

COURSE INFORMATION

Course Name: Principles of Environmental Engineering

Course Code: CIV ENG 2B04

Session Offered: Fall 2024

Calendar Description: 4 units. Sustainability, ecosystems and climate change; mass balance; reaction kinetics; reactor theory; water quality; water and wastewater treatment; solid waste management; air pollution control.

Three lectures, one tutorial (two hours), one lab (three hours); first term Prerequisite(s): Registration in Level II Engineering or permission of the Department.

Instructor: Dr. Zhong (Zoe) Li

Email: zoeli@mcmaster.ca

Phone: (905) 525 9140 x21225

Laboratory Technician: Monica Han

E-mail: hanm7@mcmaster.ca

Teaching Assistants: Natalia Shiu

E-mail: shiun2@mcmaster.ca

Caiying Cheng

E-mail: chengc82@mcmaster.ca

Suad Abukamla

E-mail: abukams@mcmaster.ca

Zuoxiang Bu

E-mail: buz2@mcmaster.ca

Office Hours/Contact: TBA

Class Schedule Days & Times:

Lectures: MoWeTh 10:30AM - 11:20AM

Labs: L01 Mo 2:30PM - 5:20PM; L02 We 11:30AM - 2:20PM; L03 Fr 11:30AM - 2:20PM; L04 We 2:30PM - 5:20PM; L05 Fr 2:30PM - 5:20PM

Tutorials: Fr 8:30AM - 10:20AM

1. COURSE OBJECTIVES

The objective of the course is to introduce principles and practices of environmental engineering related to water pollution, water treatment, wastewater treatment, solid waste management, and air pollution control.

2. COURSE SPECIFIC POLICIES

AVENUE TO LEARN (A2L)

The A2L site will be used to post course schedules, lecture notes, assignments, solutions, etc. **It is the student's responsibility to check the A2L course website on a regular basis during the term.**

COURSE TEXTBOOK

The purchase of the course textbook is recommended: Principles of Environmental Engineering and Science, S.J. Masten and M.L. Davis, McGraw Hill, 4th Edition (2020). Additionally, there are numerous text books on environmental engineering available in the Thode Library.

COURSE NOTES

Course notes will be posted on avenue in sections over the duration of the term. The course notes are not intended to replace class or the textbook.

EXAMINATIONS

There will be four quizzes (best 3/4 counted) and one final examination in this course. The final examination will test cumulative knowledge from the entire term. The McMaster Standard Calculator (Casio fx991) may be used on examinations.

ASSIGNMENTS

There will be 4-6 assignments in this course. Assignments, along with the solutions, will be posted on the avenue site a minimum of one week before they are due. The assignments are to be submitted through avenue.

Assignments will be evaluated on a Pass/Fail basis. No late assignments will be accepted, except when an MSAF is submitted.

GROUP WORK

There are group work components in this course. Students will work in groups in the laboratory and for the course project. **Group work in this course cannot be MSAFed.** For the laboratory sessions, students are allowed to select their group members from their own laboratory section during the laboratory introduction sessions, which will be run during the week of September 9th. All group members must participate in all labs; attendance will be taken. For the course project, students are allowed to select their group members from their own tutorial section for the course project.

TUTORIALS

Tutorials alternate with labs with some exceptions; the tutorial schedule is included in this course outline. Any schedule changes will be announced in class and on avenue.

LABORATORY SESSIONS

As part of this course, each student must participate in four mandatory laboratory experiments. The labs provide supplemental exposure to several of the concepts we will be covering over the course of this term. The lab schedule is included in this course outline.

Lab experiments will be conducted in groups of three or four. All group members must participate in all labs. Each group is responsible for submitting a report for each lab. Each group is responsible for submitting a report for each lab. Each lab will be graded. **All group members will receive the same grade, except when penalty applies.** All group members are expected to take part in the report preparation. A statement describing the contribution of each group member should be included in the lab report. Failure to clearly demonstrate each member's contribution could result in an individual or group penalty ranging from 10% to 50%.

A formal report structure is expected for each laboratory write-up. Suppose that you are working as a professional engineer, and prepare your laboratory reports accordingly. Guidelines for the report structure and the marking scheme are available on A2L. Follow these guidelines carefully to achieve the best possible grade on your laboratory reports. Late laboratory reports will receive a penalty of 10% per day late with no exceptions.

LABORATORY SAFETY

The Faculty of Engineering is committed to McMaster University's Workplace and Environmental Health and Safety Policy which states: "Students are required by University policy to comply with all University health, safety and environmental programs and policies". It is your responsibility to understand McMaster University's Risk Management system, which is supported by a collection of Risk Management Manuals (RMMs) that contain programs and policies in support of the Risk Management System. The RMMs are available from https://hr.mcmaster.ca/employees/health_safety_well-being/our-safety/risk-management-manuals-rmms/.

It is also your responsibility to follow any specific Standard Operating Procedures (SOPs) provided for specific experiments (see course lab manuals) and the laboratory equipment. The safety requirements for JHE 220 are listed below:

- Glasses or safety glasses/goggles must be worn in the lab at all times
- Contact lenses are not to be worn in the lab.

No short (i.e., above the knee) pants or skirts are permitted in the lab – lab coats must be worn over top of your clothing in these instances.

Closed-toe shoes must be worn at all times.

No loose clothing allowed.

Long hair must be tied back.

Gloves must be worn when working with hazardous chemicals (as indicated by the laboratory instructor).

Additionally, McMaster University's workplace health and safety guidance related to COVID-19 must always be followed (available from <https://hr.mcmaster.ca/resources/covid19/workplace-health-and-safety-guidance-during-covid-19/>).

3. SCHEDULE

WEEK 1	Introduction	Tutorial 1
WEEK 2	Engineering Dimensions and Calculations	Lab Safety session
WEEK 3	Sustainability	Lab 1
WEEK 4	Material Balances	Tutorial 2, Quiz 1
WEEK 5	Material Balances & Reaction Kinetics	Lab 2
WEEK 6	Reaction Kinetics	Tutorial 3, Quiz 2
WEEK 7	Mid-term Recess	/
WEEK 8	Reactor Theory	Lab 3
WEEK 9	Water Quality	Tutorial 4, Quiz 3
WEEK 10	Drinking Water Treatment	Lab 4
WEEK 11	Wastewater Treatment	Tutorial 5, Quiz 4
WEEK 12	Solid Waste Management	Tutorial 6
WEEK 13	Air Pollution Control	Tutorial 7
WEEK 14	Review	/
FINAL EXAMINATION	Scheduled during the regular University Final Examination period established by the Registrar's Office	

4. ASSESSMENT OF LEARNING

WEIGHT %

Assignments	5%
Group Project	10%
Laboratory Reports	20%
Quizzes	30%
Final Exam	35%

5. LEARNING OUTCOMES

A02 PROBLEM ANALYSIS: 2.1 Identifies and states reasonable assumptions and suitable engineering fundamentals, before proposing a solution path to a problem.

A07 COMMUNICATION SKILLS: 7.1 Demonstrates comprehension of technical and non-technical instructions and questions.

A09 IMPACT OF ENGINEERING ON SOCIETY AND THE ENVIRONMENT: 9.1 Evaluates the environmental impact of engineering activities, identifies uncertainties in decisions, and promotes sustainable design.

6. COMMUNICATIONS

It is the student's responsibility to:

- Maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- Use the University provided e-mail address or maintain a valid forwarding e-mail address.
- Regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student's designated primary e-mail account via their "@mcmaster.ca" alias.
- Accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student's @mcmaster.ca alias.
- Check the McMaster/Avenue email and course websites on a regular basis during the term.

7. POLICIES

TURNITIN.COM

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g., A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

GENERATIVE AI: USE PROHIBITED

Students are not permitted to use generative AI in this course. In alignment with McMaster academic integrity policy <https://secretariat.mcmaster.ca/app/uploads/Academic-Integrity-Policy-1-1.pdf>, it "shall be an offence knowingly to ... submit academic work for assessment that was purchased or acquired from another source". This includes work created by generative AI tools. Also state in the policy is the following, "Contract Cheating is the act of "outsourcing of student work to third parties" (Lancaster & Clarke, 2016, p. 639) with or without payment." Using Generative AI tools is a form of contract cheating. Charges of academic dishonesty will be brought forward to the Office of Academic Integrity.

ACADEMIC INTEGRITY

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. **It is your responsibility to understand what constitutes academic dishonesty.**

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the [Academic Integrity Policy](https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/), located at <https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/>.

The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
- improper collaboration in group work.

copying or using unauthorized aids in tests and examinations.

AUTHENTICITY / PLAGIARISM DETECTION

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to

the plagiarism detection software. **All submitted work is subject to normal verification that standards of academic integrity have been upheld** (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

COURSES WITH AN ON-LINE ELEMENT

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure, please discuss this with the course instructor.

ONLINE PROCTORING

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the [Code of Student Rights & Responsibilities](#) (the "Code"). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, **whether in person or online.**

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students' access to these platforms.

ACADEMIC ACCOMMODATION OF STUDENTS WITH DISABILITIES

Students with disabilities who require academic accommodation must contact [Student Accessibility Services \(SAS\)](#) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's policies and procedures <https://sas.mcmaster.ca/accommodations/policies-and-procedures/>.

REQUESTS FOR RELIEF FOR MISSED ACADEMIC TERM WORK

McMaster Student Absence Form (MSAF): In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar "Requests for Relief for Missed Academic Term Work". <https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/msaf-policy/>.

ACADEMIC ACCOMMODATION FOR RELIGIOUS, INDIGENOUS OR SPIRITUAL OBSERVANCES (RISO)

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the [RISO](#) policy. Students should submit their request to their Faculty Office **normally within 10 working days** of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

COPYRIGHT AND RECORDING

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, **including lectures** by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

PROTECTION OF PRIVACY ACT (FIPPA)

The Freedom of Information and Protection of Privacy Act (FIPPA) applies to universities. Instructors should take care to protect student names, student numbers, grades, and all other personal information at all times. For example, the submission and return of assignments and the posting of grades must be done in a manner that ensures confidentiality – see <http://www.mcmaster.ca/univsec/fippa/fippa.cfm>.

ANTI-DISCRIMINATION

The Faculty of Engineering is concerned with ensuring an environment that is free of all discrimination. If there is a problem, individuals are reminded that they should contact the Department Chair, the Sexual Harassment Officer, or the Human Rights Consultant, as soon as possible.
https://www.mcmaster.ca/policy/General/HR/Discrimination_and_Harassment.pdf

EXTREME CIRCUMSTANCES

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.

8. MCMASTER GRADING SCALE

Grade	Equivalent Grade Point	Equivalent Percentages
A+	12	90-100
A	11	85-89
A-	10	80-84
B+	9	77-79
B	8	73-76
B-	7	70-72
C+	6	67-69
C	5	63-66
C-	4	60-62
D+	3	57-59
D	2	53-56
D-	1	50-52
F	0	0-49
