

Course Outline

1. COURSE INFORMATION

Session Offered	Fall 2016	
Course Name	Power Protection & Maintenance	
Course Code	ENR TECH 4PM3	
Date(s) and Time(s) of lectures	Fridays, 6:30 pm – 9:30 pm	
Program Name	Bachelor of Technology	
Calendar Description	Various power devices such as relays, circuit breaker, power monitor, control devices and other components used in power system protection. Other devices such as CTs, PTs and substation hardware will also be covered.	
Instructor(s)	Dr. Chi Tang	E-Mail: cktang@mcmaster.ca Office Hours & Location: 3 pm to 10 pm, ETB-214

2. COURSE SPECIFICS

Course Description			
Instruction Type	Code	Type	Hours per term
	C	Classroom instruction	33
	L	Laboratory, workshop or fieldwork	6
	T	Tutorial	
	DE	Distance education	
	Total Hours		39
Resources	ISBN	Textbook Title & Edition	Author & Publisher
	ISBN: 9781439888117	Protective Relaying, Principles and Applications 4 th Edition	J. Lewis Blackburn, Thomas J. Domin CRC Press
	Other Supplies	Source	
Prerequisite(s)	ENRTECH 3MI3, 3PD3 and Registration in Energy Engineering Technologies		
Corequisite(s)			
Antirequisite(s)			
Course Specific Policies			
Departmental Policies	<p>Students must maintain a GPA of 3.5/12 to continue in the program.</p> <p>In order to achieve the required learning objectives, on average, B.Tech. students can expect to do at least 3 hours of “out-of-class” work for every scheduled hour in class. “Out-of-class” work includes reading, research, assignments and preparation for tests and examinations.</p> <p>Where group work is indicated in the course outline, such collaborative work is mandatory.</p> <p>The use of cell phones, iPods, laptops and other personal electronic devices are prohibited from the classroom during the class time, unless the instructor makes an explicit exception.</p>		

	Announcements made in class or placed on Avenue are considered to have been communicated to all students including those individuals that are not in class.	
	Instructor has the right to submit work to software to identify plagiarism.	
3. SUB TOPIC(S)		
Week 1	Introduction <ul style="list-style-type: none"> • The Ontario Power Grid • Power System Reliability • Overview of the 1965 North American Blackout • Overview of the 2003 North American Blackout 	
Week 2	Fault Analysis–Part I <ul style="list-style-type: none"> • Review of Per Unit System for Power System Analysis • Symmetrical Component Theory and Sequence Networks • Short Circuit Calculations for 3ϕ, SLG, and LLG faults 	Ch. 2,3,4
Week 3	Fault Analysis – Part II <ul style="list-style-type: none"> • Short Circuit Calculations for SLG, and LLG faults • Fault Levels and Breaker Ratings • Mitigation of Excessively High Fault Levels 	Ch. 2,3,4
Week 4	Symmetrical and Asymmetrical Fault Currents <ul style="list-style-type: none"> • Characteristics of Fault Currents near Generation Sources • Fault Current Asymmetrical Factor • Breaker Duty Assessment • Mitigation of Excessive Short Circuit Levels 	Ch. 4
Week 5	Basic Principles of Protective Relaying <ul style="list-style-type: none"> • Protection Zones • Protection Philosophy • Reliability Vs Security • Elements of Protective Relaying Systems – CT, VT, Protection Relays, CBs, Communication Medium, etc. 	Ch. 1
Week 6	Motor Protection <ul style="list-style-type: none"> • 	Ch. 11
Mid-term Recess: Monday, October 10 to Sunday, October 16, 2016		
Week 7	Midterm Exam	
Week 8	Medium Voltage Distribution Feeder Line Protection <ul style="list-style-type: none"> • Instantaneous Overcurrent Relay • Inverse Time Overcurrent Relay • Circuit Reclosers, Sectionalizers and Fuses • Protection Coordination 	Ch. 6 &12

Week 9	Transmission Line Protection – Part I <ul style="list-style-type: none"> • Apparent Impedance • R-X Diagram • Distance Relays and Relay Operating Characteristics • Relay Protection Schemes such as Direct Under-reach/Permissive Over-reach 	Ch. 6 &12
Week 10	Transmission Line Protection – Part II <ul style="list-style-type: none"> • Current Differential Protection • Line-end-open (LEO) Protection • High Impedance and Open Phase (HIROP) Protection • Breaker Failure Protection • Autoreclosure of Transmission Lines 	Ch. 6 &12
Week 11	Transformer Protection <ul style="list-style-type: none"> • Transformer Operating Characteristics: Tap-changing, Inrush Current, Ferroresonance • Current Transformer Connections • Percentage Differential Relays • Transformer Thermal Monitoring 	Ch. 9
Week 12	Real World Examples of Feeder & Transformer Protection	
Week 13	Course Review	
Classes end: Wednesday, December 7, 2016 Final examination period: Friday, December 9 to Thursday, December 22, 2016 All examinations MUST be written during the scheduled examination period.		
List of experiments		
Lab 1	To be announced	
Lab 2	To be announced	
Lab 3		
Lab 4		
Lab 5		
Lab 6		
Mid-term Recess: Monday, October 10 to Sunday, October 16, 2016		
Lab 7		
Lab 8		
Lab 9		
Lab 10		
Lab 11		
Lab 12		
Note that this structure represents a plan and is subject to adjustment term by term. The instructor and the University reserve the right to modify elements of the course during the term. The University may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with the students will be		

given with explanation and the opportunity to comment on changes.

4. ASSESSMENT OF LEARNING *including dates*	Weight
Assignments	10
Mid-term test	30
Project	
Labs	10
Final examination (tests cumulative knowledge)	50
TOTAL	100%

Percentage grades will be converted to letter grades and grade points per the University calendar.

5. LEARNING OUTCOMES

1. Students will acquire a good understanding of the power system protection philosophy and the basic components that form a protective relaying system.
2. Students will learn the symmetrical component method and apply it calculate short circuit levels.
3. Students will apply computer tools such as PSSE and EMTP-RV to perform short circuit calculations.
4. Students will investigate different techniques in protecting power system components such as distribution feeders, high voltage transmission lines, and induction motors.
5. Students will analyze and design protection systems for simple radial distribution feeders.
6. Students will learn the R-X diagram and apply distance relays to design high voltage transmission line protection schemes.
7. Students will learn how to design induction motor protection systems.
8. Students will investigate the impact of protection systems on power grid reliability.

6. POLICIES

Anti-Discrimination

The Faculty of Engineering is concerned with ensuring an environment that is free of all discrimination. If there is a problem, individuals are reminded that they should contact the Department Chair, the Sexual Harassment Officer or the Human Rights Consultant, as soon as possible.

http://www.mcmaster.ca/policy/General/HR/Discrimination_Harassment_Sexual_Harassment-Prevention&Response.pdf

Academic Integrity

You are required to exhibit honestly and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university.

It is your responsibility to understand what constitutes academic dishonesty. For information on the various kinds of academic dishonesty please refer to the Academic Integrity Policy, located at: <http://www.mcmaster.ca/policy/Students-AcademicStudies/AcademicIntegrity.pdf>.

The following illustrates only three forms of academic dishonesty:

1. Plagiarism. E.g. the submission of work that is not own or for which other credit has been obtained
2. Improper collaboration in group work
3. Copying or using unauthorized aids in tests and examinations.

Requests for Relief for Missed Academic Term Work (Assignments, Mid-Terms, etc.)

The McMaster Student Absence Form is a self-reporting tool for **Undergraduate Students** to report absences **DUE TO MINOR MEDICAL SITUATIONS** that last up to 3 days and provides the ability to request accommodation for any missed academic work. Please note, this tool cannot be used during any final examination period.

You may submit a maximum of 1 Academic Work Missed requests per term. It is YOUR responsibility to follow up with your Instructor immediately (**NORMALLY WITHIN TWO WORKING DAYS**) regarding the nature of the accommodation.

If you are absent **for reasons other than medical reasons**, for more than 3 days or exceed 1 request per term you **MUST** visit your Associate Dean's Office (Faculty Office). You may be required to provide supporting documentation.

This form should be filled out immediately when you are about to return to class after your absence.
<http://www.mcmaster.ca/msaf/>

E-Learning Policy

Consistent with the Bachelor of Technology's policy to utilize e-learning as a complement to traditional classroom instruction, students are expected to obtain appropriate passwords and accounts to access Avenue To Learn for this course. Materials will be posted by class for student download. It is expected that students will avail themselves of these materials prior to class. Students should be aware that, when they access the electronic components of this course, private information such as first and last names, user names for the McMaster e-mail account, and program affiliation may become apparent to all other students in the course. The available information is dependent on the technology used. Continuation in this course will be deemed consent to this disclosure. If you have any questions or concerns about this disclosure please discuss this with the course instructor. Avenue can be accessed via
<http://avenue.mcmaster.ca>.

Communications

It is the student's responsibility to:

- Maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- Use the University provided e-mail address or maintain a valid forwarding e-mail address.
- Regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student's designated primary e-mail account via their @mcmaster.ca alias.
- Accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student's @mcmaster.ca alias.
- Check the McMaster/Avenue email and course websites on a regular basis during the term.

Turnitin (Optional)

This course will be using a web-based service (Turnitin.com) to reveal plagiarism. Students submit their assignment/work electronically to Turnitin.com where it is checked against the internet, published works and Turnitin's database for similar or identical work. If Turnitin finds similar or identical work that has not been properly cited, a report is sent to the instructor showing the student's work and the original source. The instructor reviews what Turnitin has found and then determines if he/she thinks there is a problem with the work. Students who do not wish to submit their work to Turnitin.com must still submit a copy to the instructor. No penalty will be assigned to a student who does not submit work to Turnitin.com. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, etc.). To see the Turnitin.com Policy, please go to
<http://www.mcmaster.ca/academicintegrity/turnitin/students/>

Protection of Privacy Act (FIPPA)

The Freedom of Information and Protection of Privacy Act (FIPPA) applies to universities. Instructors should take care to protect student names, student numbers, grades and all other personal information at all times. For example, the submission and return of assignments and posting of grades must be done in a manner that ensures confidentiality.

<http://www.mcmaster.ca/univsec/fippa/fippa.cfm>

Academic Accommodation of Students with Disabilities Policy

Students who require academic accommodation must contact Student Accessibility Services (SAS) to make arrangements with a Program Coordinator. Academic accommodations must be arranged for each term of study. Student Accessibility Services can be contacted by phone 905-525-9140 ext. 28652 or e-mail sas@mcmaster.ca. For further information consult McMaster's policy for Academic Accommodation of Students with Disabilities

<http://www.mcmaster.ca/policy/Students-AcademicStudies/AcademicAccommodation-StudentsWithDisabilities.pdf>

Students must forward a copy of the SAS accommodation to the instructor of each course and to the Program Administrator of the B.Tech. Program immediately upon receipt. If a student with a disability chooses NOT to take advantage of a SAS accommodation and chooses to sit for a regular exam, a petition for relief may not be filed after the examination is complete. <http://sas.mcmaster.ca>

Student Code of Conduct

The Student Code of Conduct (SCC) exists to promote the safety and security of all the students in the McMaster community and to encourage respect for others, their property and the laws of the land. McMaster University is a community which values mutual respect for the rights, responsibilities, dignity and well-being of others. The purpose of the Student Code of Conduct is to outline accepted standards of behavior that are harmonious with the goals and the well-being of the University community, and to define the procedures to be followed when students fail to meet the accepted standards of behavior. All students have the responsibility to familiarize themselves with the University regulations and the conduct expected of them while studying at McMaster University.
