Tap into a pool of highly qualified McMaster University engineering students by supporting student clubs, special events, or other experiential-learning activities.

From the annual McMaster Engineering Competition (MEC), to the Deltahacks hackathon, student-run activities always require external support. Sponsoring clubs and teams means getting your logo on vehicles, attending industry nights, providing judges and prizes for competition... in other words, getting your company's name in front of top students!

**Student Clubs**

Students clubs come in all shapes and sizes. Some compete in open competitions with schools across Ontario and North America, while others are concerned with equity and social justice. There are over 20 active groups that include:

- Tech clubs that promote software/coding
- Car Teams that compete in races i.e. MAC Formula Electric, McMaster Baja
- Faculty-specific societies i.e. Engineering & Management (MEMS)
- Engineers Without Borders, Women in Eng, EngiQueers and more!

**BIG STUDENT EVENTS FOR 2017/2018**

**AUG. 26- SEPT. 3, 2017**

**Welcome Week:** Get your company in front of an audience of some one-thousand first-year students. Sponsoring swag bags, give-aways, lunch or other activities can highlight your commitment to student wellness.

**OCT. 22, 2017**

**MEC:** Sponsoring this event means providing judges, great prizes and mentoring. Over 100 students participated last year. Challenges include design, programming and consulting.

**NOV. 10-12, 2017**

**Diversity Conference:**

This 3-day national conference brings together a diverse network of engineering students from across the county. McMaster Engineering students are hosting this year’s event.

**JAN. 28-29, 2018**

**Deltahacks (Hackathon):**

Bringing together students and industry for hours of tech creativity and problem-solving. McMaster’s hackathon allows you over 36 hours of time to mingle with, mentor and challenge top students.
