Introduction

The Instructor’s Guide describes part of MEASURE (McMaster Engineering Accreditation System for Undergraduate).

MEASURE’s purpose is to:
- Facilitate the continual improvement of the curriculum of the programs offered by the Faculty of Engineering
- Assist with generating accreditation reports for the Canadian Engineering Accreditation Board (CEAB)

MEASURE is built using corporate performance management software, (Vena) that combines Excel spreadsheets, a central database, and workflow management.

This document outlines the MEASURE tasks that take place at the instructor level.

Specifically, each instructor will update the Rubric Input Template for each section of every course taught.

Additional information on MEASURE can be found in the Administrator’s Guide and in the Department Contributor’s Guide. The latest version of all these documents, along with other resources, are available at [http://measure.mcmaster.ca](http://measure.mcmaster.ca)

Issue Reporting: [https://www.eng.mcmaster.ca/forms/measure-issue-tracking](https://www.eng.mcmaster.ca/forms/measure-issue-tracking)

About the Vena Contributor Connector

The Contributor Connector is a special version of the Vena Add-In that is designed for Office for Mac and Office Online.

Similar to the Windows Add-In, the Contributor Connector enables users to perform various Vena functions in Excel, such as saving data inputs to the Vena database, choosing among data sets, drilling on intersection data, and working with Line Item Details.

Installing Vena for Mac Users

1. Open Microsoft Excel for Mac

2. Select the Insert tab

3. Select Get Add-ins

4. Search for “Vena Connector”
5. Press Add

6. After successfully adding the Vena Connector, the Vena add-in icon will be displayed under the Insert tab.

If Microsoft Office is preventing the installation of the add-in (i.e. Office has been configured to not allow individual add-ins), it is because the user is signed in as a domain user (ads.mcmaster.ca).

Signing in as a domain user will prevent users from adding certain Excel Add-ins because UTS controls what add-ins are allowed. Users will need to sign out to install the Vena add-in.

Steps to signing out:
1. Open Excel for Mac
2. Click on your initials then press sign out
3. Confirm sign out
Enabling Trust Access to the VBA Project Object Model
After successfully installing the Contributor Connector, access to the VBA project object model will need to be trusted for Vena to run properly.

1. Open Excel
2. Select a Blank Workbook
3. Select Excel → Preferences
4. Under Sharing and Privacy, select Security
5. Ensure that Disable all macros with notification is selected
6. Check the box next to Trust access to the VBA project object model
7. Close all instances of Excel for the settings to take effect.

Other Operating Systems
Vena is currently compatible for Windows and macOS users with Microsoft Office. Users who do not have a compatible operating system and/or Microsoft Office will need to access Vena using a virtual machine.

Instructions to Access a Virtual Machine:
https://www.eng.mcmaster.ca/sites/default/files/vminstruct.pdf

Accessing Vena

1. Open a web browser
2. Visit https://vena.io
3. In the email textbox, enter your McMaster email address (i.e. macid@mcmaster.ca)
4. Your password has been previously communicated. If you do not remember, or do not have an account, please contact Measure Support (measure@mcmaster.ca)

Changing Vena Password

Your password can be changed by clicking the user’s name in the upper right corner of the screen and then selecting “Change Password”. You will be prompted to enter the current and new password.
**Instructor Input**

For each course being measured, the continuous improvement plan and rubric data will need to be entered and saved. They will need to be entered in a single spreadsheet called the Rubric Input Template.

When the data entry for the Rubric Input Template is complete, you are done. Although the Vena interface shows a Submit button, the button is disabled.

***You do not need to worry about using the Submit button***

**Vena Checklist**

Prior to entering/reviewing rubric data with Vena, please ensure the following tasks are complete:

<table>
<thead>
<tr>
<th>Task</th>
<th>Windows</th>
<th>macOS</th>
</tr>
</thead>
<tbody>
<tr>
<td>The device meets the system requirements</td>
<td>Click <a href="#">here</a></td>
<td></td>
</tr>
<tr>
<td>Microsoft Excel 2010 or later is installed</td>
<td>Click <a href="#">here</a></td>
<td>Click <a href="#">here</a></td>
</tr>
<tr>
<td>Vena Add-In is installed</td>
<td>Click <a href="#">here</a></td>
<td>Click <a href="#">here</a></td>
</tr>
<tr>
<td>Enabling Trust Access to Vena</td>
<td>Click <a href="#">here</a></td>
<td>Click <a href="#">here</a></td>
</tr>
</tbody>
</table>

**macOS Guide**

This section of the guide is intended for macOS users.

**Accessing Rubric Input Template**

1. Under Contributor view, select on Task **Rubric Input & Course Report (by Instructor)** - New

2. Select **Check Out** beside the **Rubric Input Template – macOS.xlsx**
3. A new section will display to select the Course, Year, and Section  
   a. **Program**: Select the course for data entry. Pressing the dropdown will let users see the list of available courses. However, typing the course name in the textbox will help find it quicker.  
   b. **Year**: Press the dropdown button to select the corresponding year and term.  
   c. **Section**: The default section is Section 1 (unless otherwise stated).

4. Press **Download (Check Out)**

5. A pop-up will appear to save the template. Click **save** and remember the saved location of the template.

6. **Open** the Excel File  
   a. If prompted, press **Enable Macros**

**Updating Rubric Input Template**
If an instructor has rubric information from the previous year, the same rubric information will be prepopulated as a starting point for the current year.
If this is the first time a course is being measured, the user may need to insert new learning outcomes (rows) to enter the rubric data.

**Tip:** Users can enter/update data where cells are highlighted in yellow.

1. **Instructor Name**
   a. Enter the instructor’s name for the course

2. **Rubric Entry Status**
   a. Select a status from the dropdown menu
      i. Not Started – User has not entered rubric data
      ii. WIP – User has entered rubric data, but not complete
      iii. Fully Complete – User has completed entering rubric data

<table>
<thead>
<tr>
<th>Course:</th>
<th>TEST 101 (Test Course for Training 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Term:</td>
<td>2018-2019 Term 1</td>
</tr>
<tr>
<td>Section:</td>
<td>Section 1</td>
</tr>
<tr>
<td>Instructor Name:</td>
<td>John Smith</td>
</tr>
<tr>
<td>Rubric Entry Status:</td>
<td>Fully Complete</td>
</tr>
<tr>
<td>Last User:</td>
<td>Admin User</td>
</tr>
</tbody>
</table>

3. **Updated By:**
   a. Enter your name

4. **Summary of Actions to be Taken for Continuous Improvement for Next Academic Year**
   a. Instructors can enter their continuous improvement plan(s) under the section “Summary of Actions to be Taken for Continuous Improvement for Next Academic Year”

   b. To attach a file:
      i. Select a cell
      ii. Under Vena Comments, click **Add New**
      iii. Below the comments, click **Attach**
      iv. Select your file and click **Open**
      v. The new file will be displayed as an attachment in the comments section
      vi. Press the back arrow button [↩]
      vii. Click **Save** to save the changes
viii. When re-opening the template, the cell containing the attachment will now be highlighted in blue for visibility

5. **Indicators/Learning Outcomes**

   **Indicators** - descriptors of what students must achieve to be considered competent in the corresponding attribute

   **Learning Outcomes** – descriptors of what the instructor expects the student to learn to be considered competent in the corresponding indicator

   ![Indicator / Learning Outcome Diagram]

   *** Every indicator must have at least (1) learning outcome (row) inserted ***

   a. **Adding Topics (rows)**
      i. Select an **Indicator** (grey cell)
      ii. Click the **+** button under the Line Item Details section
         1. A new row will be inserted below the selected indicator
      iii. **Enter** the Learning Outcome in the newly inserted row

   b. **Deleting Topics (rows)**
      i. Select the **Learning Outcome** you wish to remove
      ii. Click **-** button under the Line Item Details section
         1. The selected Learning Outcome row will be removed

   c. **Missing Indicators**
      i. If an indicator is missing or is not required, please contact your department representative or **MEASURE Support** to update the Measure Indicators Template

6. **Measurement Date**
   a. Enter the current date in YYYY-MM-DD format (e.g. 2019-12-31, etc.)

7. **Expectations**
   **Description**: Describes a given expectation that applies to a learning outcome

   **Number**: The numbers in this column should be the number of students that apply to the given category, not the percentage of the class in that category

   a. **Enter** a description and number for each expectation

8. **Used (1/0)**
The “Used (1/0)” column is updated to determine if the row will be part of the calculation for the Summary and Detailed View charts.

If users wish to record the rubric data and include it as part of the calculation for the Summary and Detailed View charts, set the value to 1.

If users wish to record the rubric data, but not include it as part of the calculation for the Summary and Detailed View charts, set the value to 0.

If unsure, always set the value to 1.

9. Measurement Category
The Measurement Category has a dropdown menu with a list of possible values pertaining to the learning outcome (i.e. Assignment, Lab, Exam, etc.)

   a. Select a category from the dropdown box for each row.

10. Attaching Sample Files
Reminder: For privacy and security reasons, remove any information that may identify a student

   To attach a file:
   i. Select a cell
   ii. Under Vena Comments, click Add New
   iii. Below the comments, click Attach
   iv. Select your file and click Open
   v. The new file will be displayed as an attachment in the comments section
   vi. Press the back arrow button
   vii. Click Save to save the changes
   viii. When re-opening the template, the cell containing the attachment will now be highlighted in blue for visibility

11. Reviewing the Number Values
After entering the student count for each expectation, ensure the sum of the line item’s equal the Indicator’s total
12. Saving Data
   a. Click the Save button
   b. If successful, will temporarily appear over the save button

13. Closing and Checking in the Template
    After saving the changes and closing the Excel template, you will need to go back to the web browser and check the file back in.
    a. Open your web browser
    b. Visit Vena (https://vena.io)
    c. Under Contributor view, click on Task Rubric Input & Course Report (by Instructor) - New
    d. Press the Check-In button next to the template currently checked out

Viewing Summary Chart
The Summary Chart is a graphical summary of every Indicator containing rubric data. The chart may contain up to four bars where each bar represents an Expectation.

After entering/updating rubric data:
1. Click the button
2. On the template, button

Tip: If the charts do not reflect the data, click Vena’s Save button, close and check-in the template, then check-out and download the template.
Viewing Detailed Chart

The Detailed Chart is a graphical summary of every Learning Outcome containing rubric course data. Every learning outcome may contain up to four bars where each bar represents an Expectation.

1. Click the button
2. On the template, press the button
3. Select the Detailed View worksheet.

Tip: If the charts do not reflect the data, click Vena’s Save button, close and check-in the template, then check-out and download the template.

Reports

Throughout the year, instructors can look at the reports generated by MEASURE. These reports can help fill out the CEAB questionnaire during the accreditation years.

Most of the report types are described in the Departmental Guide. However, the reports that are of particular interest to instructors are described here.

The Vena Reports are best viewed using a Windows-based operating system.

In particular, instructors will want to view:
- CEAB Attribute Report
- Faculty and Curriculum Committee Recommendation’s Report
- Historical Course Measurement Report
- Historical Program Measurement Report
- Measurement Map Report
Accessing the Reports

1. Ensure the Contributor tab is selected

2. On the left side, click **Reports** (the centre section will reload to only display Reports)

3. Click **Reports**
CEAB Annual Attribute Report

This multi-page report provides a detailed snapshot of how the program is progressing for the current year. It includes an overall program summary and a separate report for each Graduate Attribute at the course level.

The report is built off a calculated average with a set order of operations, rather than directly based on the average of total students per outcome. At each level, the total is aggregated. For example, at the Section level, all sections are aggregated together, and from there, all terms are aggregated together to get a Yearly Average for all Sections per Course.

The order of operations for the calculation is:
1. LID’s (Learning Outcome)
2. Indicator
3. Attribute
4. Section
5. Year
6. Program

Viewing the Annual Attribute Report
1. Select View next to CEAB Annual Attribute Report.xlsm
2. Save and open the Excel file
   a. If prompted, Enable Content and Enable Macros
3. Select the Program and press OK
CEAB YoY (Year over Year) Attribute Report

This report provides a look into the Average Score per Attribute, at a Program level, comparing it year over year. The Choose option that pops up allows you to choose the ending year that you’d like to view.

Prior to 2020-2021, the previous average scores were calculated based on the archived data of the # of students in each attribute/outcome. Starting in 2020-2021, the calculation is calculated on the new average process, as detailed in the CEAB Attribute Report section above.

The data for the current year, or most recent year is not automatically calculated. This YoY report uses archived data as it’s source. As a result, the archiving process must be executed to see the current year data. Note that this means the entire process must be completed, and the data from step 7a of the Vena Template Automation Average ETL must be executed. This is imperative to the process.

Please refer to the One Time Fix – ETL section of the CEAB Attribute Report.

Viewing the YoY Attribute Report

1. Select **View** next to **CEAB YoY Attribute Report.xlsm**

2. **Save** and **open** the Excel file
   a. If prompted, **Enable Content** and **Enable Macros**

3. Select the **Program**, latest **Year**, and press **OK**
Faculty and Curriculum Committee Recommendation Report
Displays the recommendations from the curriculum committee at both course and program level. This report can be viewed for any year where data is available. The data comes from the feedback provided in the Curriculum Committee Recommendations Input Template and as described in the Departmental Guide.

1. Press View next to Faculty and Curriculum Committee Recommendations Report
2. Select a Course/Program and Year
3. Download and remember the saved location of the report

To view an attached file:
   a. Select a cell containing an attachment
   b. Click on Comments under Vena Tab
   c. On the right-hand side, select the attached file
4. For macOS users, click View All under Vena Comments
5. On the right-hand side, select the attached file

Historical Course Measurement Report
Shows the historical trend for each course at different levels (indicator, attribute and all).

1. Press View next to Historical Course Measurement Report
2. Download and remember the saved location of the report
3. Select a Course (and Graduate Attribute if necessary)
4. If prompted, Enable Content and Enable Macros

Historical Program Measurement Report
Shows the historical trend for each program at different levels (indicator, attribute and all).
1. Press **View** next to Historical Program Measurement Report

2. **Download** and remember the saved location of the report

3. Select a Program (and Graduate Attribute if necessary)

4. If prompted, **Enable Content** and **Enable Macros**

### Measurement Map Report
Indicates attributes the instructors will need to measure for a given year.

1. Press **View** next to Measurement Map Report

2. **Download** and remember the saved location of the report

3. Select a Program and Year

4. If prompted, **Enable Content** and **Enable Macros**
The cascade feature enables users to generate the same Vena report for multiple courses or programs. This feature eliminates the need to manually generate the same report for multiple courses.

**Generating a Mass Course Report**

The steps below will show how to create

1. Select Contributor → Reports → Course Reports → View

2. Download and open the Course Report
   a. Click Enable Editing and Edit Content if the pop-up appears

3. Select a Course (belonging to the program), Year, Term, Section

4. Select the Vena Tab then click Cascade

5. For dimension, select Program

   ![Cascade](cascade.png)

6. Select the courses belonging to the program (hold shift + click)
7. Change option from Cascade to Sheet to **Cascade to File**

8. Choose a location to save the files

9. Click **OK**

10. The Cascade feature will take approximately 5-10 minutes to complete
## Appendix I: Report Overview

<table>
