ELEC ENG 2CJ4 C01 & C02
Circuits and Systems
Winter 2018
Course Outline

CALENDAR/COURSE DESCRIPTION

Advanced circuit analysis including dependent sources; Laplace transforms with applications; frequency response; 2-port networks; coupled circuits; power relationships.

PRE-REQUISITES AND ANTI-REQUISITES

Prerequisite(s): Registration in any Computer Engineering or Electrical Engineering Program, ELECENG 2CJ4 or ELECENG 2CI5
Antirequisite(s): ELECENG 2CJ5

SCHEDULE

Lectures: C01 Tuesday, Thursday & Friday 11:30 am – 12:20 pm, ITB 137
C02 Monday, Wednesday & Thursday 10:30 am – 11:20 am, JHE 376

Tutorial: T01 Wednesday 1:30 pm – 2:20 pm, ABB 102
T02 Wednesday 8:30 am – 9:20 am, HH 302

Labs: Every Other Week: L01 Monday 2:30 pm – 5:20 pm; L02 Monday 2:30 pm – 5:20 pm; L03 Tuesday 2:30 pm – 5:20 pm; L04 Tuesday 2:30 pm – 5:20 pm; L05 Wednesday 2:30 pm – 5:20 pm; L06 Wednesday 2:30 pm – 5:20 pm, L07 Thursday 2:30 pm – 5:20 pm; L08 Thursday 2:30 pm – 5:20 pm, ITB A114

INSTRUCTOR OFFICE HOURS AND CONTACT INFORMATION

Dr. Jun Chen (C01)
ITB-A221
junchen@mail.ece.mcmaster.ca

Dr. Aleksandar Jeremic (C02)
ITB-A214
jeremic@mail.ece.mcmaster.ca
ext. 27894

Office Hours: By appointment

TEACHING ASSISTANT OFFICE HOURS AND CONTACT INFORMATION

There are 9 TAs for this course (covering both sections). Their Office Hours are by appointment.

Xiaoyu Zhao
ITB-A203
zhaox72@mcmaster.ca
ext. 27904

Melih Yayli
ETB-432

COURSE WEBSITE/ALTERNATE METHODS OF COMMUNICATION

http://www.ece.mcmaster.ca/~junchen/EE2CJ4.htm

COURSE OBJECTIVES

By the end of this course, students should be able to:

- solve electric circuits involving both passive and active elements for voltages at nodes, and branch or loop currents
- solve linear transient circuit problems involving second-order systems using either time-domain or Laplace transform techniques
- analyze and sketch the frequency response of a circuit
- analyze two-port networks and three-phase circuits
- analyze magnetic circuits

ASSUMED KNOWLEDGE

Calculus, linear algebra, and basic circuit analysis techniques

COURSE MATERIALS

Required Texts:

Calculator:
The only calculator permitted in tests and examinations is the McMaster Standard Calculator (Casio FX-991 MS or MS Plus).

Other Materials:
N/A
# Course Overview

# Accreditation Learning Outcomes

Note: The Learning Outcomes defined in this section are measured throughout the course and form part of the Department’s continuous improvement process. They are a key component of the accreditation process for the program and will not be taken into consideration in determining a student’s actual grade in the course. For more information on accreditation, please ask your instructor or visit: [http://www.engineerscanada.ca](http://www.engineerscanada.ca).

**ACADEMIC INTEGRITY**

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: “Grade of F assigned for academic dishonesty”), and/or suspension or expulsion from the university.

It is your responsibility to understand what constitutes academic dishonesty. For information on the various types of academic dishonesty please refer to the Academic Integrity Policy, located at [http://www.mcmaster.ca/academicintegrity](http://www.mcmaster.ca/academicintegrity).

The following illustrates only three forms of academic dishonesty:

1. Plagiarism, e.g. the submission of work that is not one’s own or for which other credit has been obtained.
2. Improper collaboration in group work.
3. Copying or using unauthorized aids in tests and examinations.

**ACADEMIC ACCOMMODATIONS**

Students who require academic accommodation must contact Student accessibility Services (SAS) to make arrangements with a Program Coordinator. Academic accommodations must be arranged for each term of study. Student Accessibility Services can be contact by phone at 905.525.9140 ext. 28652 or e-mail at sas@mcmaster.ca. For further information, consult McMaster University’s Policy for Academic Accommodation of Students with Disabilities.
NOTIFICATION OF STUDENT ABSENCE AND SUBMISSION OF REQUEST FOR RELIEF FOR MISSED ACADEMIC WORK

In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar - "Requests for Relief for Missed Academic Term Work":
http://www.mcmaster.ca/msaf/

NOTICE REGARDING POSSIBLE COURSE MODIFICATION

The instructor and university reserve the right to modify elements of the course during the term. The university may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with the students will be given with explanation and the opportunity to comment on changes. It is the responsibility of the student to check their McMaster email and course websites weekly during the term and to note any changes.

Electrical and Computer Engineering Lab Safety

Information for Laboratory Safety and Important Contacts

This document is for users of ECE instructional laboratories in the Information Technology Building.

This document provides important information for the healthy and safe operation of ECE instructional laboratories. This document is required reading for all laboratory supervisors, instructors, researchers, staff, and students working in or managing instructional laboratories in ECE. It is expected that revisions and updates to this document will be done continually. A McMaster University lab manual is also available to read in every laboratory.

General Health and Safety Principles

Good laboratory practice requires that every laboratory worker and supervisor observe the following:

1. Food and beverages are not permitted in the instructional laboratories.
2. A Laboratory Information Sheet on each lab door identifying potential hazards and emergency contact names should be known.
3. Laboratory equipment should only be used for its designed purpose.
4. Proper and safe use of lab equipment should be known before using it.
5. The course TA leading the lab should be informed of any unsafe condition.
6. The location and correct use of all available safety equipment should be known.
7. Potential hazards and appropriate safety precautions should be determined, and sufficiency of existing safety equipment should be confirmed before beginning new operations.
8. Proper waste disposal procedures should be followed.
Location of Safety Equipment

**Fire Extinguisher**
On walls in halls outside of labs

**First Aid Kit**
ITB A111, or dial “88” after 4:30 p.m.

**Telephone**
On the wall of every lab near the door

**Fire Alarm Pulls**
Near all building exit doors on all floors

---

**Who to Contact**

**Emergency Medical / Security:** On McMaster University campus, call Security at extension 88 or 905-522-4135 from a cell phone.

**Non-Emergency Accident or Incident:** Immediately inform the TA on duty or Course Instructor.

**University Security (Enquiries / Non-Emergency):** Dial 24281 on a McMaster phone or dial 905-525-9140 ext. 24281 from a cell phone.

**See TA or Instructor:** For problems with heat, ventilation, fire extinguishers, or immediate repairs

**Environmental & Occupational Health Support Services (EOHSS):** For health and safety questions dial 24352 on a McMaster phone or dial 905-525-9140 ext. 24352 from a cell phone.

**ECE Specific Instructional Laboratory Concerns:** For non-emergency questions specific to the ECE

---

**In Case of a Fire (Dial 88)**

When calling to report a fire, give name, exact location, and building.

1. Immediately vacate the building via the nearest Exit Route. Do not use elevators!
2. Everyone is responsible for knowing the location of the nearest fire extinguisher, the fire alarm, and the nearest fire escape.
3. The safety of all people in the vicinity of a fire is of foremost importance. But do not endanger yourself!
4. In the event of a fire in your work area shout “Fire!” and pull the nearest fire alarm.
5. Do not attempt to extinguish a fire unless you are confident it can be done in a prompt and safe manner utilizing a hand-held fire extinguisher. Use the appropriate fire extinguisher for the specific type of fire. Most labs are equipped with Class A, B, and C extinguishers. Do not attempt to extinguish Class D fires which involve combustible metals such as magnesium, titanium, sodium, potassium, zirconium, lithium, and any other finely divided metals which are oxidizable. Use a fire sand bucket for Class D fires.
6. Do not attempt to fight a major fire on your own.
7. If possible, make sure the room is evacuated; close but do not lock the door and
safely exit the building.

**Clothing on Fire**

**Do not use a fire extinguisher on people**

1. Douse with water from safety shower immediately or
2. Roll on floor and scream for help or
3. Wrap with fire blanket to smother flame (a coat or other nonflammmable fiber may be used if blanket is unavailable). Do not wrap a standing person; rather, lay the victim down to extinguish the fire. The blanket should be removed once the fire is out to disperse the heat.

**Equipment Failure or Hazard**

*Failure of equipment may be indicative of a safety hazard - You must report all incidents.*

Should you observe excessive heat, excessive noise, damage, and/or abnormal behaviour of the lab equipment:

1. Immediately discontinue use of the equipment.
2. In Power Lab, press wall-mounted emergency shut-off button.
3. Inform your TA of the problem.
4. Wait for further instructions from your TA.
5. TA must file an incident report.

**Protocol for Safe Laboratory Practice**

*Leave equipment in a safe state for the next person - if you’re not sure, ask!*

In general, leave equipment in a safe state when you finish with it. When in doubt, consult the course TA.
