COMP ENG 3DQ5
Digital Systems Design

COURSE OUTLINE
Please refer to the course website for updated information.

COURSE DESCRIPTION

Advanced design methods of digital systems, including modelling, simulation, synthesis and verification using hardware description languages, timing analysis and hardware debugging; implementation of computer peripherals in programmable devices.

Three lectures, one tutorial, one lab (three hours) every week.

PRE-REQUISITES AND ANTI-REQUISITES

Prerequisite(s): COMPENG 2DI4 and one of COMPENG 2DP4 or 2DX4 or 2DX3
Students taking this course as an elective must receive the permission of the instructor.

Anti-requisite(s): N/A

SCHEDULE and MODE OF DELIVERY

The material for this course will be delivered through a mixture of in-person lectures, tutorials, and labs. The lectures, tutorials and labs will NOT be recorded.

Lectures:  Monday 10:30 a.m. - 12:20 p.m. and Wednesday 10:30 a.m. - 11:20 a.m.
Tutorial:  Wednesday 11:30 a.m. - 12:20 p.m.
Labs:  Weekly 2:30 p.m. - 5:20 p.m. (L01 Tuesday, L02 Wednesday, L03 Thursday)

INSTRUCTOR

Dr. Nicola Nicolici
E-mail: nicolici@mcmaster.ca
Office:  ITB-A210
Phone:  905-525-9140 ext. 27598
Office Hours:  Technical questions will be taken when the instructor is in the lab
Friday 12 p.m. to 1 p.m. on Teams – this timeslot will be used to discuss personal challenges faced by the concerned students – for this type of meeting, an appointment request needs to be made at least 24 hours before the meeting)
TEACHING ASSISTANTS

Guvanthi Abeysinghe Mudiyanelage       abeysing@mcmaster.ca
Graham Power                           powerg@mcmaster.ca
Ali Hussein                            hussea34@mcmaster.ca
Aaron Pitcher                         pitchea@mcmaster.ca
Ali Abbasi                             abbas46@mcmaster.ca
Youssef Asham                          ashamy@mcmaster.ca

TA office hours will be announced on the course website.

COURSE WEBSITE

http://avenue.mcmaster.ca

COURSE OBJECTIVES

By the end of this course, students should be able to:
- Analyze and model complex digital circuits using hardware description languages
- Understand design, verification and implementation methods for digital systems
- Learn how to perform as a practitioner by developing an idea into a working prototype

CEAB GRADUATE ATTRIBUTES (GAs)

Note: The CEAB Graduate Attributes (GAs) defined in this section are measured throughout the course and form part of the Department’s continuous improvement process. They are a key component of the accreditation process for the program and will not be considered in determining a student’s actual grade in the course. For more information on accreditation, please ask your instructor or visit http://www.engineerscanada.ca.

<table>

</table>

### ASSUMED KNOWLEDGE

Students should be knowledgeable of the digital representation of electrical signals, number systems, operation of the basic logic gates (AND, OR, …), combinational logic blocks (multiplexer, adder/subtractor, …), sequential elements (latches, flip-flops, …), sequential logic blocks (counters, shift registers, …), and know how to design finite-state-machines (FSMs).

### COURSE MATERIALS

**Textbook:** There is **NO** textbook used in this course. The main sources of information are labs, lectures and tutorials.

**Calculator:** No calculator will be allowed during tests and examinations.

### COURSE OVERVIEW

LABORATORY OPERATION

- Each student in the course is required to pass the lab safety quiz prior to attempting any of the laboratories. The quiz will be on Avenue to Learn.

- The information on accessing and using the lab can be found on the webpage: https://www.eng.mcmaster.ca/ece/labs-and-health-safety#Labs-Access-and-Use

- There will be five lab sessions and one comprehensive project. The labs will cover the basics of digital systems design. The project requires that you design, verify and implement an integrated digital system for image decompression. The project interviews are mandatory and will be done in the week of November 27 during regular lab timeslots. Note that a late course withdrawal will not be permitted if the project has been attempted and the concerned student’s name is included in the submission due on November 27.

- You are allowed to work in groups of two. You must submit your source code and written reports for all the deliverables, five labs and one project. It is important to note that, unless explicitly stated in the lab/project report, it is assumed that each group member has contributed equally to all the decisions for every take-home exercise. This implies that, when cross-examined, each group member is expected to answer any question. If it is explicitly stated what each group member’s contribution was, then the marks will be scaled accordingly.

- Students are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process, particularly during, but not limited to, the group work for lab and project deliverables. Note that these deliverables (including source code, design files, and lab/project reports) are forbidden from sharing in public repositories. Only the two partners from the same group should have access to their group’s private repositories.

- It is important to note that lab and project marks are provisional until the final exam is written in December 2023 because they are subject to an audit (including, but not limited to, an oral cross-examination). For more info, please check the course website regularly.
**ASSESSMENT**

<td>100%</td>
</tr>
</tbody>
</table>

In addition to the final exam, there will be one in-class technical quiz on Monday, September 11, at 10:30 a.m. (at the beginning of the lecture) and one midterm on Monday, October 23, at 6:30 p.m. (logistics will be confirmed on the course website in due time). Students who miss the quiz and have a valid excuse will have a 3% larger weight allocated to the final examination component of the final grade. Students who miss the midterm and have a valid excuse will be subjected to a make-up test. Anything (worth credit) missed without a valid excuse will be given zero marks. Please note that the instructor reserves the right to choose the format (e.g., written or oral) of any deferred midterm or exam in this course. Announcements concerning graded material may be made in any format (e.g., announcements may be made only in class).

Before the “Last day for withdrawing from courses without failure by default” date, you will receive marks for the quiz, several labs, and midterm, constituting at least 25% of the final grade. Conversion from percentage to letter grade will be through the standard scale used in the Office of the Registrar. To pass the course, you must also obtain at least 40% on the final examination and at least 40% on the project. Statistical adjustments will not normally be used.

**ACADEMIC INTEGRITY**

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. The academic credentials you earn are rooted in principles of honesty and academic integrity. It is your responsibility to understand what constitutes academic dishonesty.

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g., the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: “Grade of F assigned for academic dishonesty”), and/or suspension or expulsion from the University. For information on the various types of academic dishonesty, please refer to the Academic Integrity Policy, located at [https://secretariat.mcmaster.ca/university-policies-proceduresguidelines/](https://secretariat.mcmaster.ca/university-policies-proceduresguidelines/)

The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g., the submission of work that is not one’s own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.
AUTHENTICITY / PLAGIARISM DETECTION

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student-submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g., A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., online search, other software, etc.). For more details about McMaster's use of Turnitin.com, please go to www.mcmaster.ca/academicintegrity.

COURSES WITH AN ONLINE ELEMENT

Some courses may use online elements (e.g., email, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster email accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses online elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure, please discuss this with the course instructor.

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

COPYRIGHT AND RECORDING

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright-protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical, and artistic work, including lectures by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the Instructor for the purpose of authorized distribution or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the Instructor if this is a concern for you.
### CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience and the responsibility to demonstrate respectful and dignified interactions within all of our living, learning, and working communities. These expectations are described in the Code of Student Rights & Responsibilities (the "Code"). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, whether in person or online. It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g., use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students’ access to these platforms.

### ACADEMIC ACCOMMODATIONS

Students with disabilities who require academic accommodation must contact Student Accessibility Services (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's Academic Accommodation of Students with Disabilities policy.

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the RISO policy. Students should submit their request to their Faculty Office normally within 10 working days of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

### REQUESTS FOR RELIEF FOR MISSED ACADEMIC WORK

McMaster Student Absence Form (MSAF): In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar "Requests for Relief for Missed Academic Term Work".

### EXTREME CIRCUMSTANCES

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.
**Information for Laboratory Safety and Important Contacts**

This document provides important information for the healthy and safe operation of ECE instructional laboratories. This document is required reading for all laboratory supervisors, instructors, researchers, staff, and students working in or managing instructional laboratories in ECE. It is expected that revisions and updates to this document will be done continually. A McMaster University lab manual is also available to read in every laboratory and online [https://hr.mcmaster.ca/app/uploads/2019/07/2019-McMaster-Lab-Manual.pdf](https://hr.mcmaster.ca/app/uploads/2019/07/2019-McMaster-Lab-Manual.pdf)

**General Health and Safety Principles**

Good laboratory practice requires that every laboratory worker and supervisor observe the following whether conducting lab work at school or at home:

1. Food and beverages are not permitted in the instructional laboratories.
2. A Laboratory Information Sheet on each lab door identifying potential hazards and emergency contact names should be known.
3. Laboratory equipment should only be used for its designed purpose.
4. Proper and safe use of lab equipment should be known before using it.
5. The course TA leading the lab should be informed of any unsafe conditions.
6. The location and correct use of all available safety equipment should be known.
7. Potential hazards and appropriate safety precautions should be determined, and the sufficiency of existing safety equipment should be confirmed before beginning new operations.
8. Proper waste disposal procedures should be followed.
Location of Safety Equipment

Fire Extinguisher
On walls in halls outside of labs

First Aid Kit
ITB A111, or dial "88" after 4:30 p.m.

Telephone
On the wall of every lab near the door

Fire Alarm Pulls
Near all building exit doors on all floors

Who to Contact

Non-Emergency Accident or Incident: Immediately inform the TA on duty or Course Instructor.

University Security (Enquiries / Non-Emergency): Dial 24281 on a McMaster phone or dial 905-525-9140 ext. 24281 from a cell phone.

See TA or Instructor: For problems with heat, ventilation, fire extinguishers, or immediate repairs.

Environmental & Occupational Health Support Services (EOHSS): For health and safety questions dial 24352 on a McMaster phone or dial 905-525-9140 ext. 24352 from a cell phone.

ECE Specific Instructional Laboratory Concerns: For non-emergency questions specific to the ECE laboratories, please contact 24103.

In Case of a Fire (On Campus Dial 88)

When calling to report a fire, give name, exact location, and building.
1. Immediately vacate the building via the nearest Exit Route. Do not use elevators!
2. Everyone is responsible for knowing the location of the nearest fire extinguisher, the fire alarm, and the nearest fire escape.
3. The safety of all people in the vicinity of a fire is of foremost importance. But do not endanger yourself!
4. In the event of a fire in your work area shout "Fire!" and pull the nearest fire alarm.
5. Do not attempt to extinguish a fire unless you are confident it can be done in a prompt and safe manner utilizing a hand-held fire extinguisher. Use the appropriate fire extinguisher for the specific type of fire. Most labs are equipped with Class A, B, and C extinguishers. Do not attempt to extinguish Class D fires which involve combustible metals such as magnesium, titanium, sodium, potassium, zirconium, lithium, and any other finely divided metals which are oxidizable. Use a fire sand bucket for Class D fires.
6. Do not attempt to fight a major fire on your own.
7. If possible, make sure the room is evacuated; close but do not lock the door and safely exit the building.
Clothing on Fire
Do not use a fire extinguisher on people
1. Douse with water from safety shower immediately or
2. Roll on floor and scream for help or
3. Wrap with fire blanket to smother flame (a coat or other nonflammable fiber may be used if blanket is unavailable). Do not wrap a standing person; rather, lay the victim down to extinguish the fire. The blanket should be removed once the fire is out to disperse the heat.

Equipment Failure or Hazard
Failure of equipment may be indicative of a safety hazard - You must report all incidents.
Should you observe excessive heat, excessive noise, damage, and/or abnormal behaviour of the lab equipment:
1. Immediately discontinue use of the equipment.
2. In power labs, press the wall-mounted emergency shut-off button.
3. Inform your TA of the problem.
4. Wait for further instructions from your TA.
5. TA must file an incident report.

Protocol For Safe Laboratory Practice
Leave equipment in a safe state for the next person - if you're not sure, ask!
In general, leave equipment in a safe state when you finish with it. When in doubt, consult the course TA.
