

MECH ENG 2C04 – Fall 2021

Instructor: Dr. Elizabeth Hassan

Email: hassae3@mcmaster.ca

The information in this course outline is accurate at the time of writing but may be modified at the instructor's discretion. Also, please note the policy for "extreme circumstances" on the final page.

Modifications due to changing COVID-19 guidelines are possible. Our class will comply with all provincial and university rules. Any modifications will be made with an effort to minimize disruptions to student learning.

Lecture: Wed and Fri 1230-120 MDCL 1102 and Microsoft Teams

Labs:

- Per your **group's** schedule, alternating between in classroom, in lab (ABB C202) and online.
- You **must** attend **your** group's assigned time and location to manage room capacity.
- A final schedule will be posted on Avenue at the end of Week 0.

Section	Time	Classroom
L01	Mon 230-420	T13 127
L03	Thu 1230-220	JHE 326H

TAs:

Name	Email	Responsibility
Andres Hurtado Carreon	hurtada@mcmaster.ca	Mini DR1-3
Sam Heavenrich	heavenrs@mcmaster.ca	Mini DR1-3
Wenlin Zhang	zhanw9@mcmaster.ca	LAB1-3
Liam Burrows	burrowsl@mcmaster.ca	CAD1-3
Roshan Bashar	bashar1@mcmaster.ca	CAD1-3

Office hours: 130-230 Fri Call Dr. Hassan on Microsoft Teams

"Office hours" are when I am planning to be there and available to work with students. You can come for feedback on an assignment before you submit, ask questions about something I covered in lecture, get help with your project, get advice on problems with your group, or anything else that you would like my help with.

Learning Outcomes:

By the end of the MECHENG 2C04, the student should be able to:

1. Work as an effective team member on a mechanical design project.
2. Generate multiple design alternatives.
3. Select an initial design solution.
4. Analyze and evaluate the design solution using a CAD generated model.
5. Prepare an invoice based on the contribution of the team members and material costs.
6. Construct a written design project report with engineering and manufacturing drawings.
7. Use CAD to generate data for manufacturing components using a 3D printer and laser cutter.
8. Present their design solution to an audience.
9. Proficiently use a solid modeling CAD system to create part and assembly models and to generate drawings and bills of material;
10. Properly dimension engineering drawings according to national standards;
11. Select appropriate views and use drawing conventions such as sectioning and auxiliary views to communicate part design information;

This course is intended to encourage you to develop **independent** engineering judgement. You may notice that this project is more open-ended than 1st year projects, and there is less “scaffolding”. This is intentional and designed to guide your development .

Graduate Attributes:

MECHENG 2C04 provides the student the opportunity to develop competence in the following CEAB graduate attributes:

Graduate Attributes
4.01 - Recognizes and follows an engineering design process. (This means an iterative activity that might include recognizing the goal, specifying the constraints and desired outcomes, proposing solutions, evaluating alternatives, deciding on a solution, and implementing.)
4.02 - Recognizes and follows engineering design principles including appropriate consideration of environmental, social and economic aspects as well as health and safety issues.
4.03 - Proposes solutions to open-ended problems.
4.04 - Employs appropriate techniques for generation of creative ideas such as brainstorming and structured inventive thinking.
4.06 - Determines and employs applicable standards and codes of practice.
5.02 - Demonstrates an ability to use modern/state of the art tools.

Contact guidelines:

- Dr. Hassan will be present at lectures.
- A TA will be present during your labs.
- During the workday I'm very fast with email, but slower in the evenings and on weekends. You can expect that email will generally be replied to within 24h, but please include the course code (2C04) in the subject line for fastest response, and follow these guidelines:

Topic	Contact
General Inquiries	Email or Teams to Dr. Hassan If you make a post in our channel that you want me to respond to, make sure to (@) tag me
In class questions	Teams meeting chat
Mark adjustments/ grading questions	Email to Dr. Hassan only, please do not use Microsoft Teams Regrading requests take a little bit longer to respond to than other emails because I need to be thoughtful about them.
Help with Inventor	Teams chat with TA during labs

- If you need to speak with either Dr. Hassan directly, you can call during office hours on Microsoft Teams (see page 1) or make an appointment via email. Appointments outside office hours are very limited due to my heavy teaching schedule this term, please use office hours as much as you can.
- I cannot "check" individual homework during office hours or by email, because I can't do it for the whole class, it would not be fair. But I'm always happy to answer specific technical questions via email/Teams or during office hours.
- During a video call/meeting/class Dr. Hassan's camera will always be on, but your camera never needs to be, there's no need to show your face unless you want to.

Equipment/Text/Software:

- **There is no mandatory textbook for this class, my notes should be sufficient, posted on Avenue.**

- However, if you would like more depth or are just someone who learns better from a textbook, the following book is a great and inexpensive resource: “The Engineering Design Process: An Introduction for Mechanical Engineers” by Peter Ostafichuk, available at the bookstore or on Amazon
- For labs, you may use your own device with **Autodesk Inventor 2022** (download for free at autodesk.ca). If you cannot use the software due to your system limitations, you can access the Mechanical Engineering computer lab remotely; instructions will be posted on Avenue to Learn.
 - I’m not really concerned with which version you use, but using the same version as your colleagues will make working with them easier, and any parts I provide will be easier to work with in the current version.
 - We can’t help you with Autodesk licensing issues. If you have those issues, the advice is to sign in and out of the Autodesk website or to uninstall previous versions and reinstall the new version.
- There may be some lectures or labs where you will be required to hand sketch. As long as the drawing is legible, either paper or digital is acceptable. Please have the equipment required to hand sketch ready for each lecture session.
- Course materials will be posted on Avenue. Please check your McMaster email for updates.
- For details about equipment for the group project, please see the “Group Project” section of this outline.

Lectures

- Lecture will be in person in the room listed on Mosaic and simultaneously broadcast on Microsoft Teams. Please download the Microsoft Teams software on your device and join the team (although it is likely you will be automatically added by Mosaic).
- If you cannot attend the lecture synchronously due to connection problems or illness, a recording will be posted on Microsoft Teams.
- Feel free to mix in person and online attendance at lectures, these lecture modes are for everyone’s convenience.

Labs:

- Because this is a hybrid (in person/online) term, you will rotate through in person and online components, here is a sample rotation schedule:
- SAMPLE LAB ROTATION SCHEDULE: SEE AVENUE FOR ACTUAL

	Online (Teams)	Classroom	ABB
Week 1	Everyone does CAD1 Recording posted		
Week 2		Groups A, B, C Mini DR1 No recording	Groups D, E, F LAB1 No recording
Week 3		Groups D, E, F Mini DR1 No recording	Groups A, B, C LAB1 No recording

- If you are completing the course entirely online, you will attend LAB and Mini DR components virtually with the assistance of your group and the TAs. This will occur synchronously so you can participate, no recording will be posted. This is also acceptable in the case of illness for in person students. However, if you don't attend labs at all, you will get 0 for that lab's attendance grade and for the lab's hand-in grade.

Assignments

- There are no exams in this class, therefore it is imperative that you treat the projects and assignments with the same care and attention as you would an exam since they are worth similar amounts to exams.
- All submissions must be digital, pdf files, via Avenue (other than part files). Make sure that photos, scans or pdfs of your drawings are legible so the TAs can grade them. Guidelines for digitizing assignments will be posted on Avenue.
Drawings submitted on lined paper, or drawings that are illegible for another reason will be given a grade of 0.
- DO NOT EMAIL work to me or the TAs, even if you miss the deadline. I never accept work via email or Teams, **only** via Avenue.

- Why? Grading work outside of Avenue is undesirable for a number of reasons (record keeping, accreditation, fairness, efficiency). It makes it harder on everyone when submission guidelines are not followed
- **In-class assignments:** At most classes (lecture) there will be an in-class assignment or quiz. Assignments will be part of the lecture slides, and they can be completed even if you do not attend class for up to 24 hours after the end of class. These will be available on Avenue either as a quiz or assignment, the name will be the date of the class.
 - Grace period: 24 hours after end of class
- **All other work (EXCEPT INDIVIDUAL PARTS)** Hand in on Avenue, due at 1159 pm Friday
 - Grace period ends: 1159pm EST the following Friday (1 week)
- **Grace period:** no penalty, no need to email or MSAF; the Avenue dropbox will simply remain open.
 - In general, I recommend that you try to complete the work as it is assigned. This is intended to help you keep a schedule and past students have indicated that handing in as scheduled is important to their success in the course.
 - I implemented this policy because I want to grade your best work and I care about your stress level.
 - Use the grace period for any reason, no questions asked. If you think it's a good reason to hand in late, it probably is.
 - This is intended for the big and little things that happen in all our lives from time to time: you have a minor illness, you don't want to miss your mom's birthday, you have to work at your job, your varsity team has a game, you have a midterm in another class, your laptop breaks, your internet is slow etc.
 - Things that affect our ability to hand in work happen to all of us at some point, so I am extending you a bit of "grace" with this policy. In return, I ask that you do the same to your teammates and treat each other kindly as you work together.
 - Please note: At the end of the grace period, the dropbox will close, any assignment not submitted will be considered late and will receive a zero.

If your internet breaks as you are handing in at the end of the grace period, that is unfortunate, but the end of the grace period is the end. Please hand in sooner to allow for that kind of problem, that's what the grace period is for.

- The exception to the grace period are individual project part submissions, because we are working with an external manufacturing partner. There is **NO GRACE PERIOD ON PARTS. IF YOU DON'T SUBMIT A PART ON TIME YOU WILL GET 0 ON PROTOTYPE TESTING FOR THE INDIVIDUAL PROJECT.**
- **Grading:** Rubric feedback will be posted on Avenue, if after reviewing the guide you think that your assignment has a grading error, send Dr. Hassan an email **detailing the error specifically** and I will re-grade your work. Do not email the grading TA, all grade changes are done by Dr. Hassan.
 - Keep in mind that I will re-grade the entire assignment, not just the criteria that you have identified. If that re-grading yields a lower grade, I will not adjust your grade, but if it yields a higher one I will.
 - **Questioning your grade will never result in a penalty for you.**
- Regrading requests take a little bit longer to respond to than other emails because I need to be thoughtful about them, and they aren't as urgent as questions about work that has yet to be handed in. I appreciate your patience.
- Your lowest 20% of in-class quizzes or activities will be dropped. For example, if 15 quizzes are handed in during the term, I will drop your worst 3.
 - The purpose of this scale to reward consistent participation. Even if you are not always correct or present, you can still achieve a high participation grade (since "perfect" is actually 80%)
 - Quizzes will have a deadline of 24h after the lecture ends
- A MSAF results in an additional one week to complete your work, **not cancellation of that work.**
- **All course work MUST be handed in by the end of day (1159pm EST) December 13, 2021, no extensions.**

Teamwork:

- Teamwork is a critical part of this class and a critical part of engineering practice.
- This year, a mix of in person and online work could create difficult logistics issues. I thank you in advance for your efforts to include everyone in your group.
- You may form your own groups under the following conditions:
 - You must all be in the same section on Mosaic
 - At least 1 group member must be “in person”, fully online groups are not possible
- If I need to add or move members to teams to meet these criteria, I reserve the right to do so.
- If you need help finding group members, go to your lab section’s channel on Teams
- Insufficient contributions to your team project **are a form of academic dishonesty** and will be dealt with accordingly.
- Harassing or abusive conduct is prohibited by your student code of conduct. There is zero tolerance for harassment or abusive conduct in this class.

Individual Project:

- Your parts are being produced by an external manufacturing partner, therefore **there is no grace period on part submissions**
- If you do not follow the part submission guidelines, deadlines or file preparation guidelines you will get 0 on the prototype testing.
- **THE RULES ARE DIFFERENT FROM LAST YEAR’S CLASS. READ ALL DOCUMENTATION CAREFULLY.**
- A full rules document will be posted on Avenue.
- Your task is to build a part for a standardized robot to complete the specified task using the resources provided.
- No external resources are permitted, you may not fabricate your own parts for testing (obviously you can fabricate as much as you wish at home, but they cannot be used for scoring the prototype).

Group project:

- **THE RULES ARE DIFFERENT FROM LAST YEAR'S CLASS. READ ALL DOCUMENTATION CAREFULLY.**
- A full rules document will be posted on Avenue.
- Rules are subject to change by Dr. Hassan due to the uncertainty of this kind of work, but all changes will be posted in Lecture or on Avenue and changes will be in the students' favour (meaning they will make the challenge easier, not harder).
- Your task is to build a robot that moves forwards to an obstacle and then returns to the starting position, without using wheels.
 - You must use the specified motors
 - All legs must meet the specification in the rules (legs must cover an arc of no more than 90 degrees)
 - No powered wheels
- You are welcome to use whatever external resources for part fabrication you wish, in addition to the fabrication budget provided to you in the rules.
- You must use the "kit" motors
 - You need to use the specified motors to keep the competition fair.
 - However you may purchase these motors from whatever source you wish. The bookstore has them packaged in a convenient kit, their kit price (\$126) is probably the same or a little lower than other sources because they bought in bulk. **Please only buy one kit per group to leave enough for everyone.**
 - If you purchase elsewhere be careful, because there are motors that look the same but are different (eg they are servo only, they have lower torque, poor quality gears). Check that your motors are the same model number, motor data sheet posted on Avenue for reference.
 - Use of non-standard motors disqualifies you from the competition and **you will get 0** on your prototype
 - If you want to share parts with another team feel free, as long as it works on competition day it's ok.

- You can use any other materials you wish from other sources, but you cannot use more than 8 AA batteries.
- Your kits come with limit switches, these are the only sensors you **need** for the project. You can use anything else you wish, but:
 - you cannot communicate with your robot (e.g. no bluetooth)
 - be careful using a different board or components (it would be easy to fry components with motor current draw if you aren't careful)

Research:

You may be invited to participate in a research study being conducted by Dr. Hassan. You are under absolutely no obligation to participate and your participation will have no effect on your grade in this or any other course. Dr. Hassan will never know if you participate in any research study.

Course Grade Breakdown:

Group – 52%	Individual – 48%
<ul style="list-style-type: none"> • Group Project (GR1, GR2) - 30% • Group Mini Design Reviews (Mini DR1, Mini DR2, Mini DR3) -2% • Design Review -5% • LAB1, LAB2, LAB3 – 5% • Prototype – 10% 	<ul style="list-style-type: none"> • Individual Assignments (A1, A2) – 20% • Individual prototype – 5% • CAD1, CAD2, CAD3 – 20% • Participation via Avenue Quiz – 3%

Weekly Plan

Assignment numbering: A = Individual, GR = Group

CAD assignments are individual

LAB assignments are group

Deadlines are the earliest an assignment can be due, I may adjust later if necessary.

Lecture topic schedule is approximate and may be adjusted based on class progress.

Week of		Lecture	Lab	Hand In, Due Friday midnight
0	6-Sep	Intro, Dimensioning,	No lab, form teams	
1	13-Sep	Dimensioning, concept generation	CAD1	
2	20-Sep	Part design	LAB1/Mini DR1 per your group's schedule	CAD1
3	27-Sep	Design evaluation and validation		LAB1
4	4-Oct	Design Review	Design Review	Individual A1, Parts
Reading Week – Enjoy yourselves				
5	18-Oct	Constraints	CAD2	Group GR1
6	25-Oct	Mechanisms	LAB2/Mini DR2 per your group's schedule	CAD2
7	1-Nov	Mechanisms		LAB2
8	8-Nov	Tolerances	LAB3/Mini DR3 per your group's schedule	Individual A2
9	15-Nov	GD&T		LAB3
10	22-Nov	Reverse engineering	CAD3	
11	29-Nov	Guest & Test your robot	Test your robot	CAD3
12	6-Dec	Test your robot	Test your robot	Group GR2
Hand in all work no later than midnight EST Mon Dec 13 2021 *No Extensions*				

ACADEMIC INTEGRITY

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. **It is your responsibility to understand what constitutes academic dishonesty.**

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: “Grade of F assigned for academic dishonesty”), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the [Academic Integrity Policy](https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/), located at <https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/>

The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one’s own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.

COURSES WITH AN ON-LINE ELEMENT

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the [Code of Student Rights & Responsibilities](#) (the “Code”). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, **whether in person or online.**

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students’ access to these platforms.

ACADEMIC ACCOMMODATION OF STUDENTS WITH DISABILITIES

Students with disabilities who require academic accommodation must contact [Student Accessibility Services](#) (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University’s [Academic Accommodation of Students with Disabilities](#) policy.

REQUESTS FOR RELIEF FOR MISSED ACADEMIC TERM WORK

McMaster Student Absence Form (MSAF): In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar “Requests for Relief for Missed Academic Term Work”.

ACADEMIC ACCOMMODATION FOR RELIGIOUS, INDIGENOUS OR SPIRITUAL OBSERVANCES (RISO)

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the [RISO](#) policy. Students should submit their request to their Faculty Office normally *within 10 working days of the beginning of term* in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

COPYRIGHT AND RECORDING

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, **including lectures** by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

EXTREME CIRCUMSTANCES

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.

STUDENT SUPPORTS

WELLNESS

Student Wellness Centre

On-Campus Support for Medical and Mental Health Concerns. Doctors and Counsellors available. Located in PGCL, 2nd Floor.

Mon-Fri 9AM-5PM 905-525-9140 ext. 27700
<https://wellness.mcmaster.ca/contact-us/>

Main St. West Urgent Care Centre

For immediate health concerns that do not require the emergency room.

690 Main St W - Mon-Sun 9AM-9PM

Emergency Rooms

For **immediate, serious** health concerns.

St. Joseph's Healthcare Hamilton
50 Charlton Ave E

McMaster Children's Hospital
Students 17 and under

Telehealth Ontario

Telehealth Ontario is a free, confidential service you can call to get health advice or information. A Registered Nurse will take your call 24 hours a day, seven days a week.

Toll-free: 1-866-797-0000 Toll-free TTY: 1-866-797-0007

Phone Lines

Good2Talk

Confidential helpline providing professional counselling, info and referrals for mental health, addiction, and well-being

1-866-925-5454

LGBT Youthline

Confidential, non-judgemental & informed LGBTQQ2SI peer support.

Sun-Fri, 4-9:30 PM, Text 647-694-4275

SACHA (SEXUAL ASSAULT CENTRE - HAMILTON AREA)

Confidential, anonymous 24-hour nonjudgmental telephone support for adults who have experienced sexual violence at any point in their lives; will provide accompaniment to hospital or police station for survivors wishing to seek medical attention or report; counselling services & public education

905-525-4162

Empower Me (Graduate Students)

24/7 accessible counselling services to empower you to thrive, crisis support, mental health and well-being services.

1-844-741-6389

Bounceback

CBT skills-building for mild to moderate depression and anxiety for people 15 or older. If accessed through self-referral, the client's primary care provider will be notified.

1-866-345-0224

INDIGENOUS STUDENTS

MSU PEER SUPPORT SERVICES

MSU Maccess

Maccess is a service that aims to build and maintain a campus that celebrates, advocates, and ensures inclusivity in the area of disability. A central aspect to Maccess is the provision of peer support by trained volunteers with lived experiences with disability such as chronic illness, mental illness, mental health concerns, neurodivergence, and additional identities.

Student Health Education Centre

SHEC is a peer-run health promotion, education, and referral service for McMaster University students. SHEC focuses on engaging with students about health-related issues through performances, peer support, fundraisers, and events. The service offers peer support, anonymous and confidential pregnancy testing, a resource library, condoms, lubricant, and menstrual products. SHEC's space is located in MUSC 202.

Women + Gender Equity Network

WGEN is a service that caters to women, transfolk, people who identify outside the gender binary, and all survivors of sexual assault. WGEN provides a safe(r) space and resource library on campus in MUSC 204. Volunteers in the space offer peer support and the service also runs a support group for survivors of domestic and intimate partner violence.

Pride Community Centre

The Pride Community Centre is a service of the McMaster Students Union. We provide a contact point for McMaster students that may identify as gay, lesbian, bisexual, transgender, queer, and/or any of the other diverse identities that make up our community. We offer educational programming and access to resources of interest, as well as peer support and a physical space for students to meet and socialize with each other. As advocates for gender & sexual diversity, the PCC's mandate upholds that LGBTQ+ students are entitled to a safe and supportive campus, absent of homophobia and transphobia, where the expression of one's gender & sexual identity is welcomed and respected.
