

Course Outline

1. COURSE INFORMATION			
Session Offered	Winter 2017		
Course Name	Electrical and Electronics Control Systems		
Course Code	AUTO TECH 4EC3		
Date(s) and Time(s) of lectures	Monday (14:30-16:20) Thursday (10:30-11:20)		
Program Name	Automotive and Vehicle Technology		
Calendar Description	Intelligent vehicles; vehicle controllers, protocols buses and applications areas such as chassis, steering, braking, traction and stability control etc; and safety critical systems.		
Instructor(s)	Dr. Moein Mehrdash	E-Mail: mehrtam@mcmaster.ca Office Hours & Location: Thursday (15:00-16:30)-MARC273	
2. COURSE SPECIFICS			
Course Description	In-Depth microcontroller programming using the Freescale HCS12 chip and the C programming language, introduction to assembly language programming, CAN protocol communication, Control systems as they apply to automotive and vehicle technologies, control applications including emission systems, computerized engine control, transmission control, temperature control, cruise control, etc. and an overview of the electrical and control devices of modern vehicles		
Instruction Type	Code	Type	Hours per term
	C	Classroom instruction	37
	L	Laboratory, workshop or fieldwork	36
	T	Tutorial	
	DE	Distance education	
	Total Hours		73
Resources	ISBN	Textbook Title & Edition	Author & Publisher
	978-0136072294	HCS12 Microcontrollers and Embedded Systems	M. A. Mazidi, D. Causey, J. G. Mazidi, Pearson Publishing
	978-0-19-530826-6	Software and Hardware Engineering: Assembly and C Programming for the Freescale HCS12 Microcontroller, 2nd Edition	Fredrick M. Cady,
	978-0-13-254261-6	Automotive Technology: Principles, Diagnosis and Service, 4th Edition	Halderman, J.D. Pearson Publishing
	Other Supplies	Source	

Prerequisite(s)	AUTOTECH 3CT3, 3MV3	
Corequisite(s)		
Antirequisite(s)		
Course Specific Policies	<ol style="list-style-type: none"> 1. All submission must be done through the Avenue to Learn, online submission only. All submissions will be checked for the originality. Zero tolerance for the academic dishonesty 2. Lab attendance is mandatory, no attendance equals to zero for the lab session. No tolerance for late attendance! 3. MSAF Policy: Contact the instructor in three business days for possible accommodation. 4. The project will consist of a total of 3 weeks that worth of work within a 4 week period. The project is to be completed in your lab groups (two people per group -- exceptions require approval). Proposal Outline: Submit a brief 2 page write-up explaining the general high-level concept behind your lab project. More details about the project technical spec and submission will be uploaded to the Avenue 5. Late submissions for any course work will be penalized at 10 percent of the value of the work per day for a maximum of period of seven days including weekends. Work submitted after seven days will receive a mark of zero 	
Departmental Policies	<p>Students must maintain a GPA of 3.5/12 to continue in the program.</p> <p>In order to achieve the required learning objectives, on average, B.Tech. students can expect to do at least 3 hours of “out-of-class” work for every scheduled hour in class. “Out-of-class” work includes reading, research, assignments and preparation for tests and examinations.</p> <p>Where group work is indicated in the course outline, such collaborative work is mandatory.</p> <p>The use of cell phones, iPods, laptops and other personal electronic devices are prohibited from the classroom during the class time, unless the instructor makes an explicit exception.</p> <p>Announcements made in class or placed on Avenue are considered to have been communicated to all students including those individuals that are not in class.</p> <p>Instructor has the right to submit work to software to identify plagiarism.</p>	
3. SUB TOPIC(S)		
Week 1	Intro. Embedded System and Numbering	Ch. 1 and 2
Week 2	HCS12 Architecture and Assembly Programing	Ch.3 and 4
Week 3	Programing in C and ADC	Ch. 7 and Ch.13
Week 4	Interrupt/Timer Programing in C- Automotive Electronics (AE)	Ch. 9 and 11
Week 5	PWM and Motor Control- AE: Batteries and Cranking System	Ch. 17
Week 6	LCD and Keyboard Interfacing- Charging system and Electronic Throttle System (ETC)	Ch. 12
Mid-term Recess: Monday, February 20 to Sunday, February 26, 2017		
Week 7	Controller Area Network (CAN)-Automotive Sensors/Actuators	Notes
Week 8	Relay and Stepper Motor Interfacing- Evaporative Emission Control and CAN network Communication	Ch. 15

Week 9	Microcontroller Interfacing - AE: Electronic Suspension System and Electronic Power steering	Ch.15
Week 10	Electronics Stability Control and Cruise Control systems	Ch.19 and 25
Week 11	I2C Module – Lighting and Signaling- Airbag and Pretensioner Circuit- Wiper System	Ch. 16 and 21
Week 12	OBD-II- Intro to Hybrid Vehicle and Regenerative Brake system	Ch. 27
Week 13	Open-loop and closed-loop control Sys	Notes
Classes end: Thursday, April 6, 2017 Final examination period: Tuesday, April 11 to Thursday, April 27, 2016 All examinations MUST be written during the scheduled examination period.		
List of experiments		
Lab 1	Introduction to the Freescale HCS12 Microcontroller and the CodeWarrior IDE	
Lab 2	Introduction to Assembly Language Programming	
Lab 3	Analog-to-Digital Conversion	
Lab 4	HCS12 Interrupts	
Lab 5	DC and Stepper Motor Control	
Lab 6	LCD Display Control	
Mid-term Recess: Monday, February 20 to Sunday, February 26, 2017		
Lab 7	Introduction to CAN: part 1	
Lab 8	Introduction to CAN: part 2	
Lab 9	Lab Project	
Lab 10	Lab Project	
Lab 11	Lab Project	
Lab 12	Lab Project	
<p>Note that this structure represents a plan and is subject to adjustment term by term. The instructor and the University reserve the right to modify elements of the course during the term. The University may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with the students will be given with explanation and the opportunity to comment on changes.</p>		
4. ASSESSMENT OF LEARNING *including dates*		Weight
Active Learning		5
Mid-term test (Test 1 and Test 2)		30
Project		20
Labs		15
Final examination (tests cumulative knowledge)		30
TOTAL		100%
Percentage grades will be converted to letter grades and grade points per the University calendar.		
5. LEARNING OUTCOMES		
1. Analyze the fundamental electrical and electronic components within vehicle technologies		
2. Analyze the control systems and evaluate their operation within vehicle technologies		
3. Combine microcontrollers with sensors and actuators for practical applications in automotive systems		
4. Create control algorithms using the Freescale HCS12 microcontroller and the C programming language		
5. Evaluate, test and interface sensors and actuators to the microcontroller		
6. Use the CAN communication protocol for data receiving and transmission		

7. Design and implement a microcontroller application for vehicles within a team environment

6. POLICIES

Anti-Discrimination

The Faculty of Engineering is concerned with ensuring an environment that is free of all discrimination. If there is a problem, individuals are reminded that they should contact the Department Chair, the Sexual Harassment Officer or the Human Rights Consultant, as soon as possible.

http://www.mcmaster.ca/policy/General/HR/Discrimination_Harassment_Sexual_Harassment-Prevention&Response.pdf

Academic Integrity

You are required to exhibit honestly and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university.

It is your responsibility to understand what constitutes academic dishonesty. For information on the various kinds of academic dishonesty please refer to the Academic Integrity Policy, located at: <http://www.mcmaster.ca/policy/Students-AcademicStudies/AcademicIntegrity.pdf>.

The following illustrates only three forms of academic dishonesty:

1. Plagiarism. E.g. the submission of work that is not own or for which other credit has been obtained
2. Improper collaboration in group work
3. Copying or using unauthorized aids in tests and examinations.

Requests for Relief for Missed Academic Term Work (Assignments, Mid-Terms, etc.)

The McMaster Student Absence Form is an on-line self-reporting tool for **Undergraduate Students** to report absences for:

- 1) Relief for missed academic work worth less than 25% of the final grade resulting from medical or personal situations lasting up to three calendar days:
 - Students may submit a maximum of one academic work missed request per term. It is the responsibility of the student to follow up with instructors immediately (within the 3 day period that is specified in the MSAF) regarding the nature of the accommodation. All work due in that time period however can be covered by one MSAF.
 - MSAF cannot be used to meet religious obligation or celebration of an important religious holiday, for that has already been completed or attempted or to apply for relief for any final examination or its equivalent.
- 2) For medical or personal situations lasting more than three calendar days, and/or for missed academic work worth 25% or more of the final grade, and/or for any request for relief in a term where the MSAF has not been used previously in that term:
 - Students must visit their Associate Dean's Office (Faculty Office) and provide supporting documentation.

E-Learning Policy

Consistent with the Bachelor of Technology's policy to utilize e-learning as a complement to traditional classroom instruction, students are expected to obtain appropriate passwords and accounts to access Avenue To Learn for this course. Materials will be posted by class for student download. It is expected that students will avail themselves of these materials prior to class. Students should be aware that, when they access the electronic components of this course, private information such as first and last names, user names for the McMaster e-mail account, and program affiliation may become apparent to all other students in the course. The available information is dependent on the technology used. Continuation in this course will be deemed consent to this disclosure. If you have any questions or concerns about this

disclosure please discuss this with the course instructor. Avenue can be accessed via <http://avenue.mcmaster.ca>.

Communications

It is the student's responsibility to:

- Maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- Use the University provided e-mail address or maintain a valid forwarding e-mail address.
- Regularly check the official University communications channels. Official University communications are considered received if sent by postal mail, by fax, or by e-mail to the student's designated primary e-mail account via their @mcmaster.ca alias.
- Accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student's @mcmaster.ca alias.
- Check the McMaster/Avenue email and course websites on a regular basis during the term.

Turnitin (Optional)

This course will be using a web-based service (Turnitin.com) to reveal plagiarism. Students submit their assignment/work electronically to Turnitin.com where it is checked against the internet, published works and Turnitin's database for similar or identical work. If Turnitin finds similar or identical work that has not been properly cited, a report is sent to the instructor showing the student's work and the original source. The instructor reviews what Turnitin has found and then determines if he/she thinks there is a problem with the work. Students who do not wish to submit their work to Turnitin.com must still submit a copy to the instructor. No penalty will be assigned to a student who does not submit work to Turnitin.com. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, etc.). To see the Turnitin.com Policy, please go to

<http://www.mcmaster.ca/academicintegrity/turnitin/students/>

Protection of Privacy Act (FIPPA)

The Freedom of Information and Protection of Privacy Act (FIPPA) applies to universities. Instructors should take care to protect student names, student numbers, grades and all other personal information at all times. For example, the submission and return of assignments and posting of grades must be done in a manner that ensures confidentiality.

<http://www.mcmaster.ca/univsec/fippa/fippa.cfm>

Academic Accommodation of Students with Disabilities Policy

Students who require academic accommodation must contact Student Accessibility Services (SAS) to make arrangements with a Program Coordinator. Academic accommodations must be arranged for each term of study. Student Accessibility Services can be contacted by phone 905-525-9140 ext. 28652 or e-mail sas@mcmaster.ca. For further information consult McMaster's policy for Academic Accommodation of Students with Disabilities

<http://www.mcmaster.ca/policy/Students-AcademicStudies/AcademicAccommodation-StudentsWithDisabilities.pdf>

Students must forward a copy of the SAS accommodation to the instructor of each course and to the Program Administrator of the B.Tech. Program immediately upon receipt. If a student with a disability chooses NOT to take advantage of a SAS accommodation and chooses to sit for a regular exam, a petition for relief may not be filed after the examination is complete. <http://sas.mcmaster.ca>

Student Code of Conduct

The Student Code of Conduct (SCC) exists to promote the safety and security of all the students in the McMaster community and to encourage respect for others, their property and the laws of the land. McMaster University is a community which values mutual respect for the rights, responsibilities, dignity and well-being of others. The purpose of the Student Code of Conduct is to outline accepted standards of behavior that are harmonious with the goals and the well-being of the University community, and to define the procedures to be followed when students fail to meet the accepted standards of behavior. All students have the responsibility to familiarize themselves with the University regulations and the conduct expected of them while studying at McMaster University.
