CALENDAR/COURSE DESCRIPTION

Time-varying fields, uniform plane waves, reflection and transmission, dispersion, transmission lines and impedance matching, waveguides, elements of theory of radiation and antennas.

PRE-REQUISITES AND ANTI-REQUISITES

Prerequisite(s): Registration in any Computer Engineering, Engineering Physics or Electrical Engineering Program, ELECENG 2FH3 or ENGPHE 2A04

SCHEDULE

Lectures: Monday, Wednesday and Thursday 1:30 p.m.
Tutorial: Friday 10:30 a.m.
Labs: Every other week: L01 Mondays 2:30 p.m.- 5:20 p.m.; L02 Mondays 2:30 p.m.- 5:20 p.m.; L03 Tuesdays 2:30 p.m.- 5:20 p.m.; L04 Tuesdays 2:30 p.m.- 5:20 p.m.; L05 Wednesdays 2:30 p.m.- 5:20 p.m.; L06 Wednesdays 2:30 p.m.- 5:20 p.m.; L07 Thursdays 2:30 p.m.- 5:20 p.m.; L08 Thursdays 2:30 p.m.- 5:20 p.m.; L09 Fridays 2:30 p.m.- 5:20 p.m.; L10 Fridays 2:30 p.m.- 5:20 p.m.

INSTRUCTOR OFFICE HOURS AND CONTACT INFORMATION

Dr. Shiva Kumar
ITB-A322
kumars@mail.ece.mcmaster.ca
ext. 26008
Office hours: Monday and Wednesdays 10 am – 12 pm

TEACHING ASSISTANT OFFICE HOURS AND CONTACT INFORMATION

M. Naghshvarianjromi
ITB-A204
naghsrvm@mcmaster.ca
ext. 24087
TA Office Hours: Mondays and Thursdays 10:30 am – 12:30 pm

E. Bidaki
ITB-A204
elham.bidaki@gmail.com
ext. 24087

J. Li
ITB-A204
maghrabm@mcmaster.ca
ext. 24087

N. Acton
ITB-A204
actonn@mcmaster.ca
ext. 24087
COURSE WEBSITE/ALTERNATE METHODS OF COMMUNICATION

http://www.ece.mcmaster.ca/~kumars/Electromag.htm

COURSE OBJECTIVES

By the end of this course, students should be able to:

- gain knowledge on the basic principles of time-varying electromagnetic field
- understand the basics of transmission lines and antenna.
- solve engineering problems related to electromagnetic propagation
- design simple devices that require the knowledge of electromagnetic field

ASSUMED KNOWLEDGE

Electrostatics and Magnetostatics

COURSE MATERIALS

Required Texts:

Calculator:
Only the McMaster Standard Calculator will be permitted in tests and examinations. This is available at the Campus Store.

Reference Books:

Course Notes: can be found in the course webpage.

Custom courseware for Matlab simulations (contact Campus bookstore)

COURSE OVERVIEW

<table>
<thead>
<tr>
<th>Date/Week</th>
<th>Topic</th>
<th>Readings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 1</td>
<td>Review of static electric field and magnetic field</td>
<td>Lecture Notes</td>
</tr>
<tr>
<td>Week 2</td>
<td>Time varying Fields- Faraday’s Law and displacement current</td>
<td>Lecture Notes</td>
</tr>
<tr>
<td>Week 3</td>
<td>Time varying Fields- Maxwell’s equations-</td>
<td>Lecture Notes</td>
</tr>
<tr>
<td>Week 4</td>
<td>Uniform Plane wave</td>
<td>Lecture Notes</td>
</tr>
</tbody>
</table>
Week 5 | Plane wave reflections | Lecture Notes
---|---|---
Week 6 | Phase speed and group speed | Lecture Notes
Week 7 | Transmission Lines | Lecture Notes
Week 8 | Transmission Lines | Lecture Notes
Week 9 | Transmission Lines | Lecture Notes
Week 10 | Transmission Lines | Lecture Notes
Week 11 | Radiation and antennas | Lecture Notes
Week 12 | Review | Lecture Notes

LABORATORY OVERVIEW

<table>

<tr>
<td>Week 2</td>
<td>Faraday's Law</td>
<td>Lab volt manual</td>
</tr>
<tr>
<td>Week 3</td>
<td>Transmission Line</td>
<td>Lab volt manual</td>
</tr>
<tr>
<td>Week 4</td>
<td>Transmission Line</td>
<td>Lab volt manual</td>
</tr>
</tbody>
</table>

LABORATORY OPERATION

The students should work individually and finish a quiz at the end of the experiment. The lab marks are based on the lab performance and quiz.

ASSESSMENT

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Midterm</td>
<td>15%</td>
</tr>
<tr>
<td>Quiz</td>
<td>15%</td>
</tr>
</tbody>
</table>
Grading Policies:
- Grade adjustment techniques and info on Missed and Late material such as “No make-up quizzes will be granted; Late assignments will be given Zero; Bell curving will not be applied.”

ACCREDITATION LEARNING OUTCOMES

Note: The Learning Outcomes defined in this section are measured throughout the course and form part of the Department’s continuous improvement process. They are a key component of the accreditation process for the program and will not be taken into consideration in determining a student’s actual grade in the course. For more information on accreditation, please ask your instructor or visit: [http://www.engineerscanada.ca](http://www.engineerscanada.ca).

<table>
<thead>
<tr>
<th>Outcomes</th>
<th>Indicators</th>
<th>Measurement Methods(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maxwell’s equations and propagation of uniform plane wave in dielectrics and conductors</td>
<td>1.4</td>
<td>Quiz 1</td>
</tr>
<tr>
<td>Derive reflection and transmission coefficients for plane waves at normal incidence for various types of media</td>
<td>2.2</td>
<td>Midterm</td>
</tr>
<tr>
<td>Appreciate interplay between theory and experiment for transmission lines, operating lab equipment correctly, gathering valid measurements and interpreting them correctly through the transmission line equations</td>
<td>5.2</td>
<td>Lab 3</td>
</tr>
<tr>
<td>Apply Maxwell’s equations to obtain rectangular waveguide modes, cut-off frequency, dominant mode, wave impedance and field line patterns for various cross sections</td>
<td>1.4</td>
<td>Final exam</td>
</tr>
<tr>
<td>Hertzian dipole and antenna specifications</td>
<td>1.2</td>
<td>Final exam</td>
</tr>

</table>

ACADEMIC INTEGRITY

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: “Grade of F assigned for academic dishonesty”), and/or suspension or expulsion from the university.
It is your responsibility to understand what constitutes academic dishonesty. For information on the various types of academic dishonesty please refer to the Academic Integrity Policy, located at http://www.mcmaster.ca/academicintegrity

The following illustrates only three forms of academic dishonesty:

1. Plagiarism, e.g. the submission of work that is not one’s own or for which other credit has been obtained.
2. Improper collaboration in group work.
3. Copying or using unauthorized aids in tests and examinations.

ACADEMIC ACCOMMODATIONS

Students who require academic accommodation must contact Student accessibility Services (SAS) to make arrangements with a Program Coordinator. Academic accommodations must be arranged for each term of study. Student Accessibility Services can be contact by phone at 905.525.9140 ext. 28652 or e-mail at sas@mcmaster.ca. For further information, consult McMaster University's Policy for Academic Accommodation of Students with Disabilities.

NOTIFICATION OF STUDENT ABSENCE AND SUBMISSION OF REQUEST FOR RELIEF FOR MISSED ACADEMIC WORK

In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar "Requests for Relief for Missed Academic Term Work" : http://www.mcmaster.ca/msaf/.

NOTICE REGARDING POSSIBLE COURSE MODIFICATION

The instructor and university reserve the right to modify elements of the course during the term. The university may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with the students will be given with explanation and the opportunity to comment on changes. It is the responsibility of the student to check their McMaster email and course websites weekly during the term and to note any changes.

ON-LINE STATEMENT FOR COURSES REQUIRING ONLINE ACCESS OR WORK

In this course, we will be using webpages. Students should be aware that, when they access the electronic components of this course, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in this course will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure, please discuss this with the course instructor.
Information for Laboratory Safety and Important Contacts

This document is for users of ECE instructional laboratories in the Information Technology Building.

This document provides important information for the healthy and safe operation of ECE instructional laboratories. This document is required reading for all laboratory supervisors, instructors, researchers, staff, and students working in or managing instructional laboratories in ECE. It is expected that revisions and updates to this document will be done continually. A McMaster University lab manual is also available to read in every laboratory.

General Health and Safety Principles
Good laboratory practice requires that every laboratory worker and supervisor observe the following:
1. Food and beverages are not permitted in the instructional laboratories.
2. A Laboratory Information Sheet on each lab door identifying potential hazards and emergency contact names should be known.
3. Laboratory equipment should only be used for its designed purpose.
4. Proper and safe use of lab equipment should be known before using it.
5. The course TA leading the lab should be informed of any unsafe condition.
6. The location and correct use of all available safety equipment should be known.
7. Potential hazards and appropriate safety precautions should be determined, and sufficiency of existing safety equipment should be confirmed before beginning new operations.
8. Proper waste disposal procedures should be followed.

Location of Safety Equipment

**Fire Extinguisher**
On walls in halls outside of labs

**First Aid Kit**
ITB A111, or dial “88” after 4:30 p.m.

**Telephone**
On the wall of every lab near the door

**Fire Alarm Pulls**
Near all building exit doors on all floors
In Case of a Fire (Dial 88)
When calling to report a fire, give name, exact location, and building.
1. Immediately vacate the building via the nearest Exit Route. Do not use elevators!
2. Everyone is responsible for knowing the location of the nearest fire extinguisher, the fire alarm, and the nearest fire escape.
3. The safety of all people in the vicinity of a fire is of foremost importance. But do not endanger yourself!
4. In the event of a fire in your work area shout “Fire!” and pull the nearest fire alarm.
5. Do not attempt to extinguish a fire unless you are confident it can be done in a prompt and safe manner utilizing a hand-held fire extinguisher. Use the appropriate fire extinguisher for the specific type of fire. Most labs are equipped with Class A, B, and C extinguishers. Do not attempt to extinguish Class D fires which involve combustible metals such as magnesium, titanium, sodium, potassium, zirconium, lithium, and any other finely divided metals which are oxidizable. Use a fire sand bucket for Class D fires.
6. Do not attempt to fight a major fire on your own.
7. If possible, make sure the room is evacuated; close but do not lock the door and safely exit the building.

Clothing on Fire
Do not use a fire extinguisher on people
1. Douse with water from safety shower immediately or
2. Roll on floor and scream for help or
3. Wrap with fire blanket to smother flame (a coat or other nonflammable fiber may be used if blanket is unavailable). Do not wrap a standing person; rather, lay the victim down to extinguish the fire. The blanket should be removed once the fire is out to disperse the heat.
Equipment Failure or Hazard
Failure of equipment may be indicative of a safety hazard - You must report all incidents.
Should you observe excessive heat, excessive noise, damage, and/or abnormal behaviour of the lab equipment:
1. Immediately discontinue use of the equipment.
2. In Power Lab, press wall-mounted emergency shut-off button.
3. Inform your TA of the problem.
4. Wait for further instructions from your TA.
5. TA must file an incident report.

Protocol for Safe Laboratory Practice
Leave equipment in a safe state for the next person - if you’re not sure, ask!
In general, leave equipment in a safe state when you finish with it. When in doubt, consult the course TA.
