TO WHOM THIS MAY CONCERN

RE: [REDACTED]

To be licensed to practice professional engineering in Ontario, applicants must demonstrate that they possess the necessary academic qualifications, complete PEO's professional Practice examination (PPE), and have acquired 48 months of satisfactory engineering experience. A minimum of 12 months of the 48-month experience period must be acquired in Canada under the supervision of a licensed professional engineer (P.Eng.) before a license can be granted.

This will confirm that [REDACTED] satisfied the PEO's academic requirements for professional engineering licensure. Accordingly, [REDACTED] academic qualifications are deemed to be equivalent to those achieved through the completion of an accredited engineering program at a Canadian university. [REDACTED] has also written and passed the PPE. Therefore the requirements remaining for licensure is to satisfy the stipulated work experience requirement.

Once the above-mentioned remaining requirements are satisfied, the application will be presented to the Registrar for consideration to be licensed as a P.Eng. in Ontario.

If you require any additional information, please contact the undersigned.

Sincerely,

[REDACTED]

Manager, Admissions
