Course Outline							
1. COURSE INFORMATION	ON						
Session Offered	Summe	Summer 2022					
Course Name	Mathen	Mathematics II					
Course Code	ENG TE	CH 1MT3					
Date(s) and Time(s) of lectures	Tue 2:3	Mon 2:30 pm - 4:20 pm Tue 2:30 pm - 5:20 pm Thu 2:30 pm - 5:20 pm					
Program Name		Automotive and Vehicle Engineering Technology/ Biotechnology/ Automation Engineering Technology					
Calendar Description	_	Integral calculus involving all the techniques of integration, applications, integral theorems, sequences and series.					
Instructor(s)	Dr. Yotk	ka Rickard E-Mail: yotka@mcmaste Office Hours: Tue, Thu 5:30 p					
2. COURSE SPECIFICS							
Course Description		1					
	Code		Туре	Hours per term			
Instruction Type	С	Classroom instru		28			
	L		kshop or fieldwork				
	Т	Tutorial		25			
	DE	DE Distance education					
	Total Hours 53

Duana misita (a)		Assignments					
Prerequisite(s)	Registration in Automotive and Vehicle Engineering Technology / Biotechnology /						
Corequisite(s)		Automation Engineering Technology; Mathematics I ENGTECH 1MC3 (or equivalent)					
Antirequisite(s)		N/A N/A					
Course Specific Policies		N/A NSMaster standard calculator (CASIO EVOCIMS or MS Plus) is the only					
course specific Policies	calculator allowed during Tests and Exam. The use of other Casio or other brand calculator is strictly prohibited.						
	Passing the course: In order to pass this course, you are required to obtain overall average of at least 50% including all evaluation components.						
	overall average of at least 50% including all evaluation components.						
	 Attendance and Participation: regular attendance and active participation in all class sessions are essential for success in this course. Missed Work Policy: 						
	 Quizzes. All quizzes must be written in person during the scheduled time fo the class. There are no re-writes. If you miss a quiz because of an 						
		•	•	_			

ENGINEERING

McMaster-Mohawk Bachelor of Technology **Partnership**

> day and send an MSAF, otherwise you will be assigned a grade of zero for the quiz. If an MSAF has been submitted, the weight of the quiz will be added to the final exam.

- **Tests.** All tests are to be written in person at the times announced unless alternative arrangements have been made previously between the student and the professor to cover exceptional circumstances. Students with special needs must inform the professor through McMaster Student Accessibility Services (SAS) office of their requirements at least five days prior to the test date so that alternative arrangements can be made.
- If you miss a test because of an emergency, you must contact the professor no later than the next business day and you are required to submit MSAF for missing test(s); otherwise, ZERO will be assigned to the grade. After receiving your MSAF, the weight of the missing test will be added to the final examination. Students who fail to send MSAF will be considered "absentees" and will be assigned a grade of zero for the test.
- Make-up test will be provided for the 2nd missed (MSAF-ed) test before the examination ban week.
- Students who fail a test will not be permitted to rewrite the test under any circumstances.
- Assignments. Assignments will be submitted through Avenue as per posted due dates. A submission after the deadline or by e-mail will not be considered for marking or review.
- All test/assignment/quiz marks will be posted on Avenue. It is your responsibility to report any discrepancies to your instructor before the last day of classes. No errors will be corrected unless reported by this time.

Reviewing a test mark

Tests may be resubmitted to the instructor for re-mark up to one week after the test grade has been uploaded. Students must submit a detailed written description of the marking problem regarding their submission. However, the instructor has the right to remark the test in its entirety.

The educational materials developed for this course, including, but not limited to, lecture notes and slides, handout materials, examinations and assignments, and any materials posted to Avenue, are the intellectual property of the course instructor. These materials have been developed for student use only and they are not intended for wider dissemination and/or communication outside of a given course. Posting or providing unauthorized audio, video, or textual material of lecture content to third-party websites violates the instructor's intellectual property rights, and the Canadian Copyright Act. Failure to follow these instructions may be in contravention of the university's Code of Student Conduct and/or Code of Academic Conduct, and will result in appropriate penalties. Participation in this course constitutes an agreement by all parties to abide by the relevant University Policies, and to respect the intellectual property of others during and after their association with McMaster University and Mohawk College.

Departmental Policies

Students must maintain a GPA of 3.5/12 to continue in the program.

In order to achieve the required learning objectives, on average, B.Tech. students can expect to do at least 3 hours of "out-of-class" work for every scheduled hour in

ENGINEERING McMaster-Mohawk Bachelor of Technology Partnership

MODULE 01: Integral Calculus						
mandatory. The use of cell phones, iPods, laptops and other personal electronic devices are prohibited from the classroom during the class time, unless the instructor makes an explicit exception. Announcements made in class or placed on Avenue are considered to have been communicated to all students including those individuals that are not in class. Instructor has the right to submit work to software to identify plagiarism. MODULE 01: Integral Calculus The Definite Integrals The Fundamental Theorem of Calculus Indefinite Integrals (power rule, constant multiple, and sum rules) Indefinite Integrals (power rule, constant multiple, and sum rules) Indefinite Integrals (power rule, constant multiple, and sum rules) Integrals of Algebraic and Trigonometric Functions MODULE 02: Integral Calculus –Basic techniques for solution of integrals Integrals of Exponential and Logarithmic Functions Integrals of Exponential and Logarithmic Functions Integrals of Hyperbolic Functions Integration by Parts Integration by Parts Integration by Parts Integration by Parts Integration by Partian Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors duadratic Factors (Audaratic Factors) MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Week 4 Upl 11 - 15 Infinite Intervals Discontinuous Integrand MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integral theorems:						
prohibited from the classroom during the class time, unless the instructor makes an explicit exception. Week 1 Jun 20 - 24 Week 1 Jun 20 - 24 Week 2 Jun 27 - Jul 1 Week 2 Jun 27 - Jul 1 Week 3 Week 3 Week 4 Jul 11 - 15 Week 5 Jul 18 - 22 Jun 27 - Jul 1 The Fundamental Theorem of Calculus • Integrals and the Net Change • Rules for Integrals (power rule, constant multiple, and sum rules) • Integrals of Algebraic and Trigonometric Functions MODULE 03: Integral Calculus -Basic techniques for solution of integrals • Integration by Algebraic Substitution • Integration by Parts • Integration by Parts • Integration of Trigonometric Functions (sin"x, cos"x, and cos"x sin"x) • Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors Week 3 Week 3 Week 4 Jul 11 - 15 Week 4 Jul 11 - 15 MODULE 03: Applications of Integration • Velocity and Net Change • Finding Plane Areas between Curves • Volumes of Solids of Revolution MODULE 04: Further Applications of integration • Arc Length • Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 MODULE 05: Improper Integrals • Infinite Intervals • Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems • Double Integrals over Rectangular and General Regions • Triple Integrals Integral theorems:		MODULE 01: Integral Calculus				
Week 1 Jun 20 - 24 Pulses for Integrals (power rule, constant multiple, and sum rules) Integrals of Algebraic and Trigonometric Functions MODULE 02: Integral Calculus – Basic techniques for solution of integrals Integrals of Exponential and Logarithmic Functions Integrals of Hyperbolic Functions Integrals of Hyperbolic Functions Integrals of Hyperbolic Functions Integration by Parts Integration of Trigonometric Functions (sin"x, cos"x, and cos"x sin"x) Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors Week 3 Week 3 Week 3 Jul 4 - 8 Week 3 Jul 4 - 8 Week 4 Jul 11 - 15 Week 4 Jul 11 - 15 Week 5 Jul 18 - 22 Indefinite Integrals and the Net Change Rules for Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors Repeated Quadratic Factors Week 5 Jul 18 - 22 Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors Repeated Quadratic Factors Week 5 Jul 18 - 22 Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors Repeated Quadratic Factors Week 5 Jul 18 - 22 Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors Repeated Linear Factors, Distinct Quadratic Factors Week 5 Jul 18 - 22 Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Repeated Linear Factors, Repeated Linear Factors, Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Repeated Linear Factors, Partial Fractions; Distinct Linear Factors, Repeated Linear		The Definite Integrals				
Week 1 Jun 20 - 24 • Rules for Integrals (power rule, constant multiple, and sum rules) • Integrals of Algebraic and Trigonometric Functions MODULE 02: Integral Calculus – Basic techniques for solution of integrals • Integration by Algebraic Substitution • Integrals of Exponential and Logarithmic Functions • Integrals of Hyperbolic Functions • Integration by Parts • Integration by Parts • Integration by Trigonometric Functions (sin ^m x, cos ^m x, and cos ^m x sin ⁿ x) • Integration by Trigonometric Substitution • Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors MODULE 03: Applications of Integration • Velocity and Net Change • Finding Plane Areas between Curves • Volumes of Solids of Revolution MODULE 04: Further Applications of integration • Arc Length • Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 • Moments and Centers of Mass • Work Done MODULE 05: Improper Integrals • Infinite Intervals • Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems • Double Integrals over Rectangular and General Regions • Triple Integrals Integral theorems:		The Fundamental Theorem of Calculus				
Integrals of Algebraic and Trigonometric Functions MODULE 02: Integral Calculus - Basic techniques for solution of integrals		Indefinite Integrals and the Net Change				
MODULE 02: Integral Calculus –Basic techniques for solution of integrals Integration by Algebraic Substitution Integrals of Exponential and Logarithmic Functions Integrals of Hyperbolic Functions Integrals of Hyperbolic Functions Integration by Parts Integration by Parts Integration by Trigonometric Functions (sin ^m x, cos ^m x, and cos ^m x sin ⁿ x) Integration by Trigonometric Substitution Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1-2 Moments and Centers of Mass Week 4 Jul 11 - 15 MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:	Week 1	Rules for Integrals (power rule, constant multiple, and sum rules)				
Integration by Algebraic Substitution Integrals of Exponential and Logarithmic Functions Integrals of Hyperbolic Functions Integration by Parts Integration by Parts Integration of Trigonometric Functions (sin ^m x, cos ^m x, and cos ^m x sin ⁿ x) Integration by Parts Integration by Parts Integration by Parts Integration by Parts Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Arc Length Arc Length Arc Length Arc Length Arc Length Moments and Centers of Mass Week 4 Jul 11 - 15 Week 4 Jul 11 - 15 MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:	Jun 20 - 24	Integrals of Algebraic and Trigonometric Functions				
Integrals of Exponential and Logarithmic Functions Integrals of Hyperbolic Functions Integration by Parts Integration by Parts Integration of Trigonometric Functions (sin ^m x, cos ^m x, and cos ^m x sin ⁿ x) Integration by Trigonometric Substitution Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1-2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:		MODULE 02: Integral Calculus –Basic techniques for solution of integrals				
Integrals of Hyperbolic Functions Integration by Parts Integration of Trigonometric Functions (sin ^m x, cos ^m x, and cos ^m x sin ⁿ x) Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Moments and Centers of Mass Week 4 Jul 11 - 15 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Triple Integrals Integral theorems: Integral theorems:		Integration by Algebraic Substitution				
Week 2 Jun 27 - Jul 1 Integration by Parts Integration of Trigonometric Functions (sin ^m x, cos ^m x, and cos ^m x sin ⁿ x) Integration by Trigonometric Substitution Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Triple Integrals over Rectangular and General Regions Triple Integrals Integral theorems:		Integrals of Exponential and Logarithmic Functions				
Week 2 Jun 27 - Jul 1 Integration of Trigonometric Functions (sin"x, cos"x, and cos"x sin"x) Integration by Trigonometric Substitution Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:		Integrals of Hyperbolic Functions				
Integration by Trigonometric Substitution		Integration by Parts				
Integration by Trigonometric Substitution Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors, Repeated Quadratic Factors		• Integration of Trigonometric Functions (sin ^m x, cos ^m x, and cos ^m x sin ⁿ x)				
Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors, Distinct Quadratic Factors MODULE 03: Applications of Integration Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:		Integration by Trigonometric Substitution				
MODULE 03: Applications of Integration • Velocity and Net Change • Finding Plane Areas between Curves • Volumes of Solids of Revolution MODULE 04: Further Applications of integration • Arc Length • Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 • Moments and Centers of Mass • Work Done MODULE 05: Improper Integrals • Infinite Intervals • Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems • Double Integrals over Rectangular and General Regions • Triple Integrals Integral theorems:	Juli 27 - Jul 1	• Integration by Partial Fractions; Distinct Linear Factors, Repeated Linear Factors,				
Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration		Distinct Quadratic Factors, Repeated Quadratic Factors				
Velocity and Net Change Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration		MODULE 03: Applications of Integration				
 Finding Plane Areas between Curves Volumes of Solids of Revolution MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems: 						
Jul 4 - 8 MODULE 04: Further Applications of integration Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:						
Arc Length Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:	Week 3	Volumes of Solids of Revolution				
Area of a Surface of Revolution Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:	Jul 4 - 8					
Week 4 Jul 11 - 15 Week 5 Jul 18 - 22 Term Test 1: Test covers all the topics listed in Weeks 1 - 2 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:		Arc Length				
 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems: 		Area of a Surface of Revolution				
 Moments and Centers of Mass Work Done MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems: 		Term Test 1: Test covers all the topics listed in Weeks 1 -2				
Week 4 Jul 11 - 15 MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:						
Jul 11 - 15 MODULE 05: Improper Integrals Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:) A/1. 4	Work Done				
Infinite Intervals Discontinuous Integrand MODULE 06: Multiple Integrals and Integral Theorems Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems:		MODULE 05: Improper Integrals				
Week 5 Jul 18 - 22 MODULE 06: Multiple Integrals and Integral Theorems • Double Integrals over Rectangular and General Regions • Triple Integrals Integral theorems:	Jul 11 - 15	Infinite Intervals				
 Double Integrals over Rectangular and General Regions Triple Integrals Integral theorems: 		Discontinuous Integrand				
 Triple Integrals Integral theorems: 		MODULE 06: Multiple Integrals and Integral Theorems				
Jul 18 - 22 Integral theorems:	Week 5	Double Integrals over Rectangular and General Regions				
Integral theorems:		, ,				
Green's Theorem	Jul 10 - 22					
Cream of the cream		Green's Theorem				

Partnership

	Gauss Theorem
	Term Test 2: Test covers all the topics listed in Weeks 3 - 4
	Integral theorems (cont'd):
Week 6	Gauss Theorem
Jul 25 - 29	Green's Theorem
	Stokes Theorem
Week 7	a Deview if time a negretic
Λυσ 1 - 5	Review, if time permits

Classes end: Friday, August 5

Final examination: Thursday, August 4, 2:30 pm - 5:00 pm

All examinations MUST be written during the scheduled examination time.

Note that this structure represents a plan and is subject to adjustment term by term.

The instructor and the University reserve the right to modify elements of the course during the term. The University may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with the students will be given with explanation and the opportunity to comment on changes.

4. ASSESSMENT OF LEARNING *including dates*	Weight
Assignments	10%
Quizzes	10%
2 Mid-term tests (each 20%)	40%
Final examination (tests cumulative knowledge)	40%
TOTAL	100%

Percentage grades will be converted to letter grades and grade points per the University calendar.

5. LEARNING OUTCOMES

- 1. Evaluate integrals involving algebraic, trigonometric, exponential, and logarithmic functions.
- 2. Evaluate integrals using various techniques such as substitution, trigonometric substitutions, integration by parts, and partial fractions.
- 3. Apply the concepts of definite integrals to solve problems involving area, volume, area of surface of revolution, and physical applications.
- 4. Use principles of integration to calculate velocity, net change, and work.
- 5. Evaluate the definite integral of a function f where the interval is infinite, and where f has an infinite discontinuity in a finite interval [a, b].
- 6. Use double integrals to compute the volumes, masses, and centroids of more general regions.
- 7. Evaluate triple integrals, and solve application problems using the integral theorems of Green, Stockes, and Gauss.

6. COURSE OUTLINE – APPROVED ADVISORY STATEMENTS

ANTI-DISCRIMINATION

The Faculty of Engineering is concerned with ensuring an environment that is free of all discrimination. If there is a problem, individuals are reminded that they should contact the Department Chair, the Sexual Harassment Officer or the Human Rights Consultant, as soon as possible.

http://www.mcmaster.ca/policy/General/HR/Discrimination Harassment Sexual Harassment-

Prevention&Response.pdf

ACADEMIC INTEGRITY

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic

ENGINEERING McMaster-Mohawk Bachelor of Technology

Partnership

credentials you earn are rooted in principles of honesty and academic integrity. It is your responsibility to understand what constitutes academic dishonesty.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the Academic Integrity Policy, located at https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/

The following illustrates only three forms of academic dishonesty: The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.

AUTHENTICITY / PLAGIARISM DETECTION

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

COURSES WITH AN ON-LINE ELEMENT

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

ONLINE PROCTORING

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

COMMUNICATIONS

It is the student's responsibility to:

- Maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- Use the University provided e-mail address or maintain a valid forwarding e-mail address.
- Regularly check the official University communications channels. Official University
 communications are considered received if sent by postal mail, by fax, or by e-mail to the student's
 designated primary e-mail account via their @mcmaster.ca alias.

ENGINEERING McMaster-Mohawk

McMaster-Mohawk Bachelor of Technology Partnership

- Accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student's @mcmaster.ca alias.
- Check the McMaster/Avenue email and course websites on a regular basis during the term.

CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the Code of Student Rights & Responsibilities (the "Code"). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, whether in person or online.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students' access to these platforms.

ACADEMIC ACCOMMODATION OF STUDENTS WITH DISABILITIES

Students with disabilities who require academic accommodation must contact Student Accessibility Services (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's Academic Accommodation of Students with Disabilities policy.

REQUESTS FOR RELIEF FOR MISSED ACADEMIC TERM WORK

McMaster Student Absence Form (MSAF): In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar "Requests for Relief for Missed Academic Term Work".

ACADEMIC ACCOMMODATION FOR RELIGIOUS, INDIGENOUS OR SPIRITUAL OBSERVANCES (RISO)

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the RISO policy. Students should submit their request to their Faculty Office normally within 10 working days of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests. http://www.mcmaster.ca/policy/Students-AcademicStudies/Studentcode.pdf

COPYRIGHT AND RECORDING

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, including lectures by University instructors

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

EXTREME CIRCUMSTANCES

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.
