

# Canadian Nuclear Laboratories Summer Research Experience

## About the award

The Canadian Nuclear Laboratories (CNL) Undergraduate Summer Research Experience is a new offering launched in 2023 to support students seeking to develop research and nuclear workforce skills and inspire future leaders in nuclear science and engineering.

These experiences will be awarded to undergraduate students in the Faculties of Science and Engineering who express an interest in pursuing a nuclear-related summer research work experience with a faculty member at McMaster.

## CNL Summer Research Experience at a glance

**\$10,000**

+ a trip to Chalk River

**16 weeks**

on a full-time basis

**12 awards available**

## Eligibility criteria

- be a current full-time student in Level 2, 3, or 4 of an Undergraduate Program in the Faculty of Engineering or the Faculty of Science at McMaster University;
- have a minimum cGPA of B;
- have been registered at the time of application in at least one of the two terms immediately before holding the award.

## Application details

Apply through **AwardSpring**:

- Complete the General Application. If eligible, the CNL USRE Application will appear on your Dashboard. Complete the supplementary questions in the application about your candidacy, select projects of choice, and upload unofficial transcript(s).

**This award is sponsored by Canadian Nuclear Laboratories. Successful students will work alongside a McMaster faculty supervisor and a CNL Scientist as a co-supervisor.**
