

Course Outline						
1. COURSE INFORMAT	ION					
Session Offered		Fall 2021				
Course Name	Smart C	Smart Cities and Communities				
Course Code	SMRTT	SMRTTECH 4SC3				
Date(s) and Time(s) of lectures	W	C01 – Mondays 3:30 pm – 5:20 pm Wednesdays 1:30PM - 2:20PM L01 – Fridays 12:30 pm – 3:30 pm (Every other week)				
Program Name		Automation Engineering Technology Co-op (B.Tech.)				
Calendar Description	Emergin	Emerging technologies shaping smart cities and communities.				
Instructor(s)	Dr. Mar P.Eng.	jan Alavi,	E-Mail: <u>alavis2@McMaster.ca</u> Office Hours: Wednesdays 10:30 – 11:20 via MS Team: <u>Click here to join the meeting</u>			
		Other office hours are available upon request via email.				
2. COURSE SPECIFICS						
Course Description	Code		Туро	Hours per term		
Instruction Type	C	Type Classroom instruction		nours per term		
	L	Laboratory, workshop or fieldwork		18		
	T	Tutorial		10		
	DE	Distance education		36		
		Total Hours		54		
Resources		ISBN	Textbook Title & Edition	Author & Publisher		
	ISBN-13 456-1	8: 978-1-58714-		ISBN-13: 978-1-58714-456-1		
	Other Supplies		Source			
	Publ	ished papers	The link to the online sources will be provided in Echo360.			
Prerequisite(s)		TECH 4ES3, EN ering Technolog	GTECH 4EE0 and registration in level IV of Automation			
Corequisite(s)						
Antirequisite(s)						
Course Specific Policies						
Departmental Policies	Student	Students must maintain a GPA of 3.5/12 to continue in the program. In order to achieve the required learning objectives, on average, B.Tech. students can expect to do at least 3 hours of "out-of-class" work for every scheduled hour in				

3. SUB TOPIC(S) Week 1 Week 2	class. "Out-of-class" work inc for tests and examinations.Where group work is indicate mandatory.The use of cell phones, iPods, prohibited from the classroon explicit exception.Announcements made in cla communicated to all studentsInstructor has the right to subSmart and connected cities ar Formal characterizations of co 	d in the course outline, su laptops and other persor n during the class time, un ss or placed on Avenue including those individua omit work to software to individuation	uch collaborative work is nal electronic devices are nless the instructor makes an are considered to have been als that are not in class.

Week 3					
Week 4	No Class				
Week 5	No Class				
Week 6	Midterm				
Week 7	Smart Utility				
Week 8	Smart Infrastructure				
Week 9	Smart city data and analytics				
Week 10	Public Safety, Security, encryp	otion, and privacy			
Week 11	Citywide System Monitoring				
Week 12	Project presentation				
Week 13	Review				
Week 14	Smart and connected cities ar	nd communities			
	Classes end: Wednesday,				
Final Examination Period: Thursday, December 9 to Wednesday, December 22					
All examinations MUST be written during the scheduled examination period.					
List of experiments					
Lab 1 (Sep 17, 2021)	Big data handling and visualization				
Lab 2 (Oct 1, 2021)		Community services improvement with Machine Learning			
Lab 3 (Oct 22, 2021)	Deployment of long-range low-power communication protocols				
Lab 4 (Nov 5, 2021)	Data analytics and sharing using cloud services				
Lab 5 (Nov 19, 2021)	Citywide system monitoring				
Lab 6 (Dec 3, 2021)	Project	Project			
The instructor and the University may change the dates and d	esents a plan and is subject to ad ersity reserve the right to modify leadlines for any or all courses in able notice and communication w	elements of the course d extreme circumstances.	If either type of modification		

4. ASSESSMENT OF LEARNING *including dates*

Weight

McMaster University

Quizzes and class activities (6)	30%
Mid-term test (Monday Oct 18 th , 2021)	15%
Project	15%
Labs (5)	25%
Final examination (tests cumulative knowledge)	15%
TOTAL	100%

Percentage grades will be converted to letter grades and grade points per the University calendar.

5. LEARNING OUTCOMES

- 1. Explain smart cities characterizations, challenges and state of the art solutions.
- 2. Describe smart city and communities networks.
- 3. Apply artificial intelligence to optimize and improve city and community services.
- 4. Collect sensory data and communicate with the network using LoRa WAN.
- 5. Analyse and visualize data extracted from connected devices and communities.
- 6. Use cloud services to deploy Machine learning predictive models.
- 7. Design city-wide system monitoring applications.

6. COURSE OUTLINE – APPROVED ADVISORY STATEMENTS

ANTI-DISCRIMINATION

The Faculty of Engineering is concerned with ensuring an environment that is free of all discrimination. If there is a problem, individuals are reminded that they should contact the Department Chair, the Sexual Harassment Officer or the Human Rights Consultant, as soon as possible.

http://www.mcmaster.ca/policy/General/HR/Discrimination Harassment_Sexual_Harassment-

Prevention&Response.pdf

ACADEMIC INTEGRITY

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. It is your responsibility to understand what constitutes academic dishonesty.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the Academic Integrity Policy, located at https://secretariat.mcmaster.ca/university-policies-proceduresguidelines/

The following illustrates only three forms of academic dishonesty: The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.

AUTHENTICITY / PLAGIARISM DETECTION

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

ENGINEERING McMaster-Mohawk Bachelor of Technology Partnership

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com, please go to www.mcmaster.ca/academicintegrity.

COURSES WITH AN ON-LINE ELEMENT

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

ONLINE PROCTORING

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

COMMUNICATIONS

It is the student's responsibility to:

- Maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- Use the University provided e-mail address or maintain a valid forwarding e-mail address.
- Regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student's designated primary e-mail account via their @mcmaster.ca alias.
- Accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student's @mcmaster.ca alias.
- Check the McMaster/Avenue email and course websites on a regular basis during the term.

CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the Code of Student Rights & Responsibilities (the "Code"). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, whether in person or online.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students' access to these platforms.

ACADEMIC ACCOMMODATION OF STUDENTS WITH DISABILITIES

Students with disabilities who require academic accommodation must contact Student Accessibility Services (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's Academic Accommodation of Students with Disabilities policy.

ENGINEERING McMaster-Mohawk Bachelor of Technology Partnership

REQUESTS FOR RELIEF FOR MISSED ACADEMIC TERM WORK

McMaster Student Absence Form (MSAF): In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar "Requests for Relief for Missed Academic Term Work".

ACADEMIC ACCOMMODATION FOR RELIGIOUS, INDIGENOUS OR SPIRITUAL OBSERVANCES (RISO)

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the RISO policy. Students should submit their request to their Faculty Office normally within 10 working days of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests. <u>http://www.mcmaster.ca/policy/Students-AcademicStudies/Studentcode.pdf</u>

COPYRIGHT AND RECORDING

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, including lectures by University instructors

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

EXTREME CIRCUMSTANCES

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.
