# HOW TO **SOCIETY** YOUR RESUME

McMaster University
Engineering
Centre for Career Growth & Experience

## PROVIDE A DESCRIPTION OF THE PROGRAM

**01**

### FOR EXAMPLE:

☑ The Engineering and Society program incorporates the complex interactions between technology and society, and how both are influenced by the engineering practice.

**OR**

☑ The Engineering and Society program establishes a relationship between technology & society through courses dealing with the culture, history and social control of technology.

**OR**

☑ The Engineering and Society program builds on the conventional engineering curriculum through a set of core courses that develop creative and inquisitive engineers.

### FOR EXAMPLE:

**02**

## INCLUDE RELEVANT COURSES

☑ PREVENTATIVE ENGINEERING - ENVIRONMENTAL PERSPECTIVES:
• Developed technical and sustainable design skills through the completion of multiple case studies about preventive engineering and eliminating consequences rather than dealing with consequences after conception

☑ INQUIRY IN AN ENGINEERING CONTEXT I:
• Gained an understanding of the inquiry process for concepts of social, environmental & economic sustainability
• Demonstrated strong research and presentation skills while collaborating in a group to solve a problem within the Hamilton community

## IMPORTANT!
**Ensure you write your examples in your own words! How will you stand out if your descriptions are the same as your peers (or the examples)?**
