Code of Student Rights & Responsibilities (the “Code”). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, whether in person or online.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students’ access to these platforms.

ACADEMIC ACCOMMODATION OF STUDENTS WITH DISABILITIES

Students with disabilities who require academic accommodation must contact Student Accessibility Services (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University’s Academic Accommodation of Students with Disabilities policy.

REQUESTS FOR RELIEF FOR MISSED ACADEMIC TERM WORK
**McMaster Student Absence Form (MSAF):** In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar “Requests for Relief for Missed Academic Term Work”.

**ACADEMIC ACCOMMODATION FOR RELIGIOUS, INDIGENOUS OR SPIRITUAL OBSERVANCES (RISO)**

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the RISO policy. Students should submit their request to their Faculty Office normally within 10 working days of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests. [http://www.mcmaster.ca/policy/Students-AcademicStudies/Studentcode.pdf](http://www.mcmaster.ca/policy/Students-AcademicStudies/Studentcode.pdf)

**COPYRIGHT AND RECORDING**

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, including lectures by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

**EXTREME CIRCUMSTANCES**

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.
